

Rákið á firðunum

- diagnostisering og heilsustøða

Knud Simonsen

Føroysku firðirnir

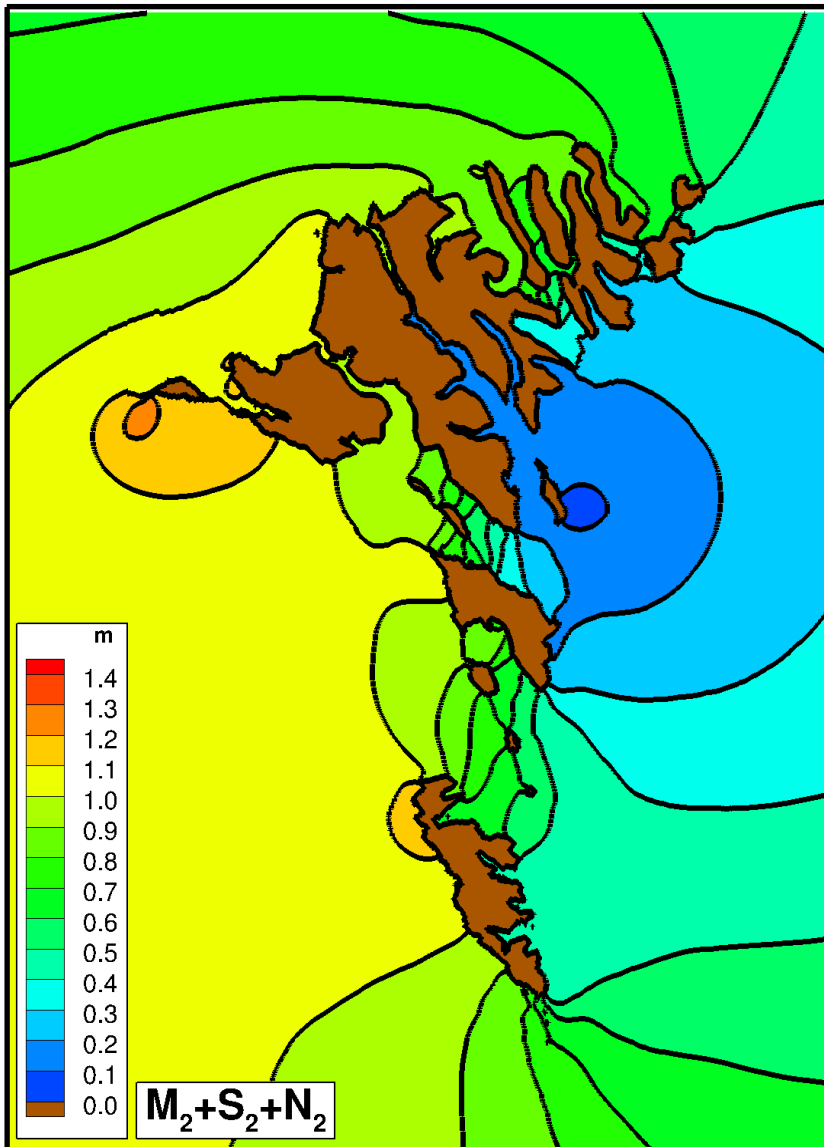

.. skulu helst hava
pláss fyri øllum

... og einki skal
síggjast aftaná!!

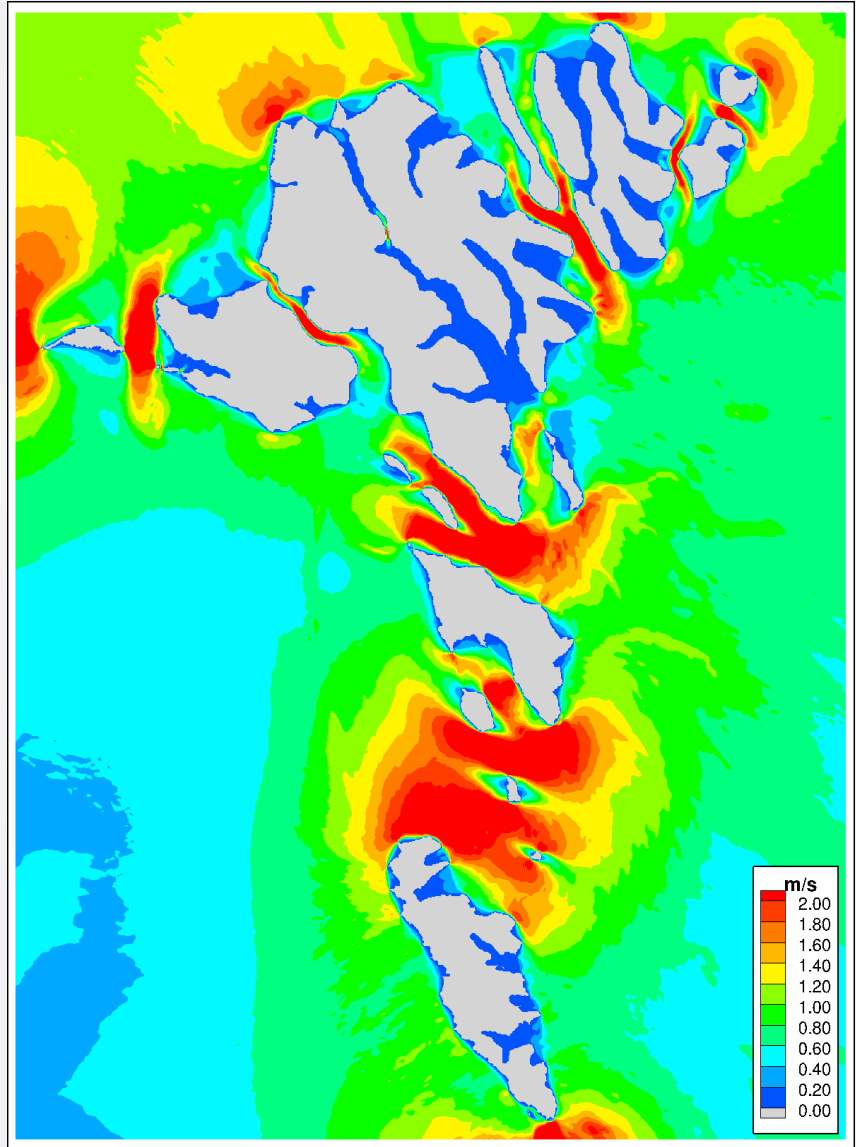

Sjóvarfall

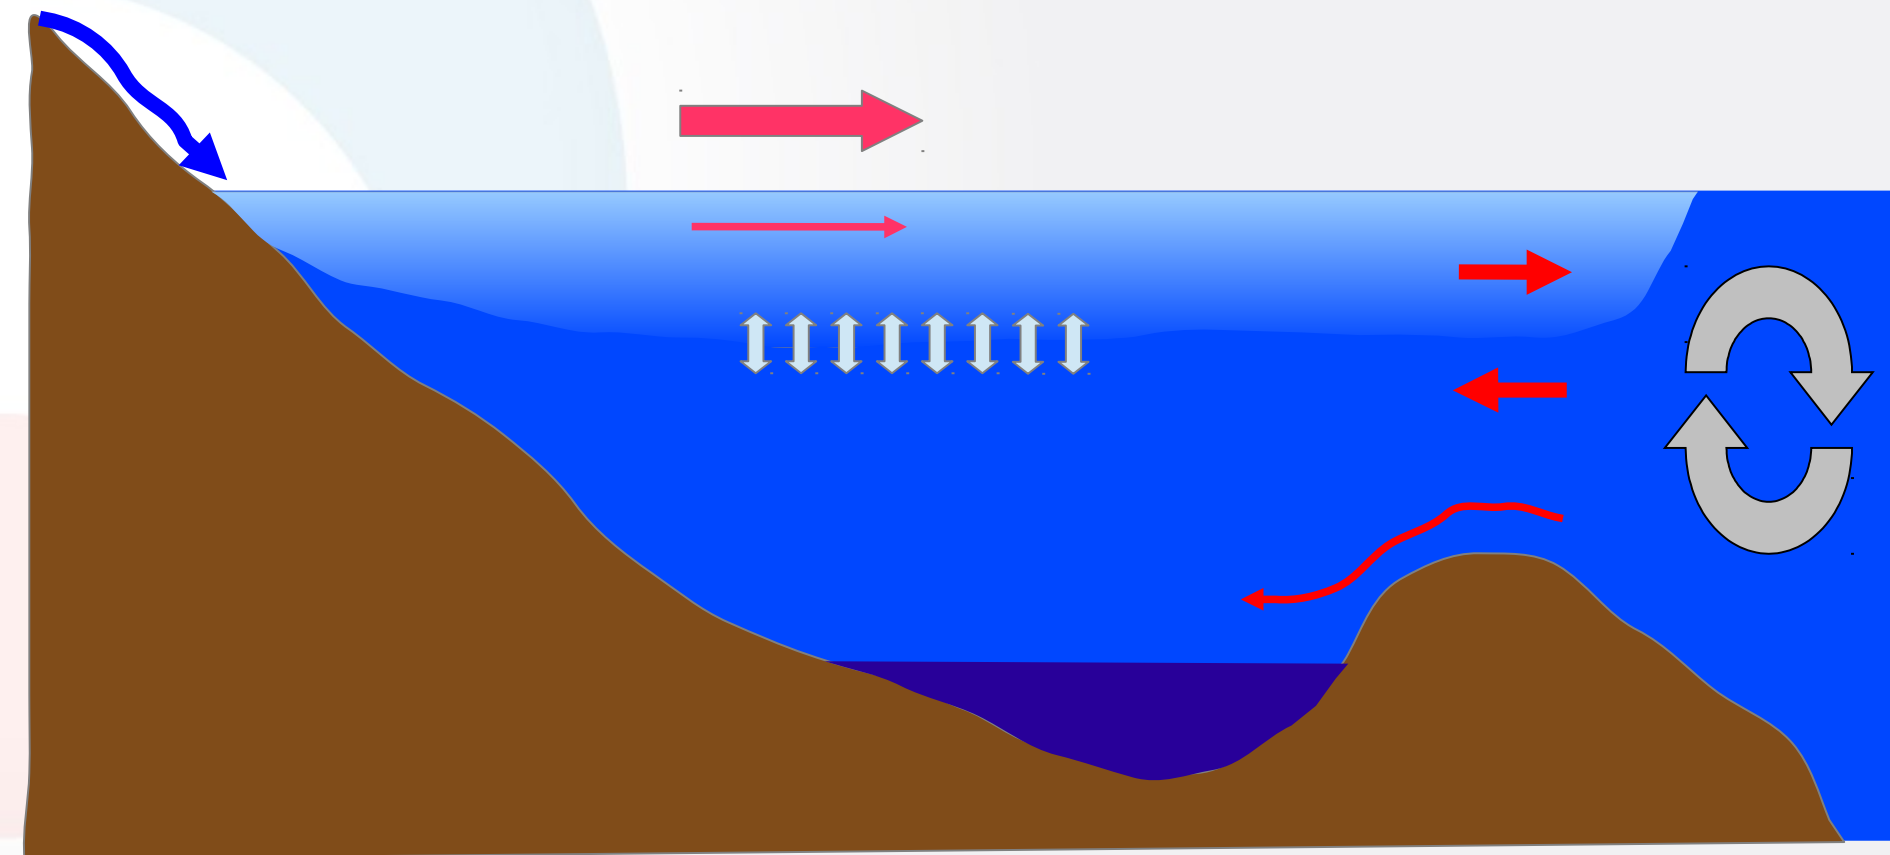

Flóð og fjøra (Amplituda)

Mesta rák á meðal broddi

Fjarðarák - sambart lærubókini

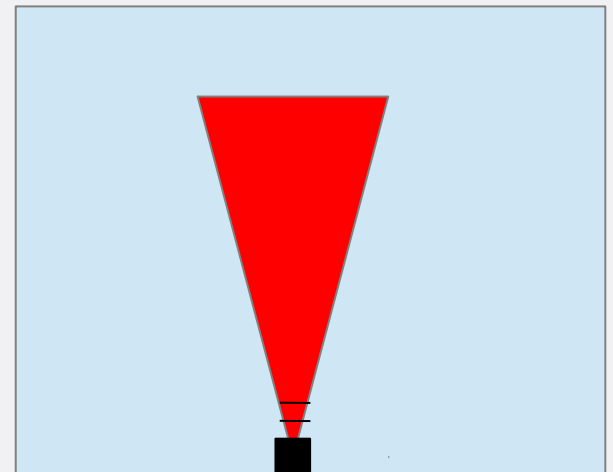

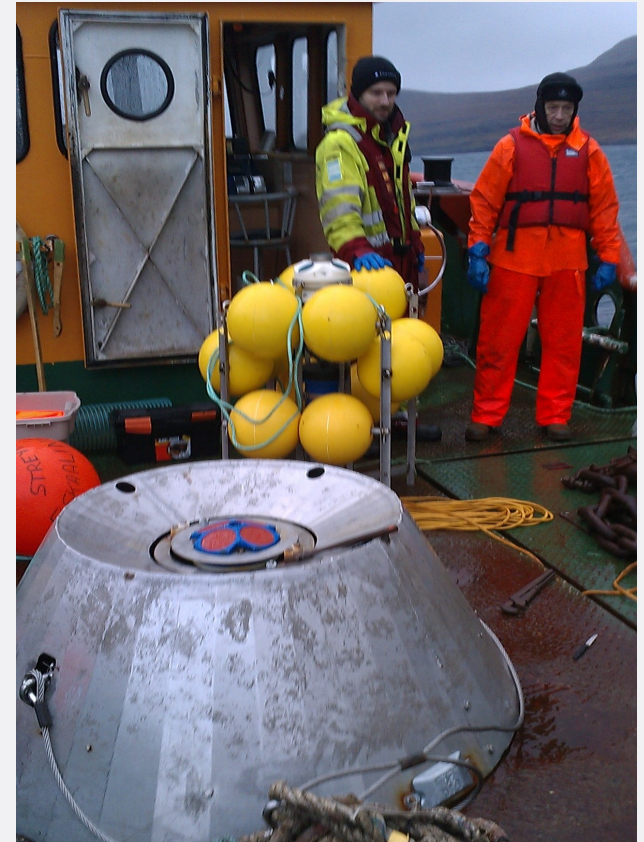

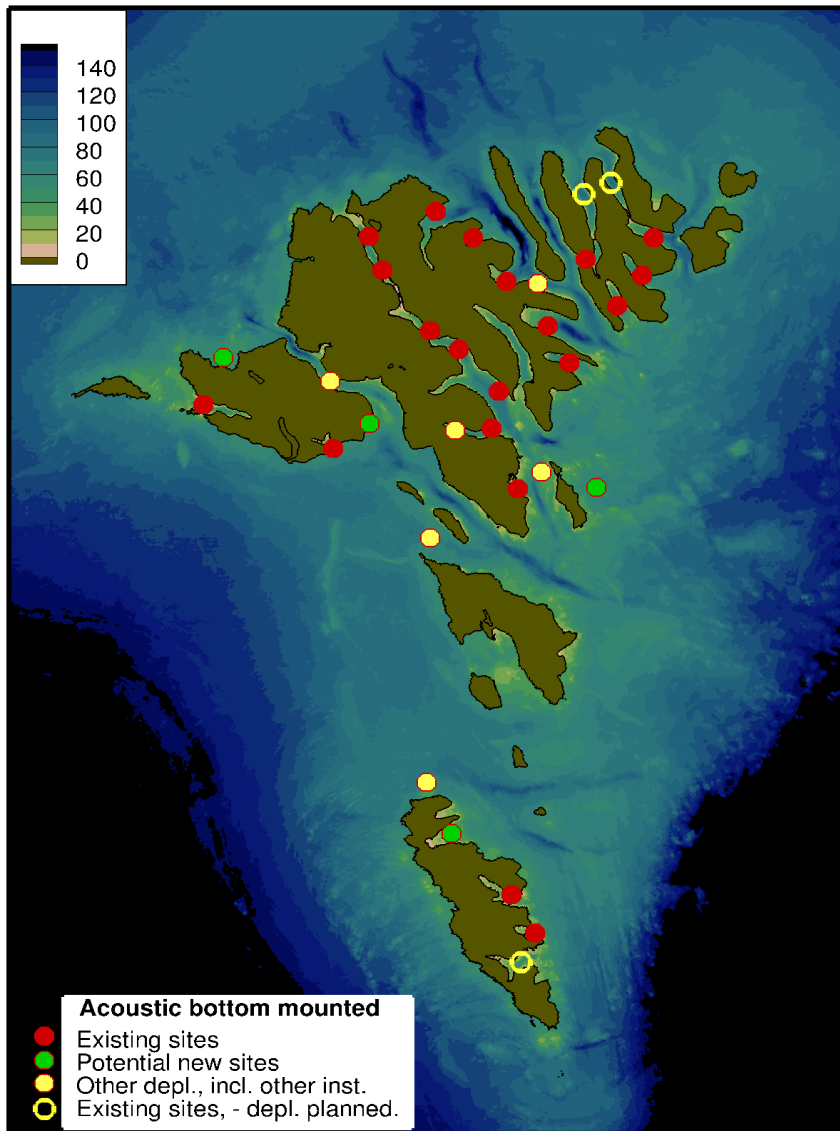

Hvussu kannu vit firðirnar?

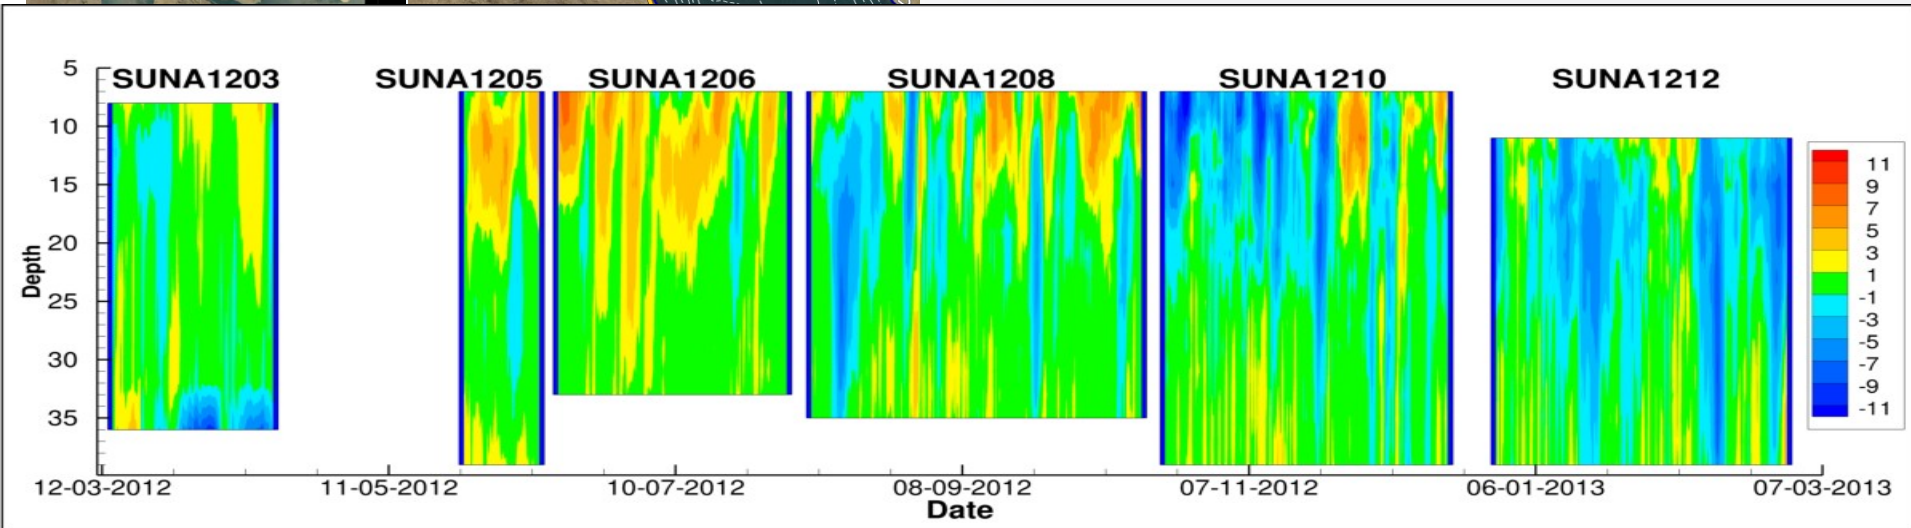

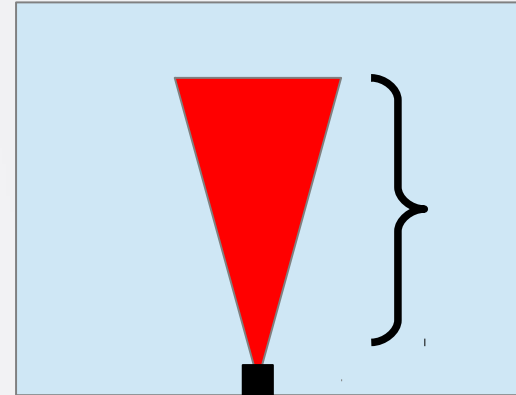

Streymmátingar

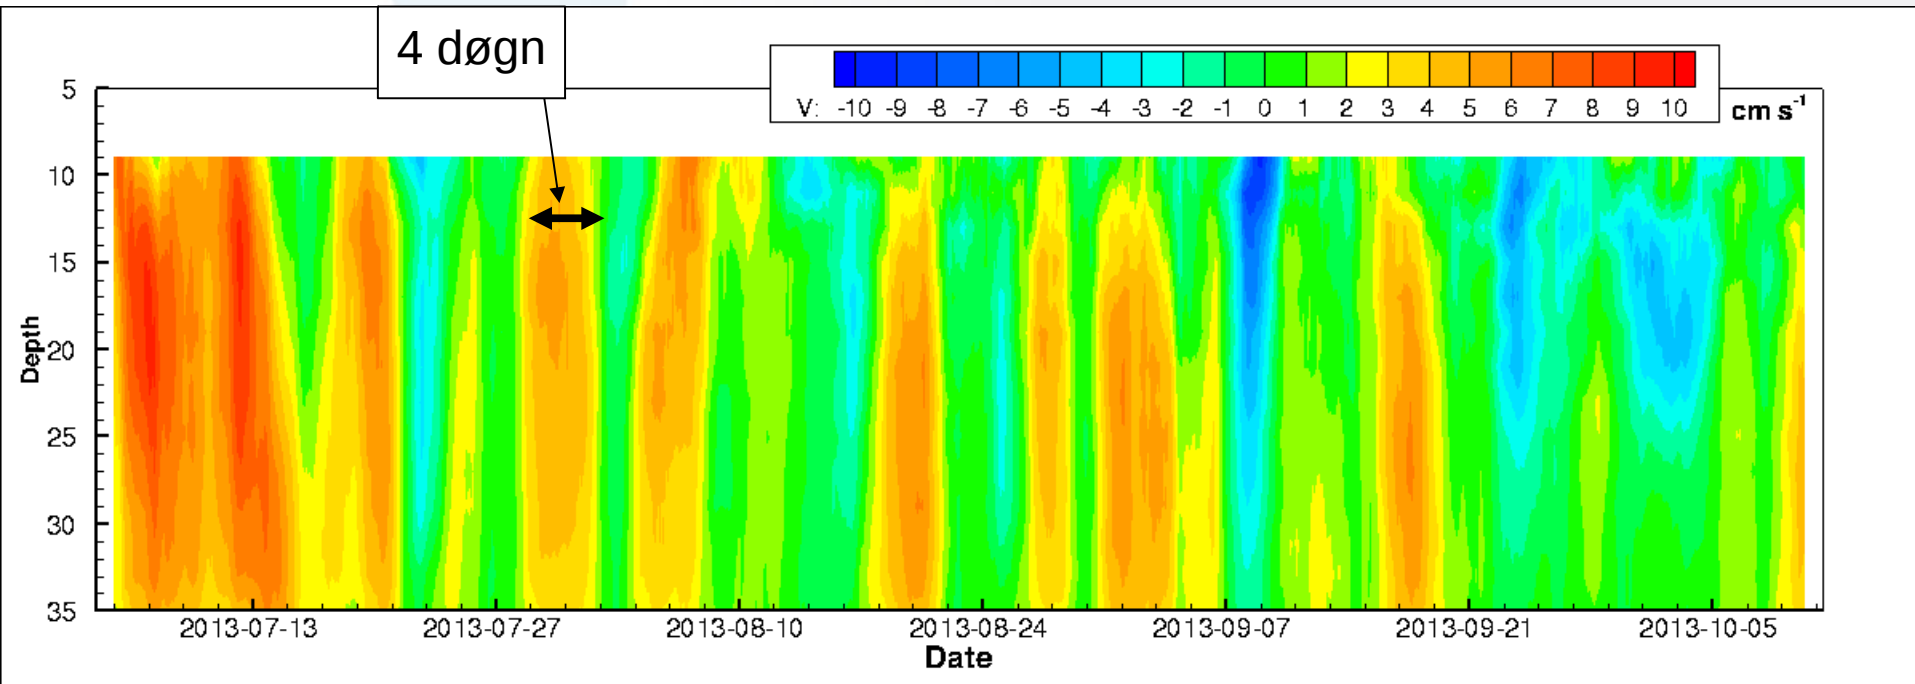

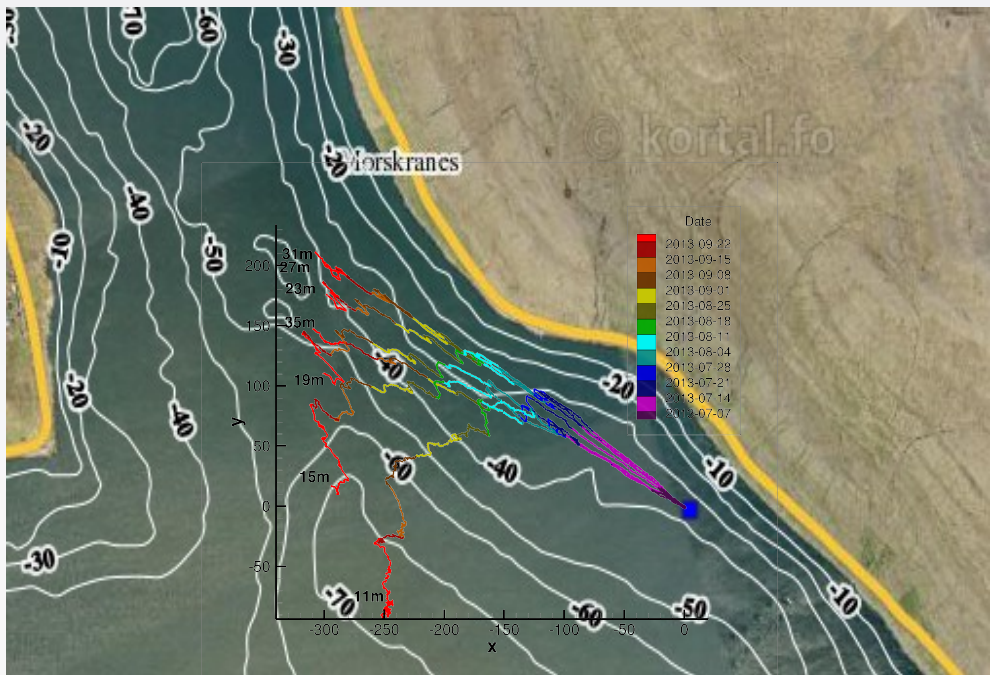

ASAF (og aðrar) verkætlanir.

Svínáir: Meðal N-S rák.

Kolbanagjógv

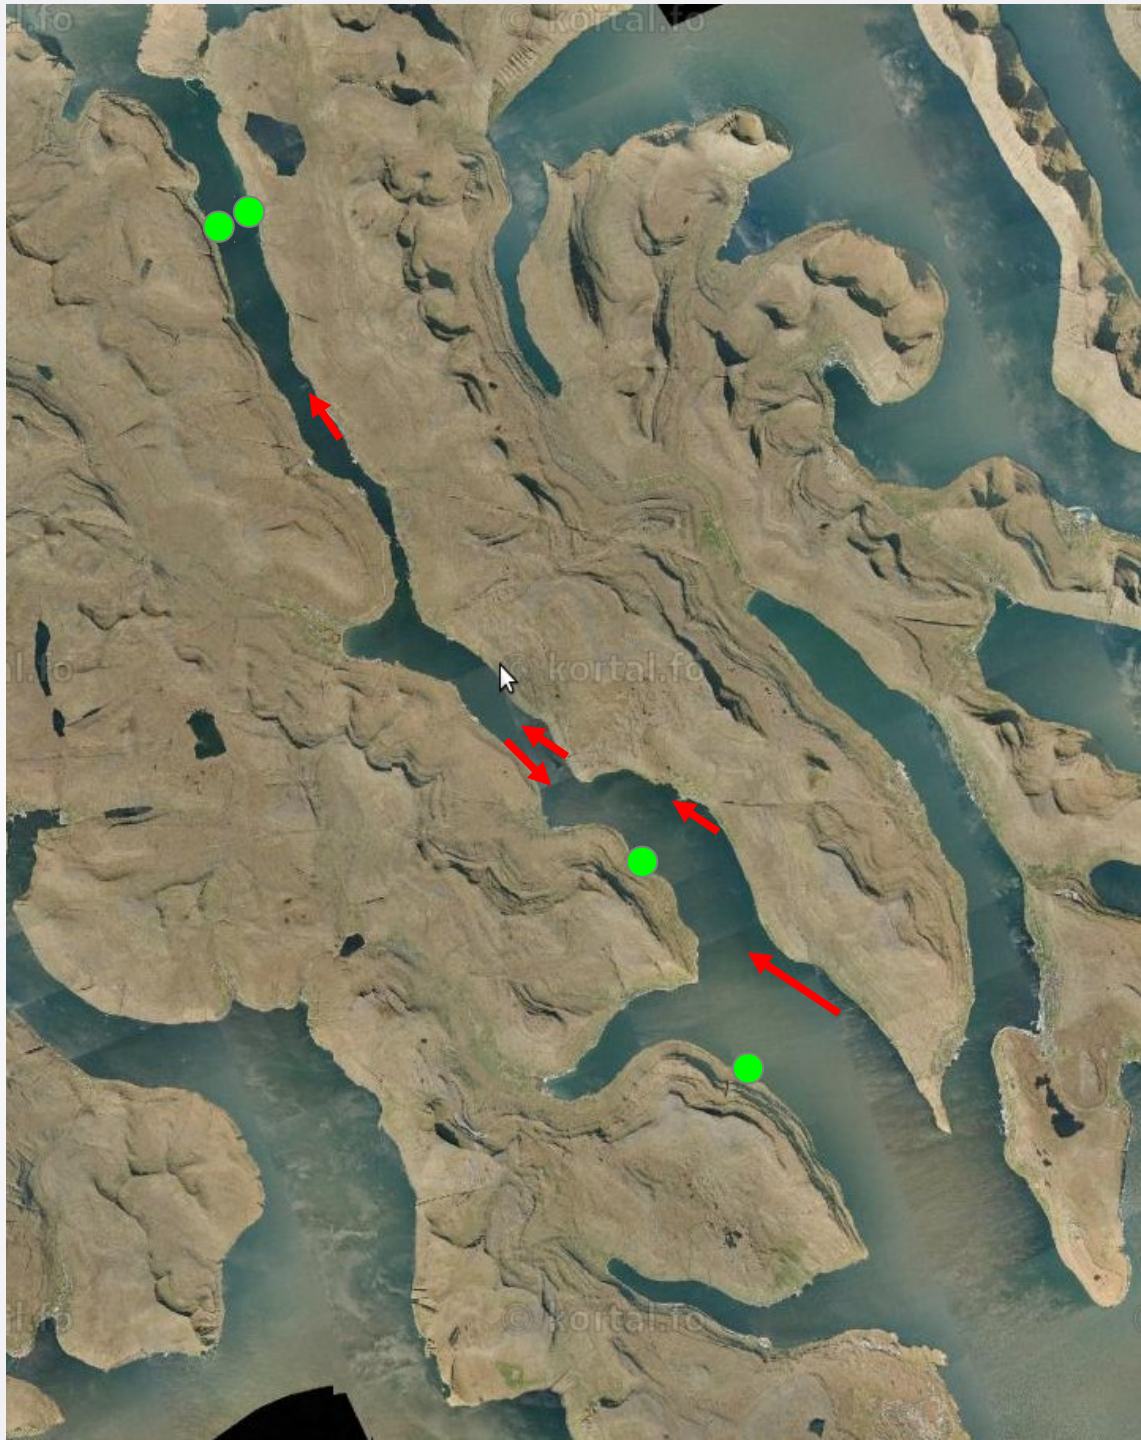

Hövuðsrák í miðum sjógvi

Men hvussu er sambandið
ímillum hesi støðini?

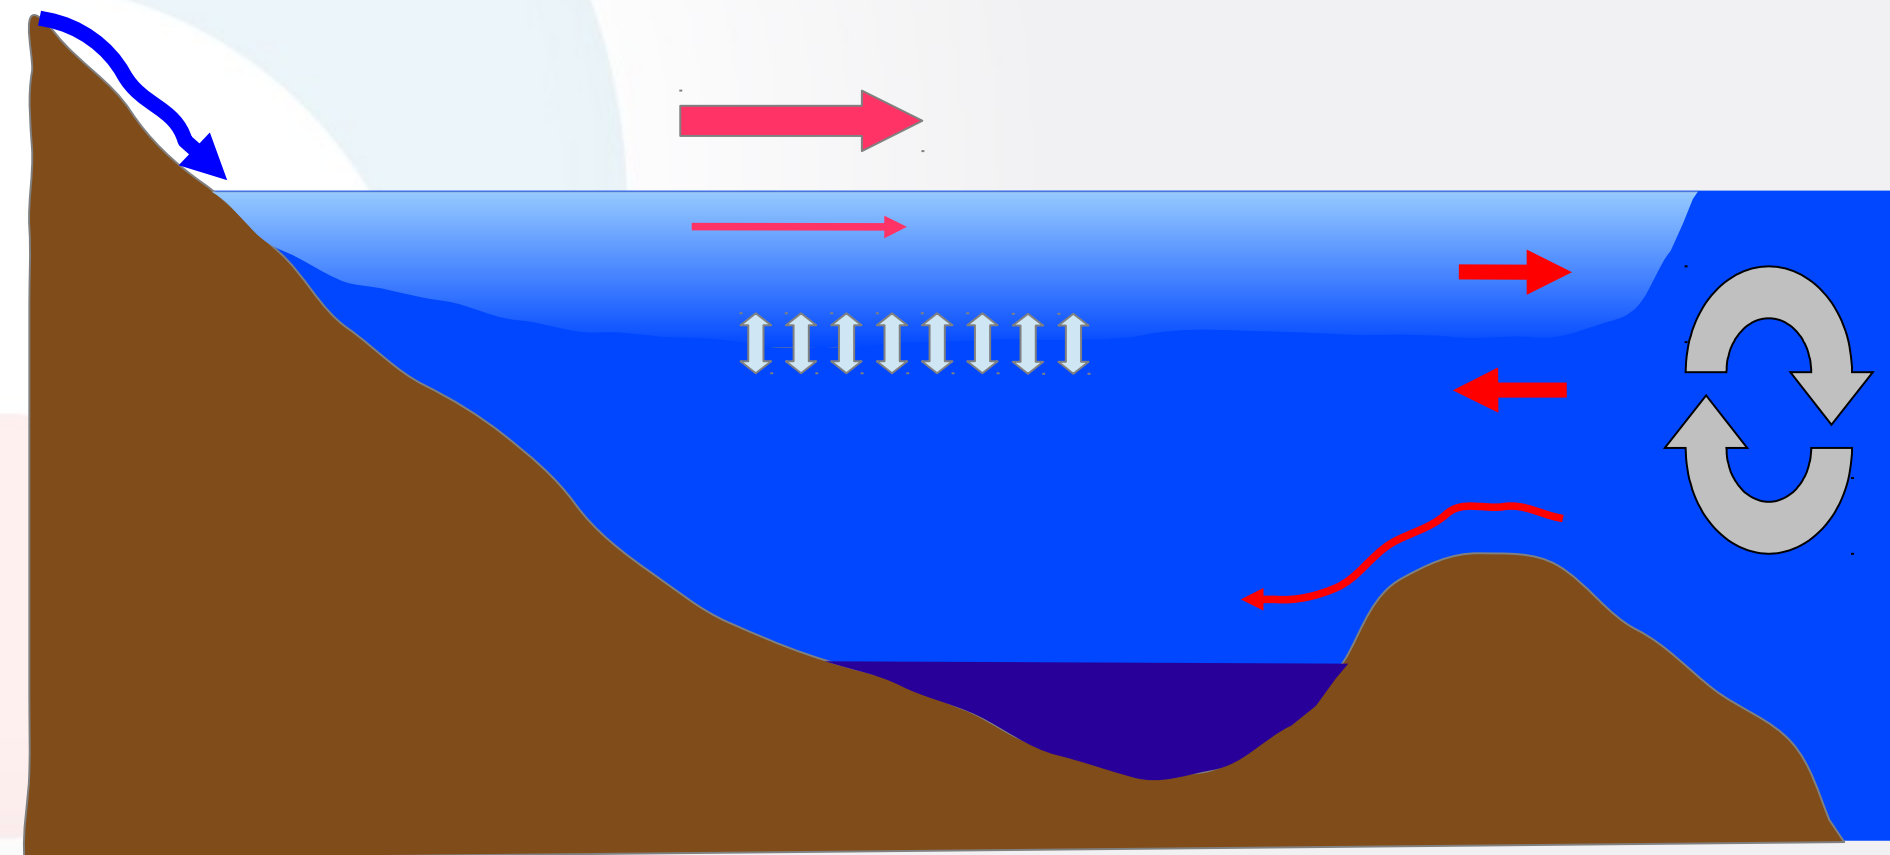

Rekur mest norður við
Eysturoyarlandinum og suður
við Streymoyarlandinum?

Eru fleiri meldrar?

- ← Miðalrák á miðum dýpi
- Mátingar eru gjørdar,
men ikki viðgjørdar enn.

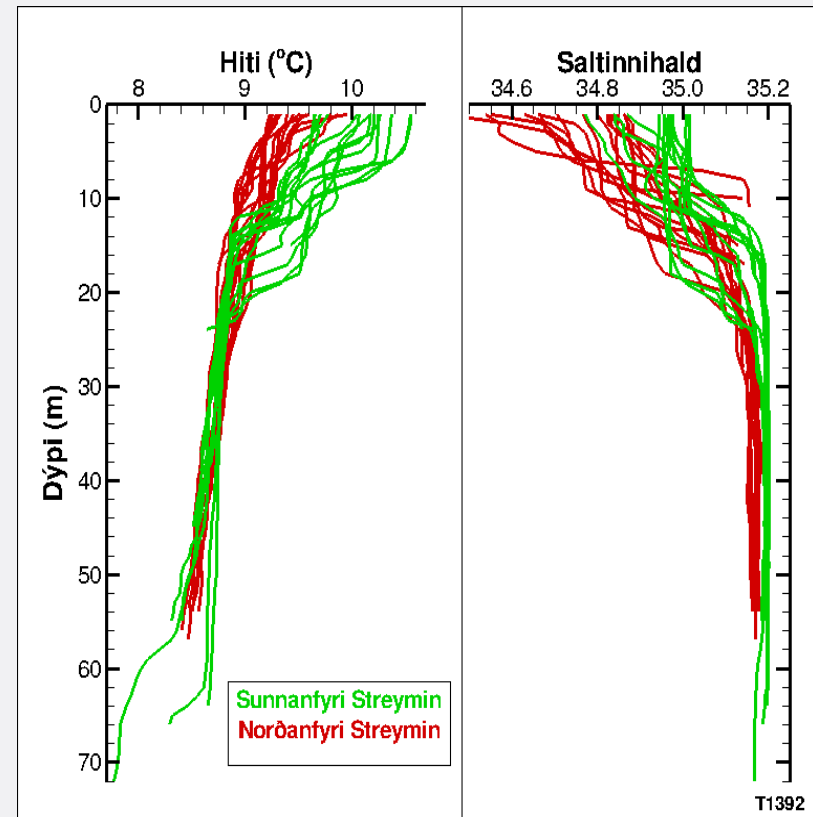

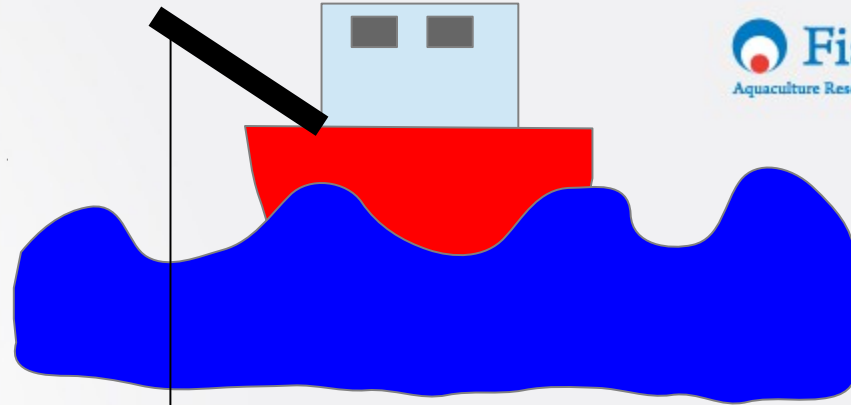

Fjarðarák — hvussu við lærubókini?

Broyting í ferskvatns avrenningini

Orskað útbyggjan av vatnorkuverkinum

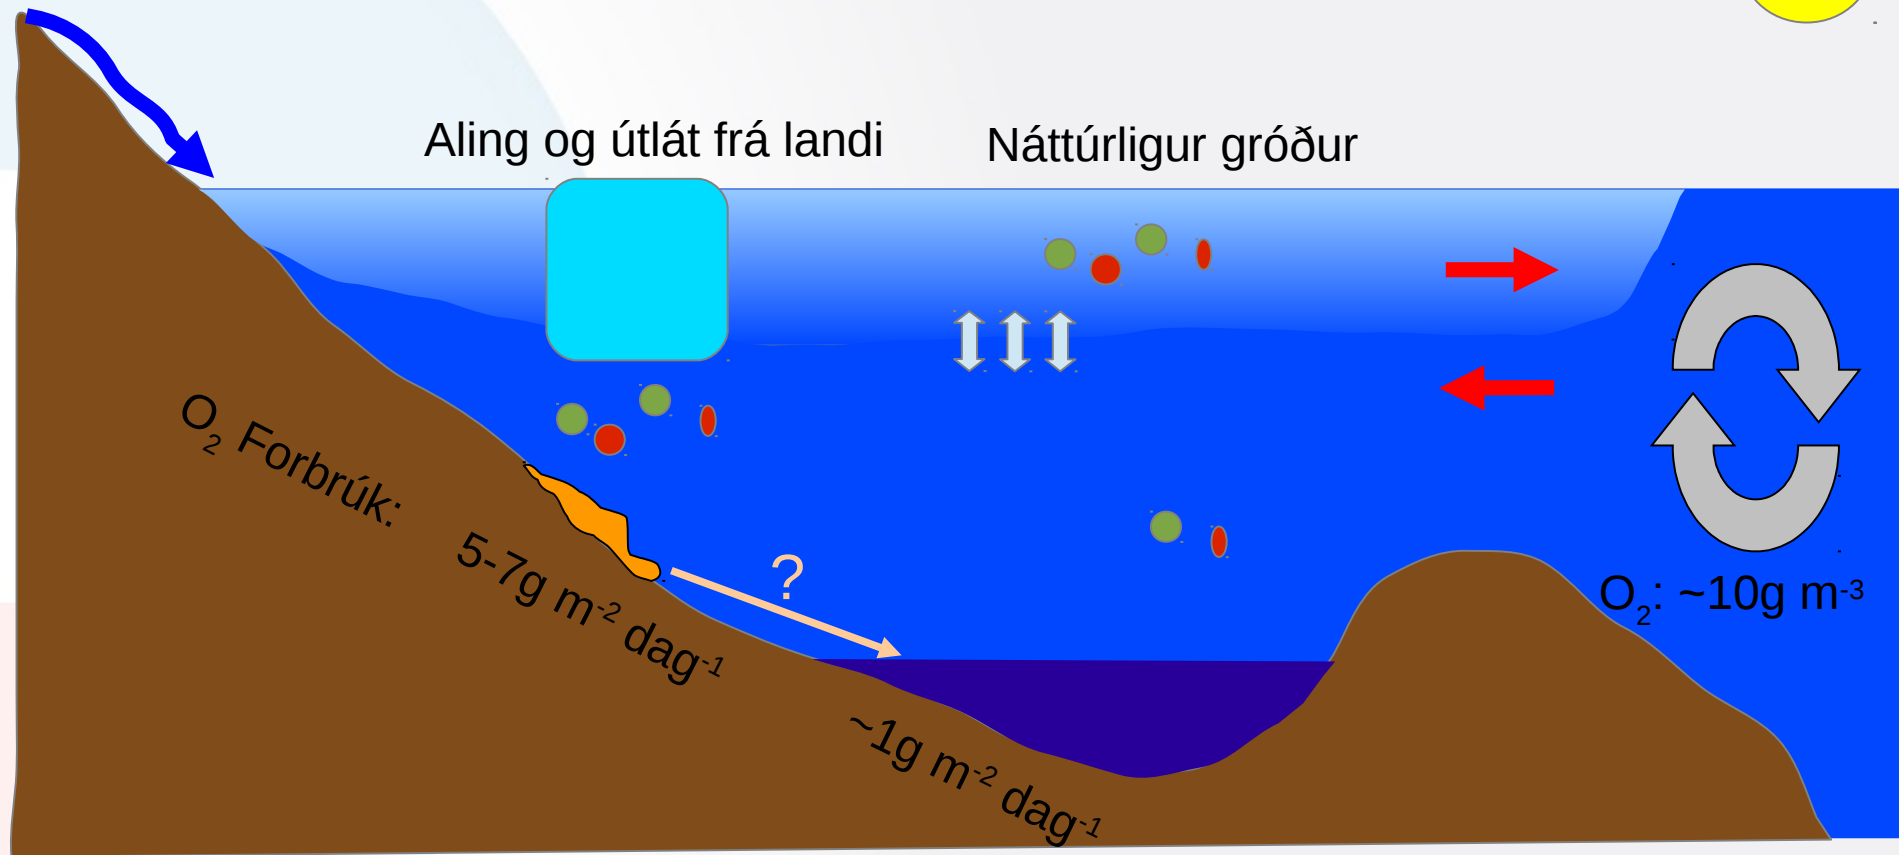

Ávirkan á

- Rákið?
- Lagdeilingina?
- Djóralív?
- Alingina?
- ... etc. ?

Vit fáa at síggja!

Nøkur O₂ tøl

Nøkur vegleiðandi O₂-markvirðir:

6 g m⁻³

1-2 g m⁻³

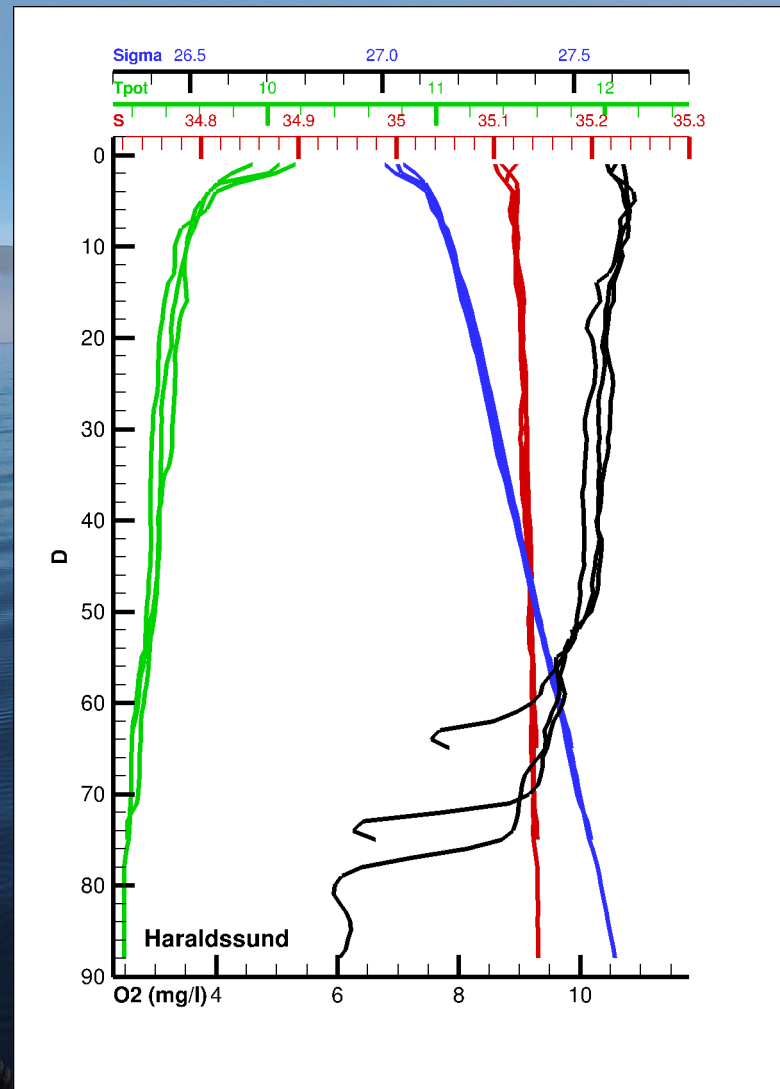

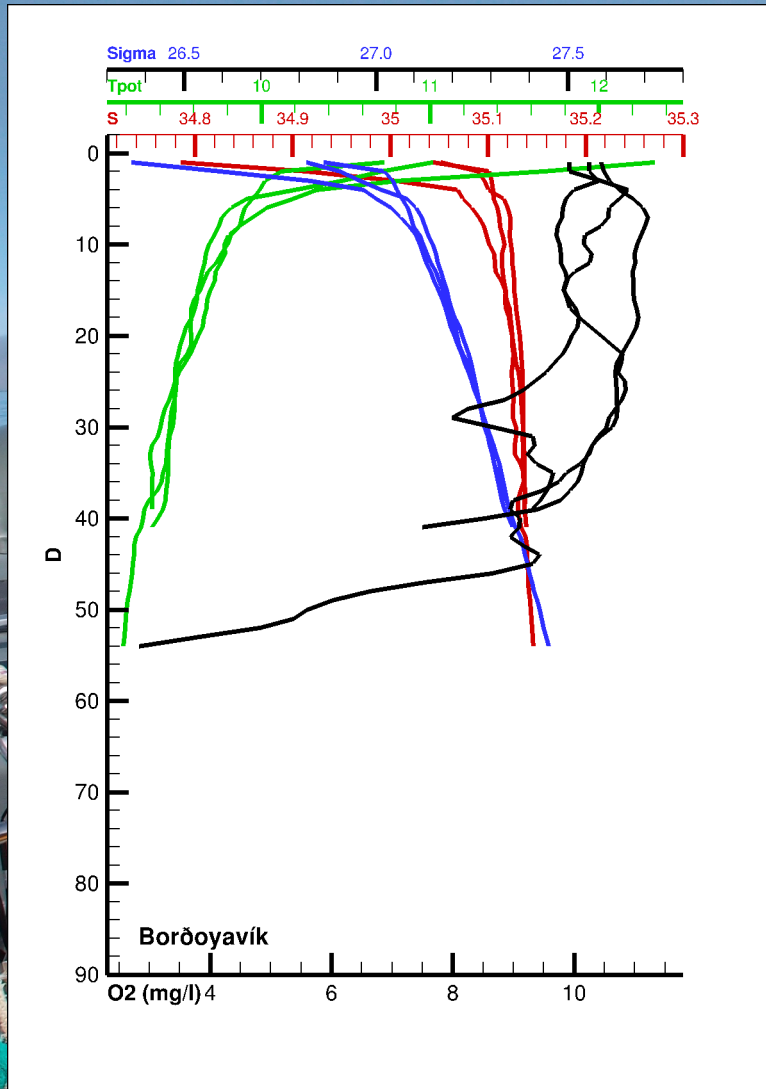

0.01-0.5 g m⁻³

Laksur byrjar at mistrívast

Skeljadjór fara frá goymistaði

Meira enn helvtin doyir

Mátingar í Norðoyggjunum í summar

Samandráttur

- Nærum alt virksemi í Føroyum hevur okkurt tilknýti til firðirnar
- Umstøðurnar í firðunum ávirkast av náttúrligum og av manna ávum
- Okkara vitan um firðirnar er avmarkað
- Mátiverkætlanir verða framdar, men granskingin er avmarkað

Mátivirksemi er eitt samstarv millum
