

# Um gosfjallið sum nýligani er funnið á Vágoynni

Uni Árting, Morten S. Riishuus, Hans Amundsen,  
Turid Madsen, Nicole Schmitz

JARÐFEINGI  
Faroese Geological Survey

FRÓÐSKAPARSETUR  
FØROYA

# Toymið

# Innihald

## Føroya Jarðfrøði – í stuttum

- Hvannahagafylkið

## Jarðfrøðin í Sørvágsfirði

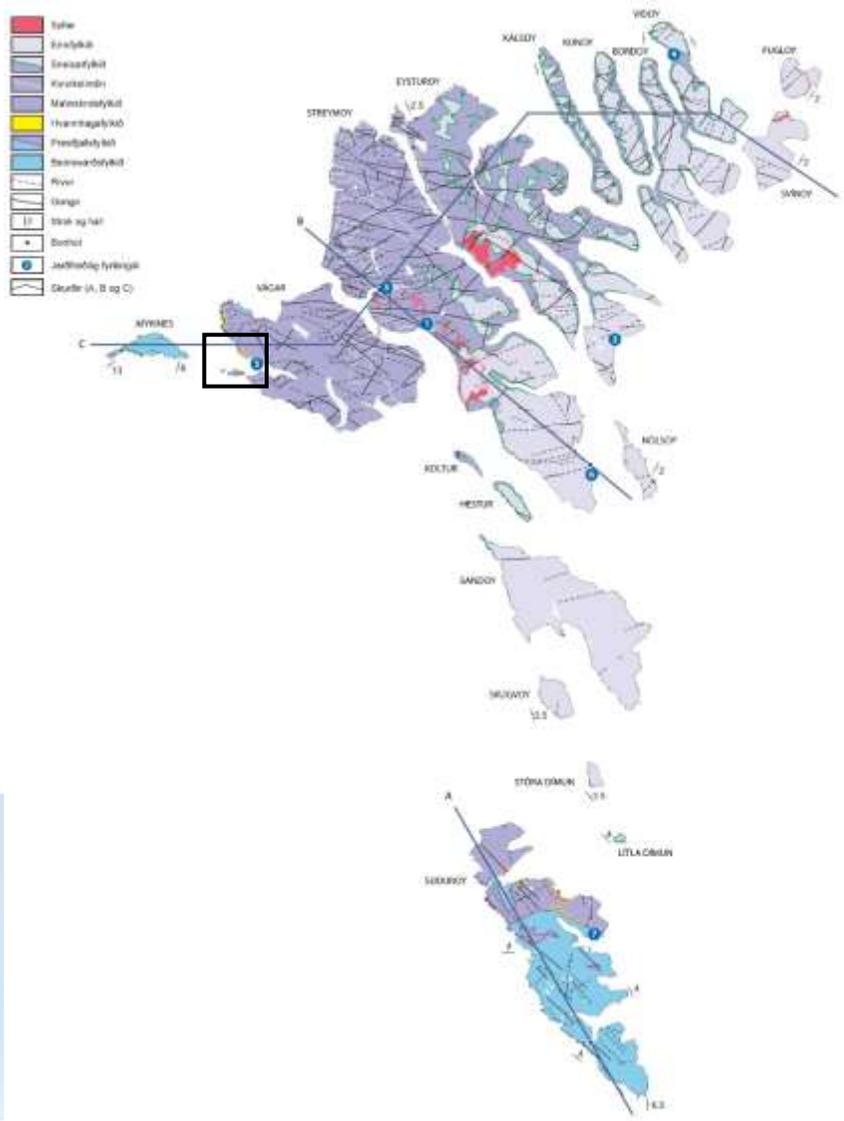

### Nýggj úrslit

- Fyrireikingar
- Feltarbeiði
- Grótsløg (Lithologies)
- Lagskipan (Stratigrafi)
- Jarðfrøðiligt modell

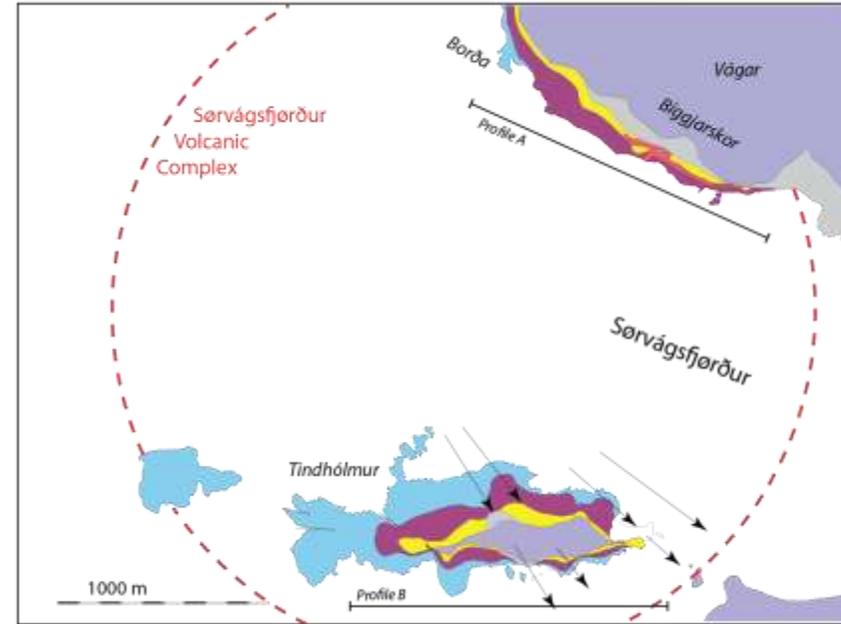

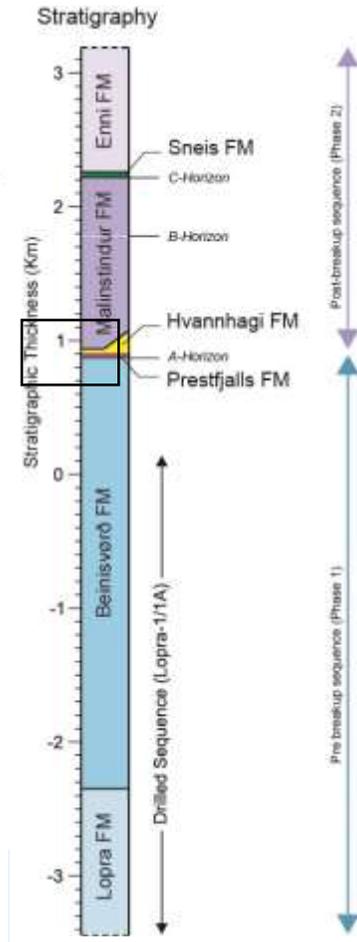

# Føroya Jarðfrøði

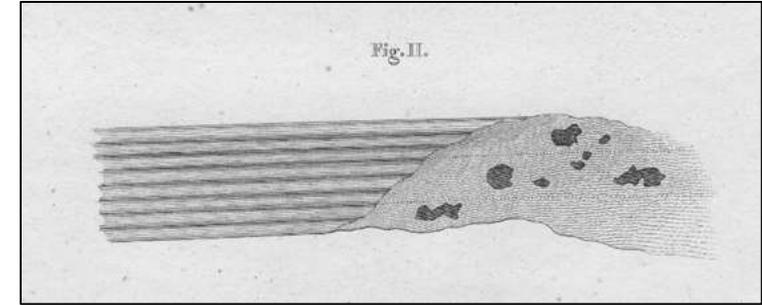

# Jarðfrøðin í Sørvágsfirði

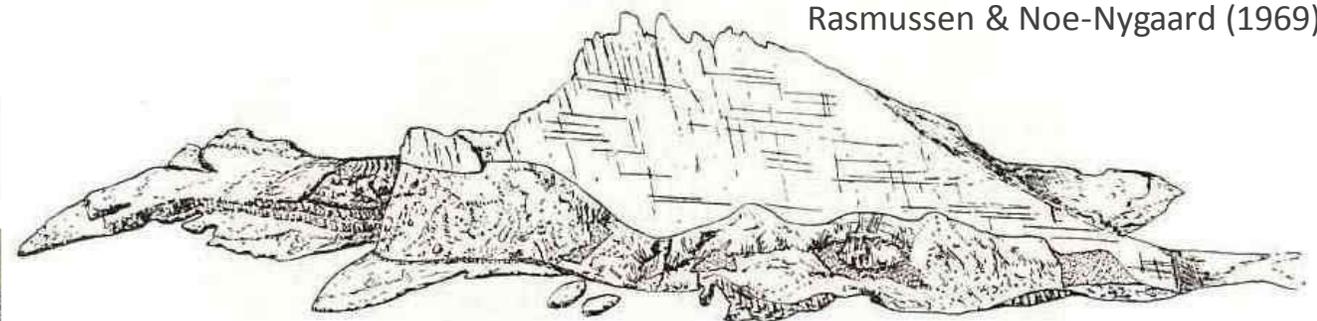

# Hvannhagafylkið (Gosmyrjan)

- Fyrstu eygleiðingarnar av hesum parti av jarðfrøðini
  - Forchammer (1824), Geikie (1880), Helland (1880), Bøggild (1922) and Walker and Davidsson (1936)
- Rasmussen and Noe-Nygaard (1969) – **Tuff-agglomerate Zone**
  - Explosive volcanism following the deposition of the Coal bearing Formation (Prestfjall Fm), irregular thickness and heavily intruded. Lapilli products, volcanic bombs and lithic fragments.
  - **Bíggjarskor** - Intruded and dislocated sections of agglomerate and coal-bearing section. Photo + sketch
  - **Tindhólmur** - Intruded and dislocated sections of agglomerate and coal-bearing section. *Photo + sketch*

Forchammer (1824)

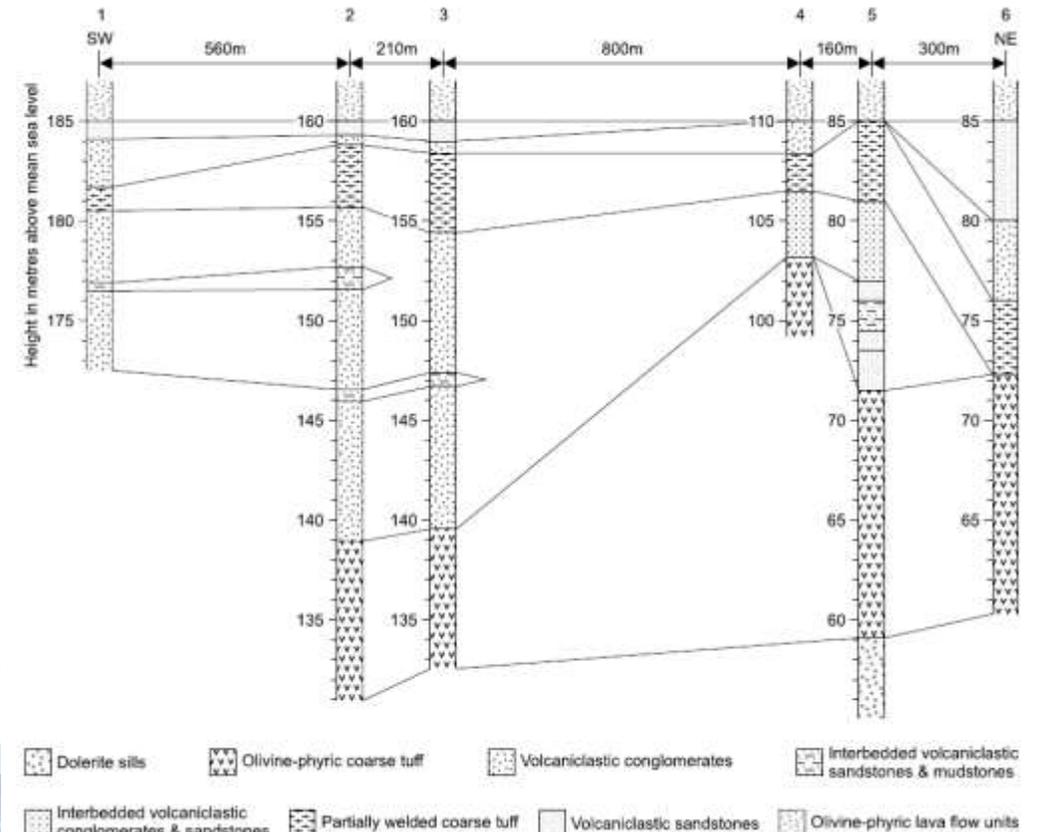

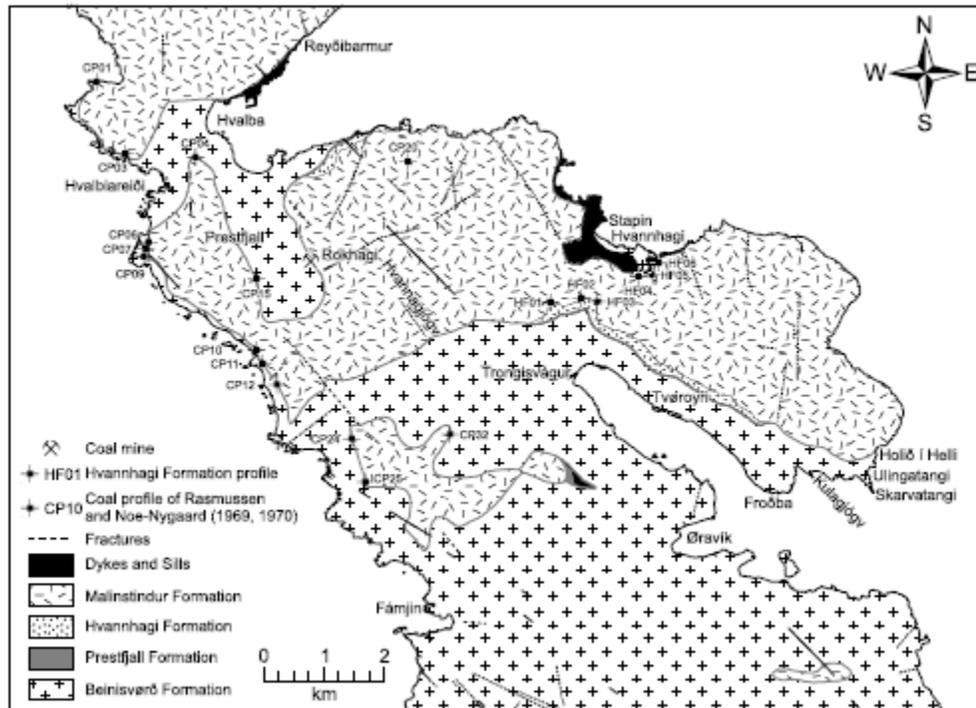

Rasmussen & Noe-Nygaard (1969)

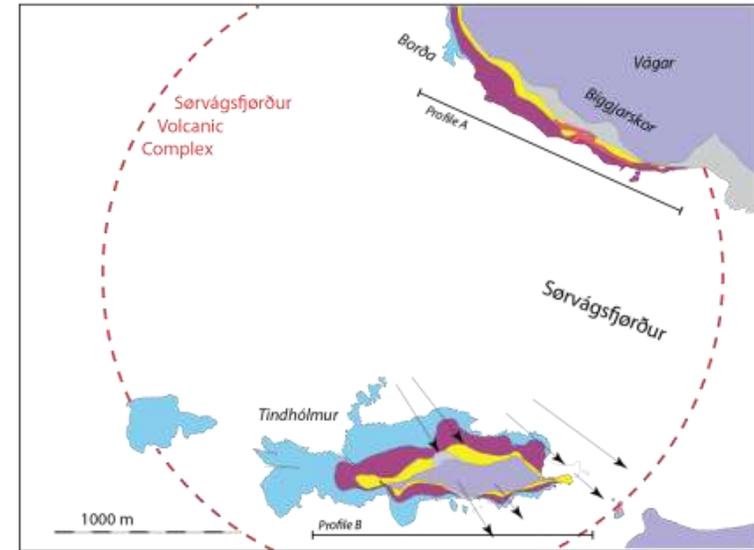

# Hvannhagafylkið / Gosmyrjan

- Passey and Jolley (2009) - Hvannhagi Formation
  - Distinct lithologic difference from flow lobes in Malinstindur Fm. Pyroclastic and sedimentary units (fig), tuffs and volcanoclastic sediments.

- Detailed logs from Hvannhagi

# Jarðfrøðin í Sørvágsfirði

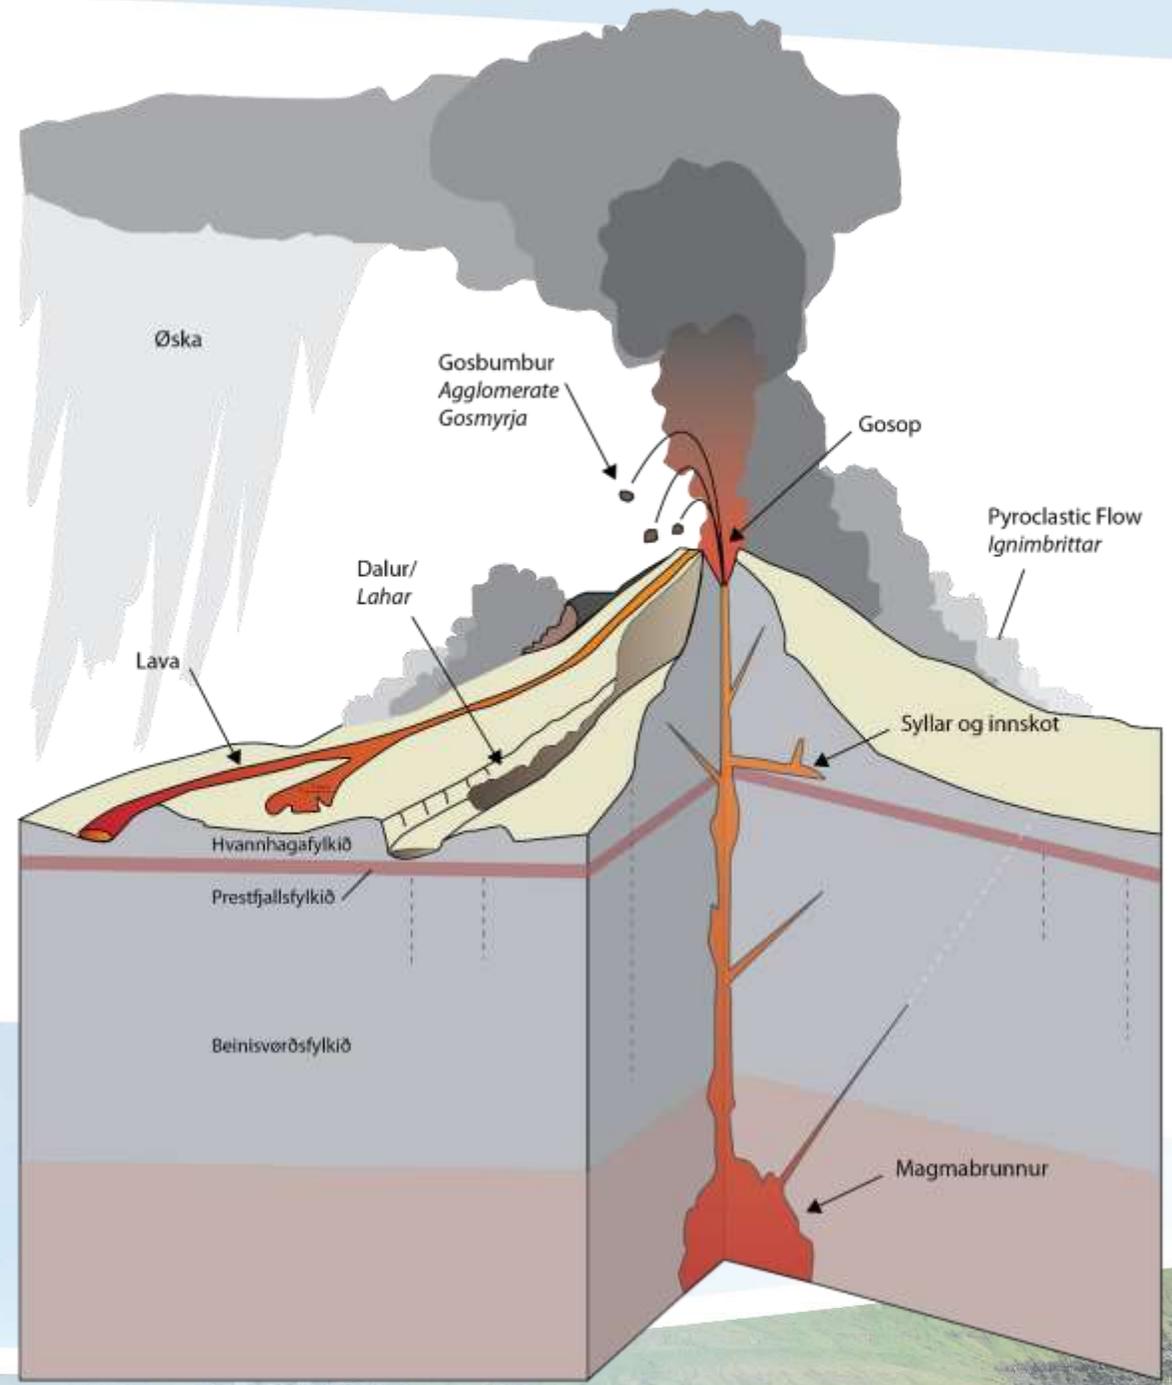

**LEGEND**

- Sills and intrusions
- Enni FM
- Sneis FM
- Kvivík bed
- Malinstindur FM
- Hvannahagi FM
- Prestfjall FM
- Beinivørð FM
- Fractures
- Dykes
- Stroke og dip
- Well Site
- Volcanic Complex

*Sørvágsfjørður*

# Hvussu eru gosfjöll uppbyggd?

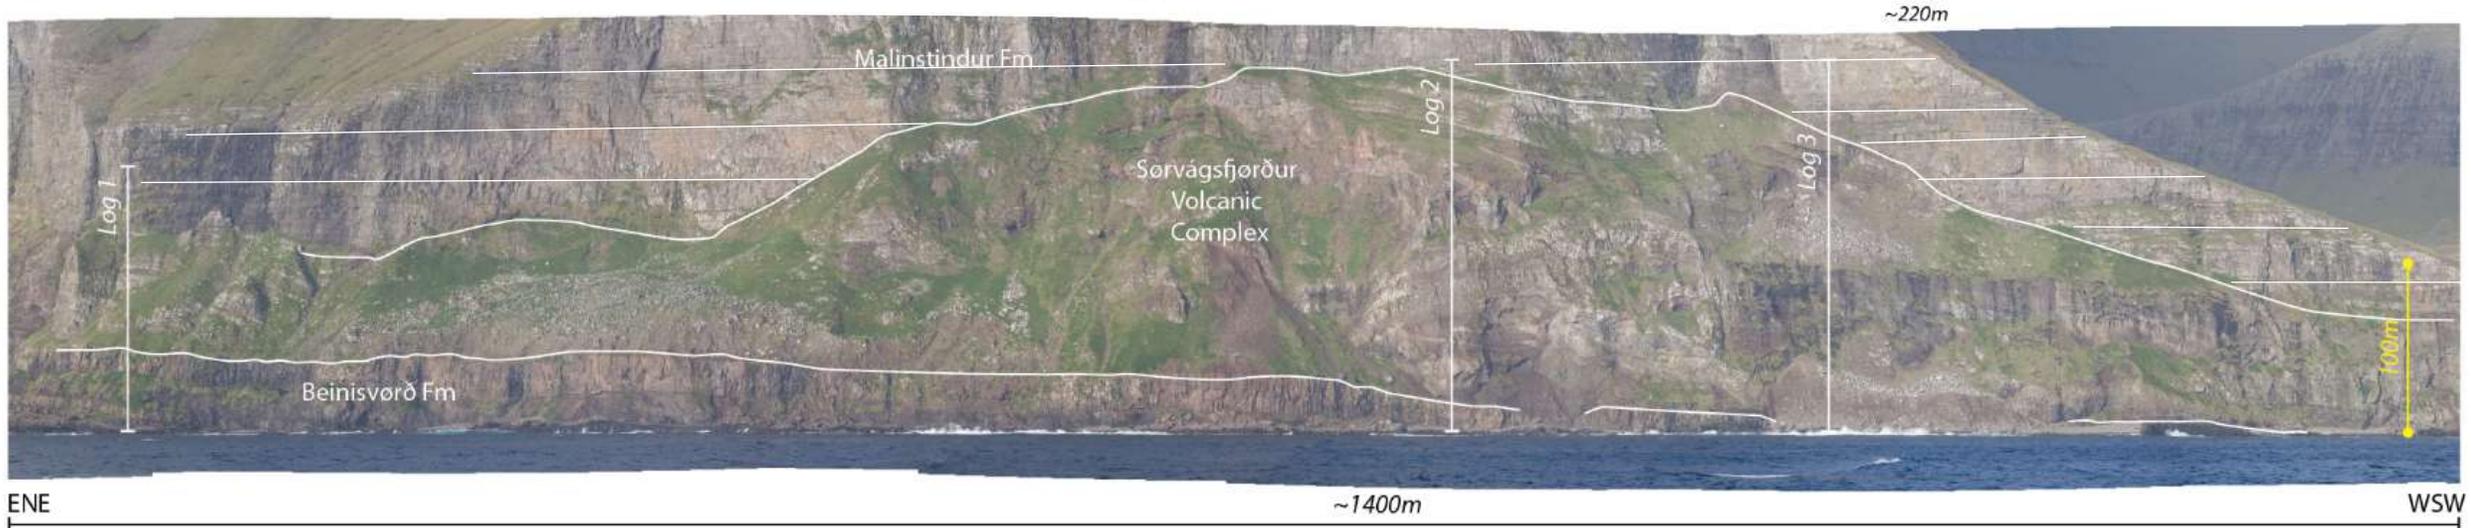

# Fyrirreikingar til arbeiði í Bíggsjarskor

# Bíggjarskor og Tindhólmur – tvørskurðir og loggar

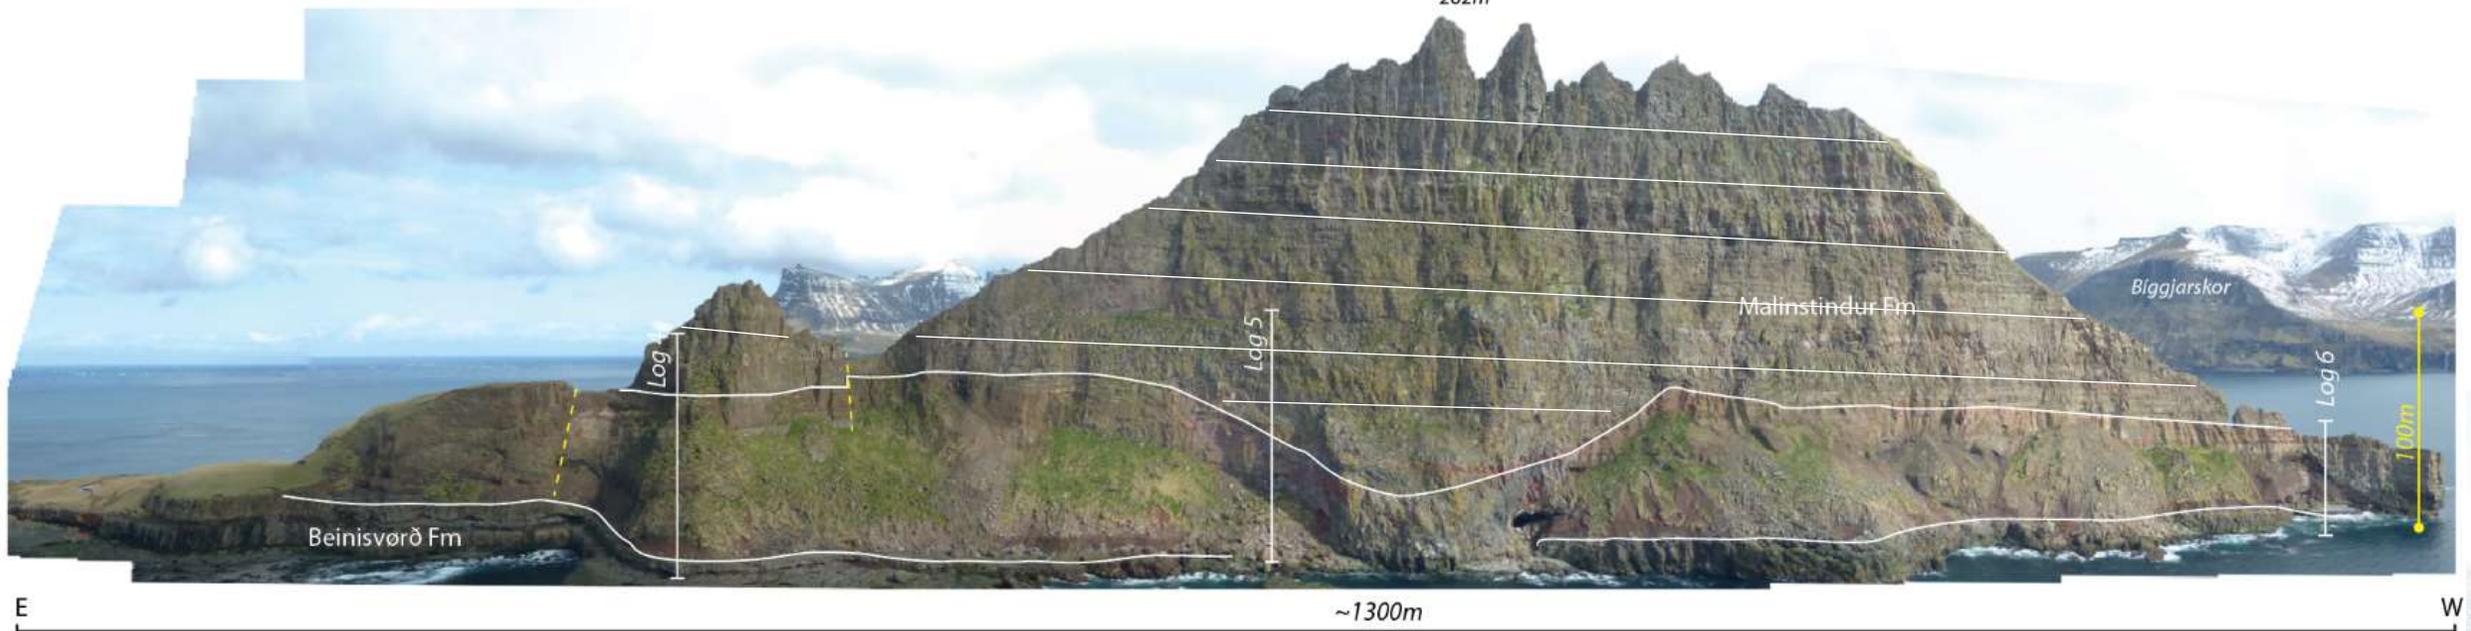

A)

Bíggjarskor Profile

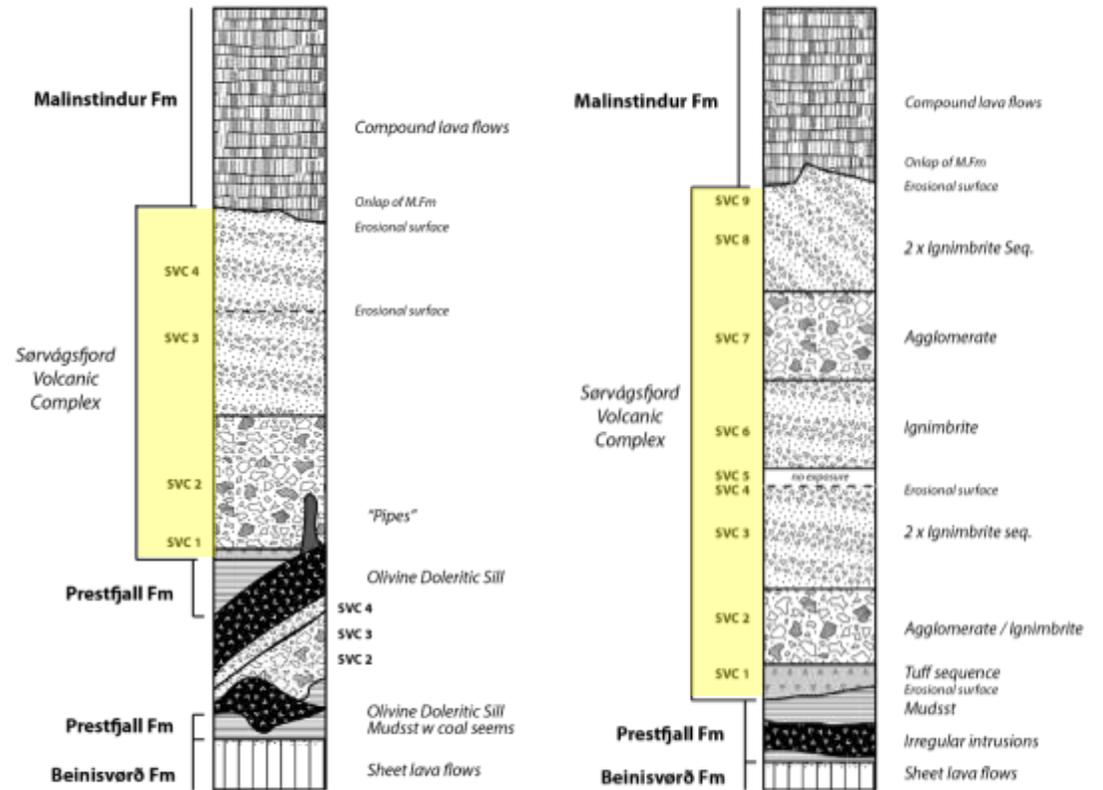

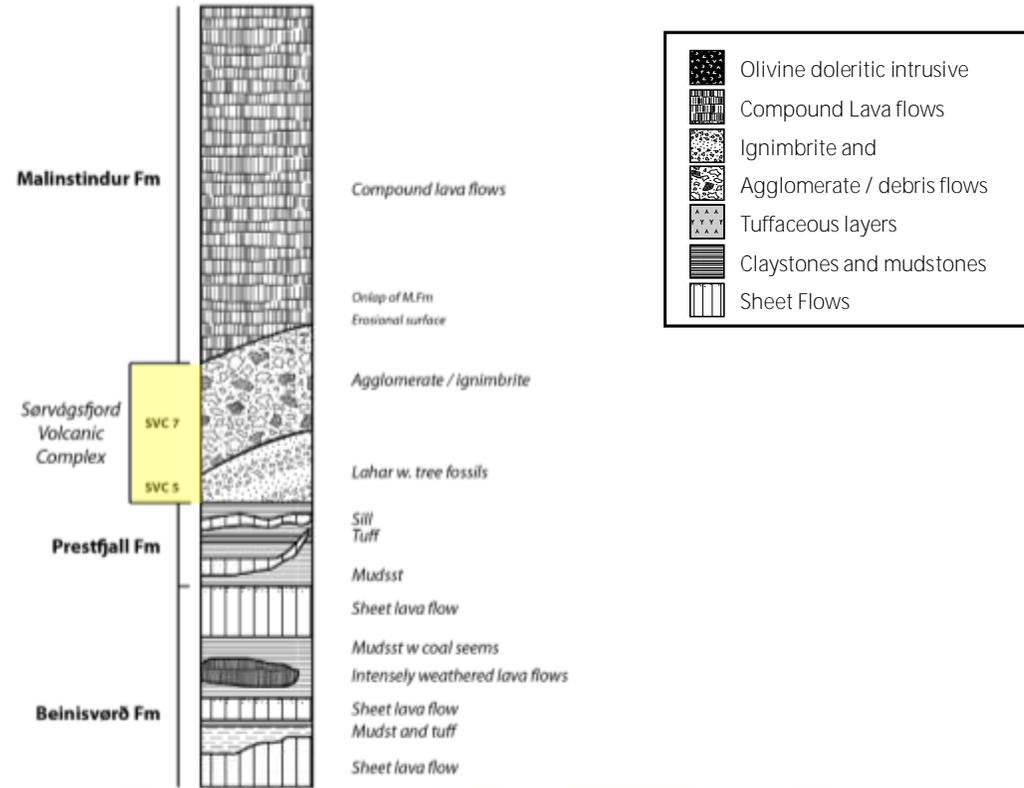

B)

Tindhólmur Profile

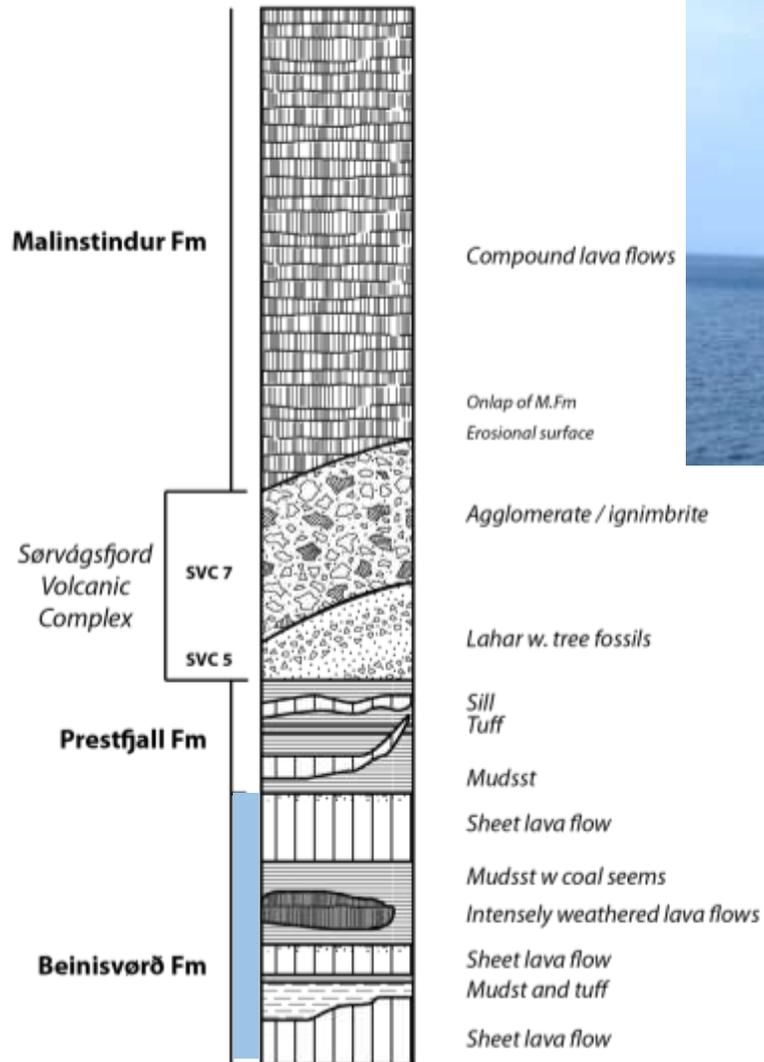

# Bíggjarskor – lagskipan og grótsløg

# Grótsløg og fláabygnaður: Beinivørðsfylkið

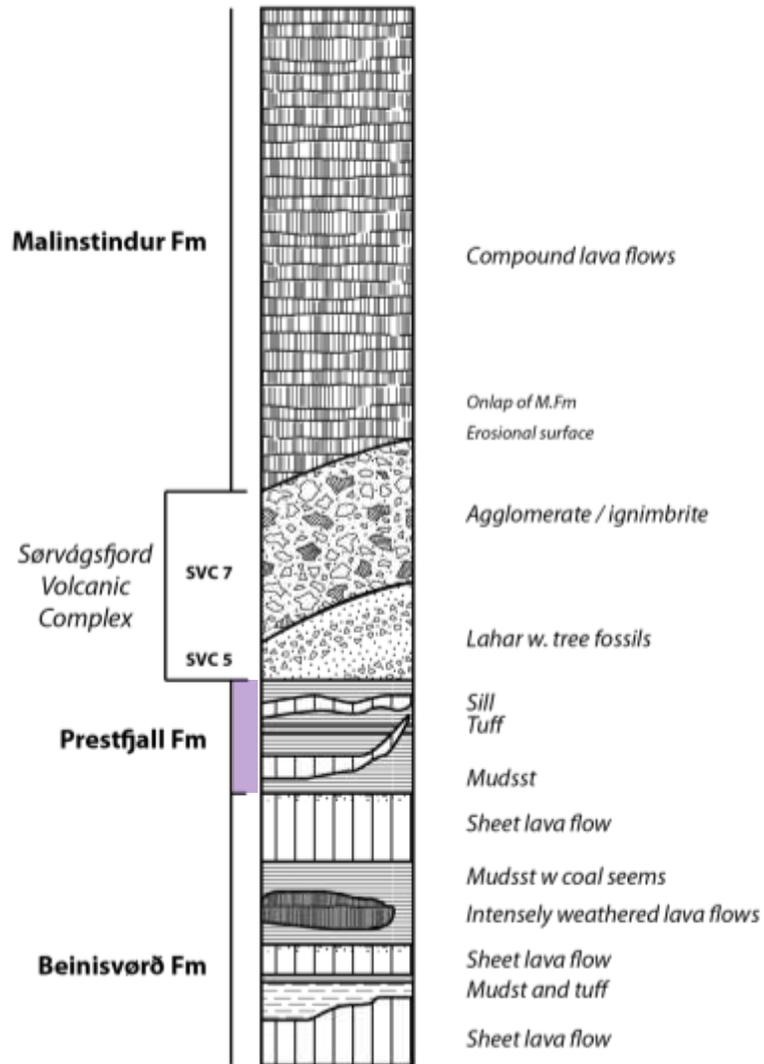

Bíggjarskor West Flank

	Olivine doleritic intrusive
	Compound Lava flows (M.Fm)
	Ignimbrite and Agglomerate / debris flows
	Tuffaceous layers
	Claystones and mudstones
	Sheet Flows (B.Fm)

# Grótsløg og fláabygnaður : Prestfjallsfylkið – Legugrýti, leirgrýti við øsku-/tuffløgum

Bíggjarskor West Flank

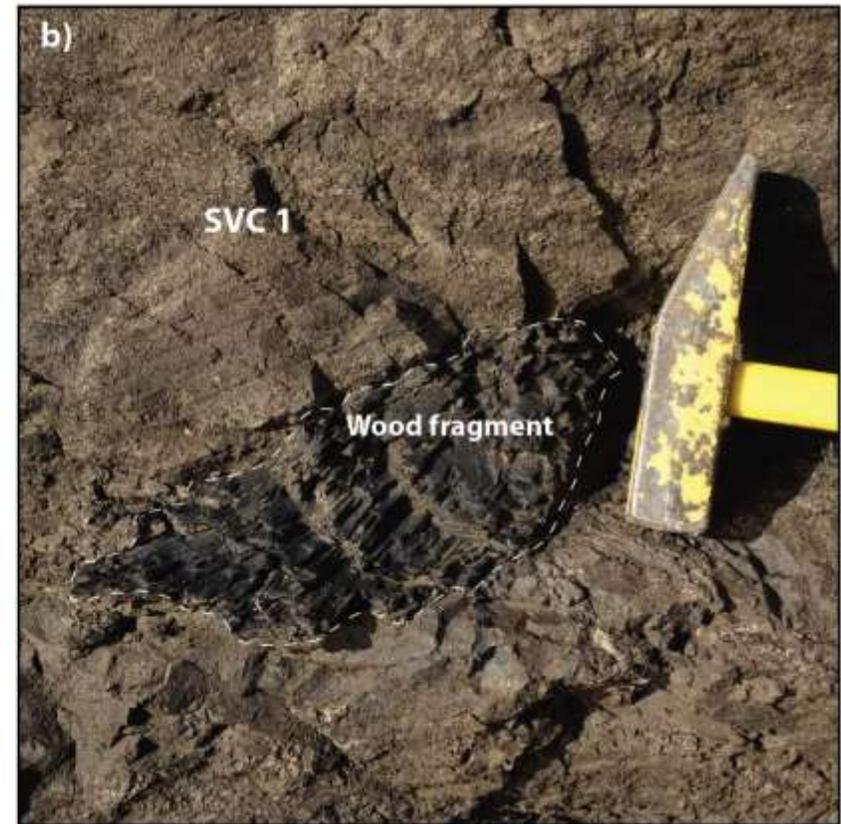

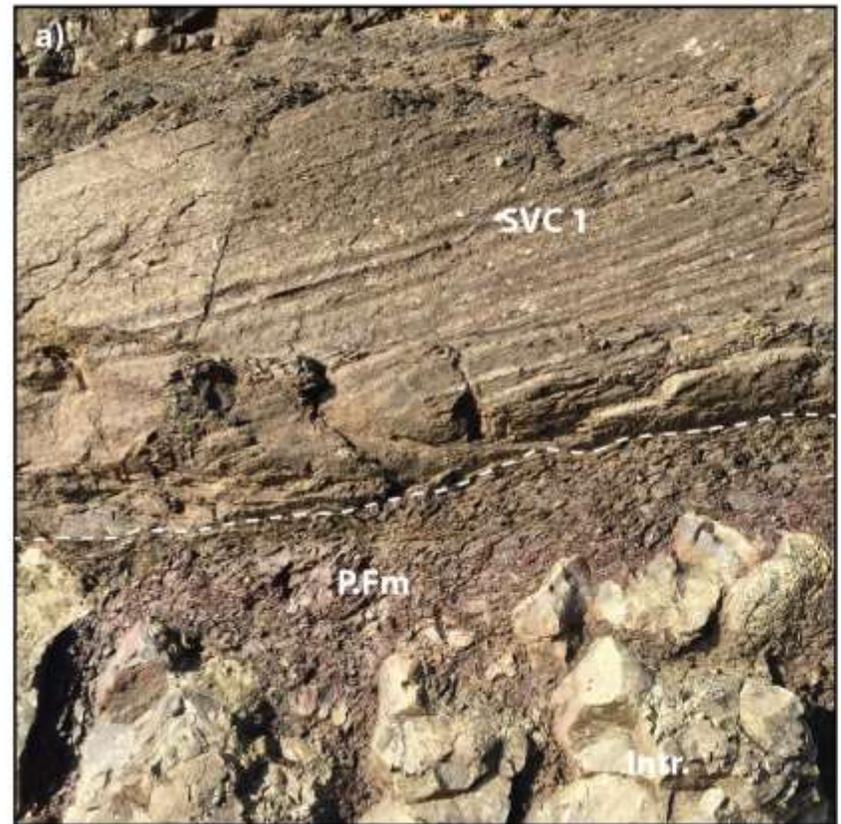

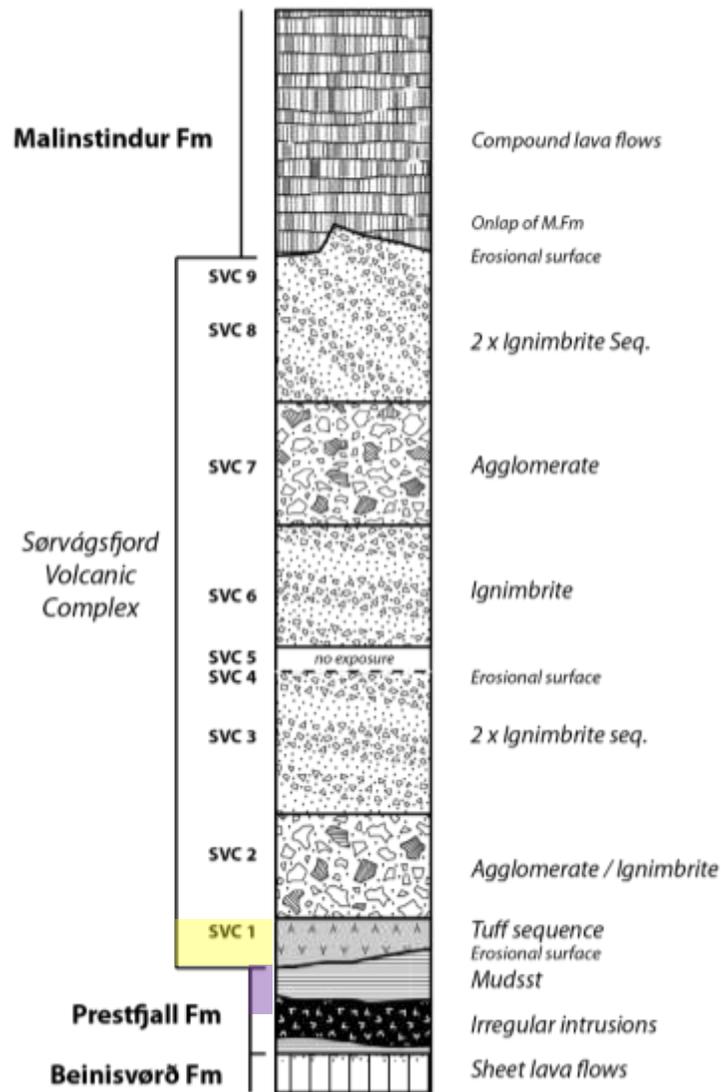

Bíggjarskor W

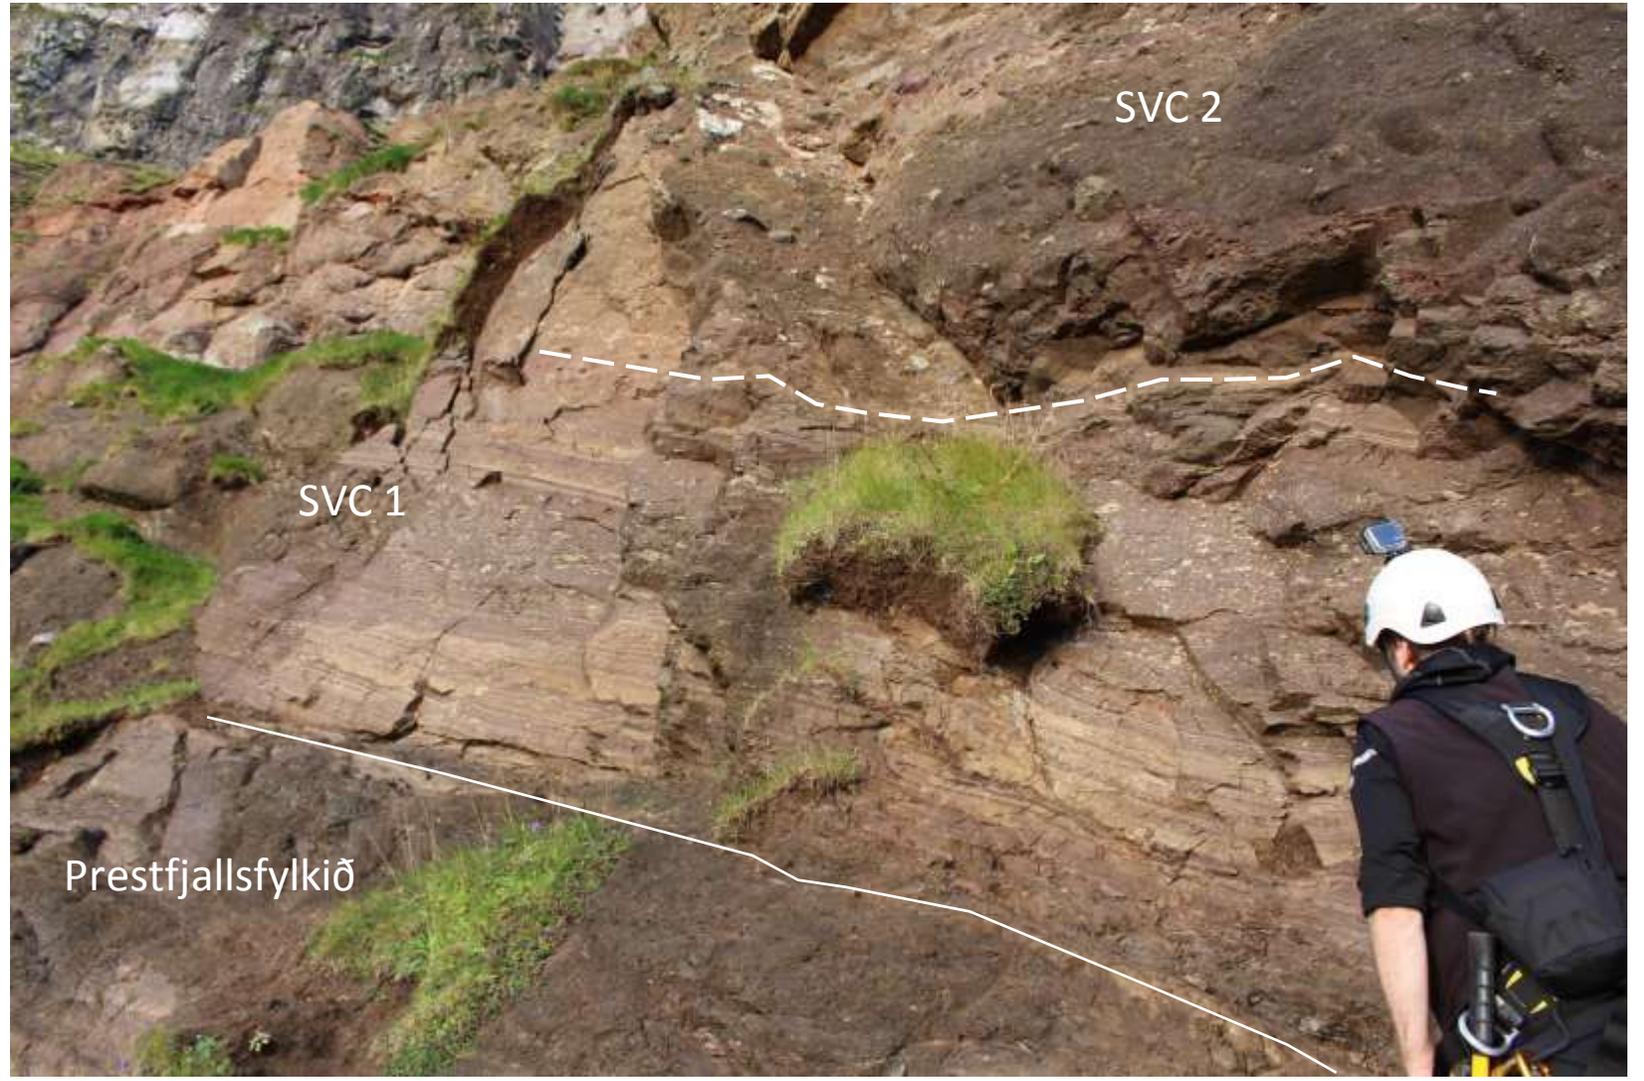

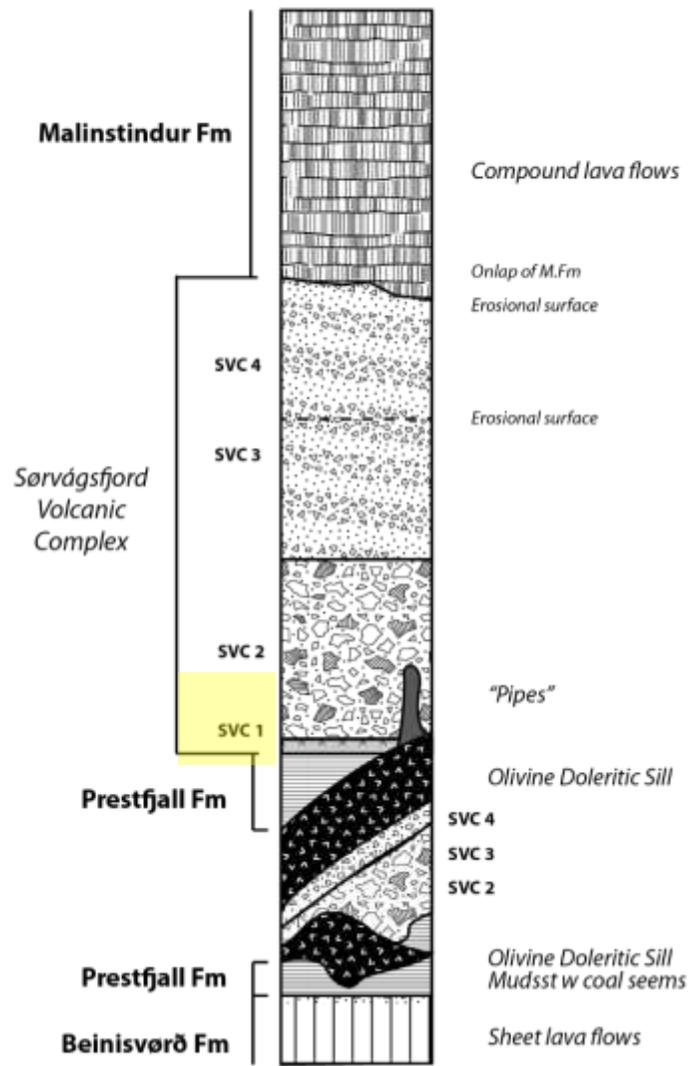

# Grótsløg og fláabygnaður : SVC 1 – Gos-legugrýti og øskuløg, steinrenningar

Main Biggjarskor Profile

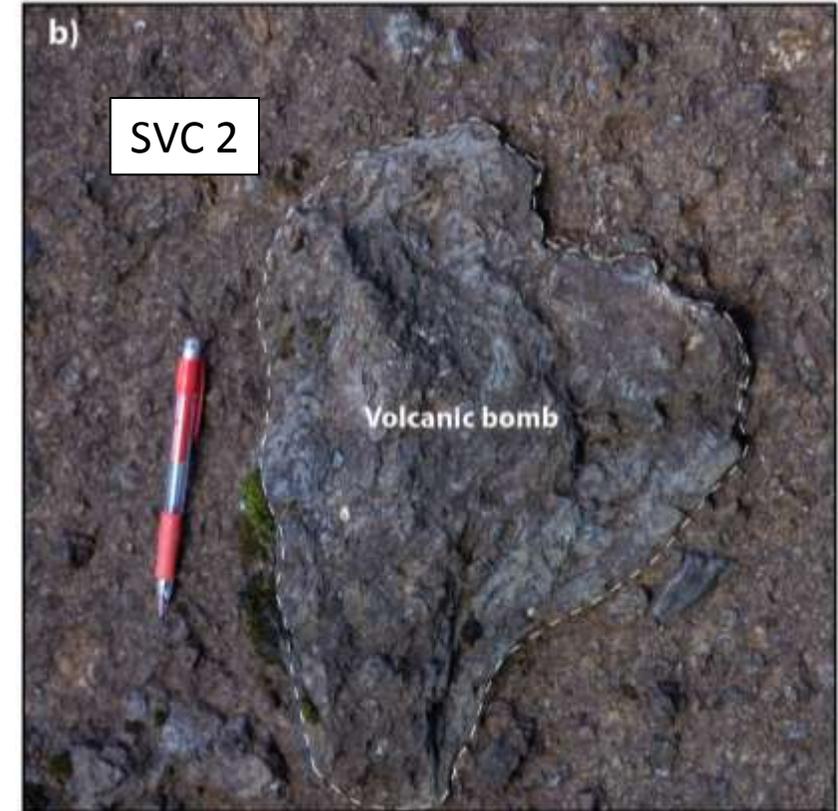

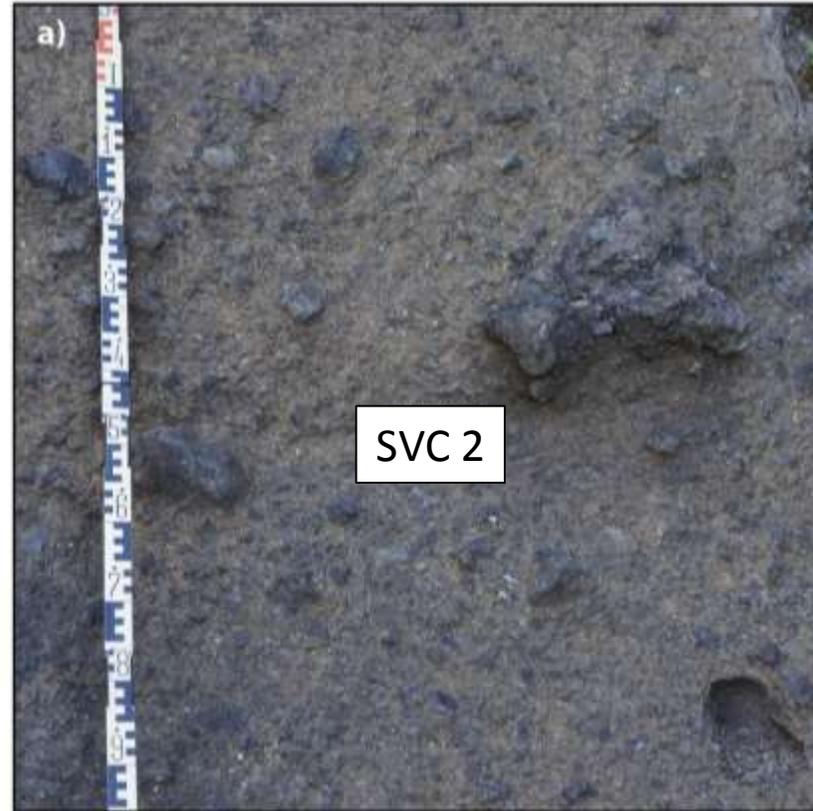

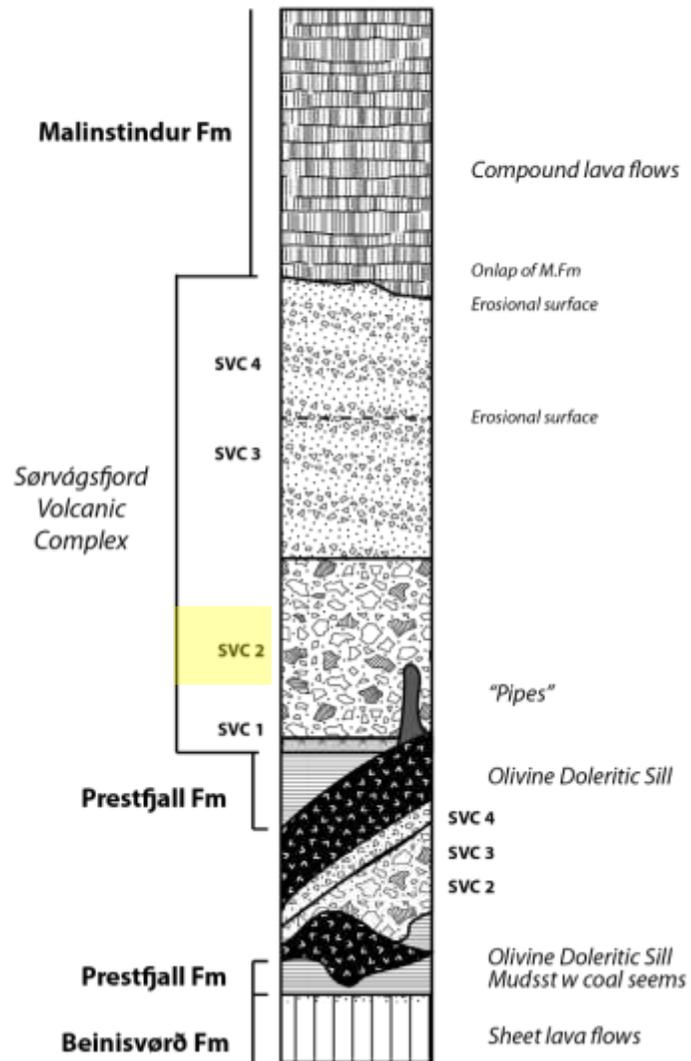

# Grótsløg og fláabygnaður : SVC 1-2) – Skift frá øskuløgum til gosmyrju

Bíggjarskor Central Profile

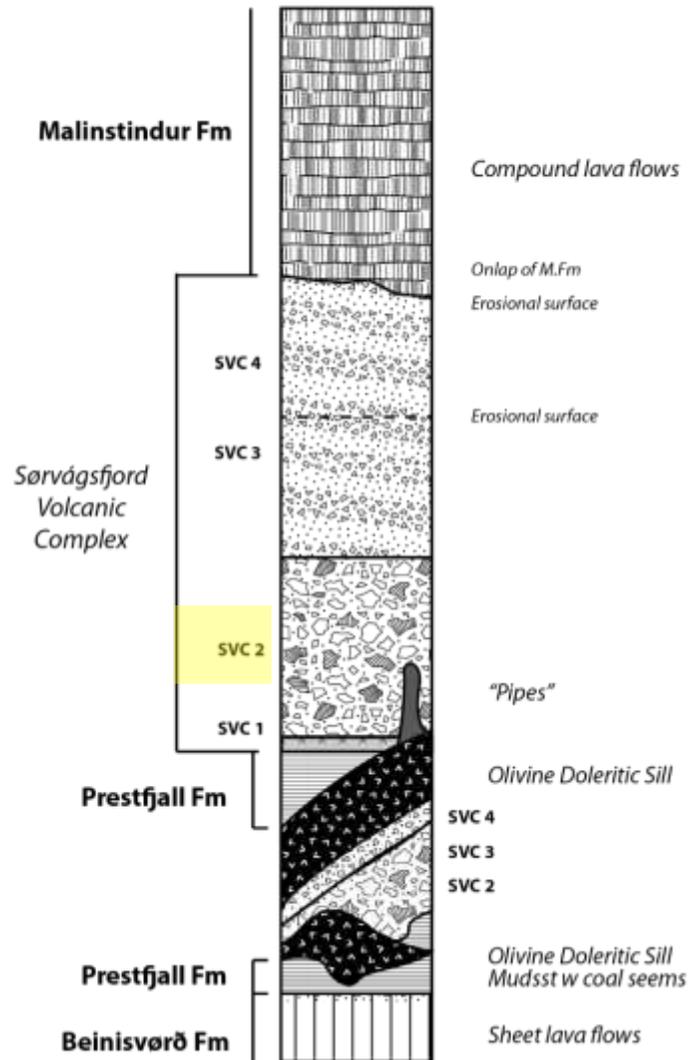

# Grótsløg og fláabygnaður : SVC 2) – Gosmyrja (agglomerate), við gosbumbum. Tætt við gosopið

Bíggjarskor Central Profile

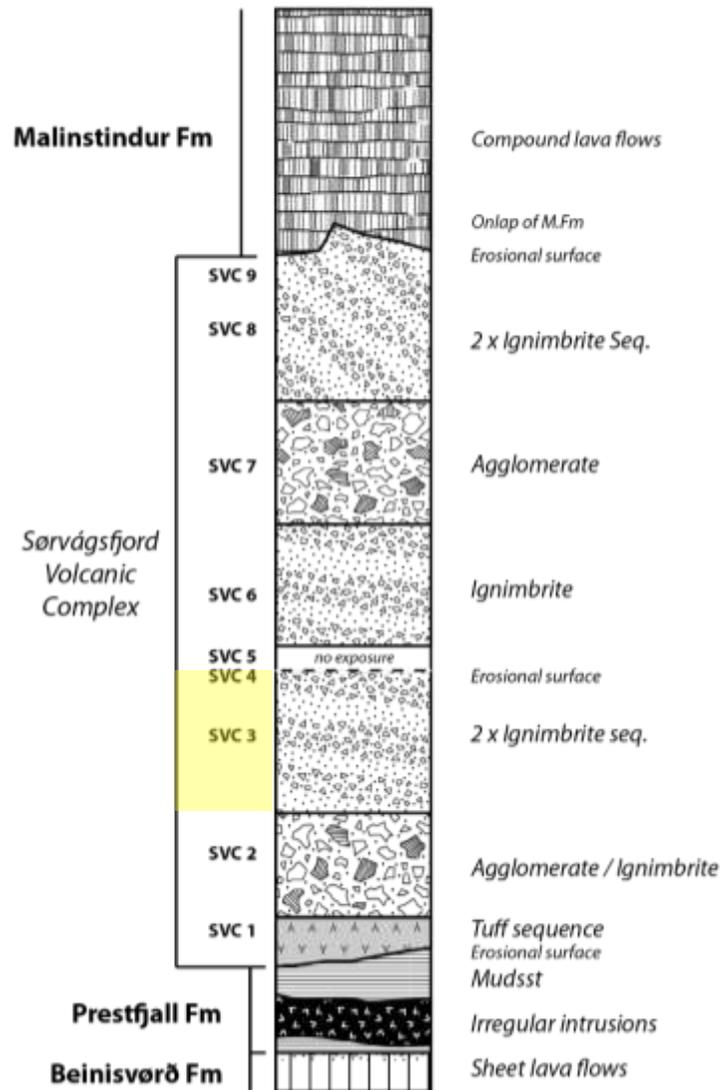

# Grótsløg og fláabygnaður : SVC 2) – Lagdeild gosmyrja, skiftandi gosvirksemi.

Bíggjarskor Central Profile

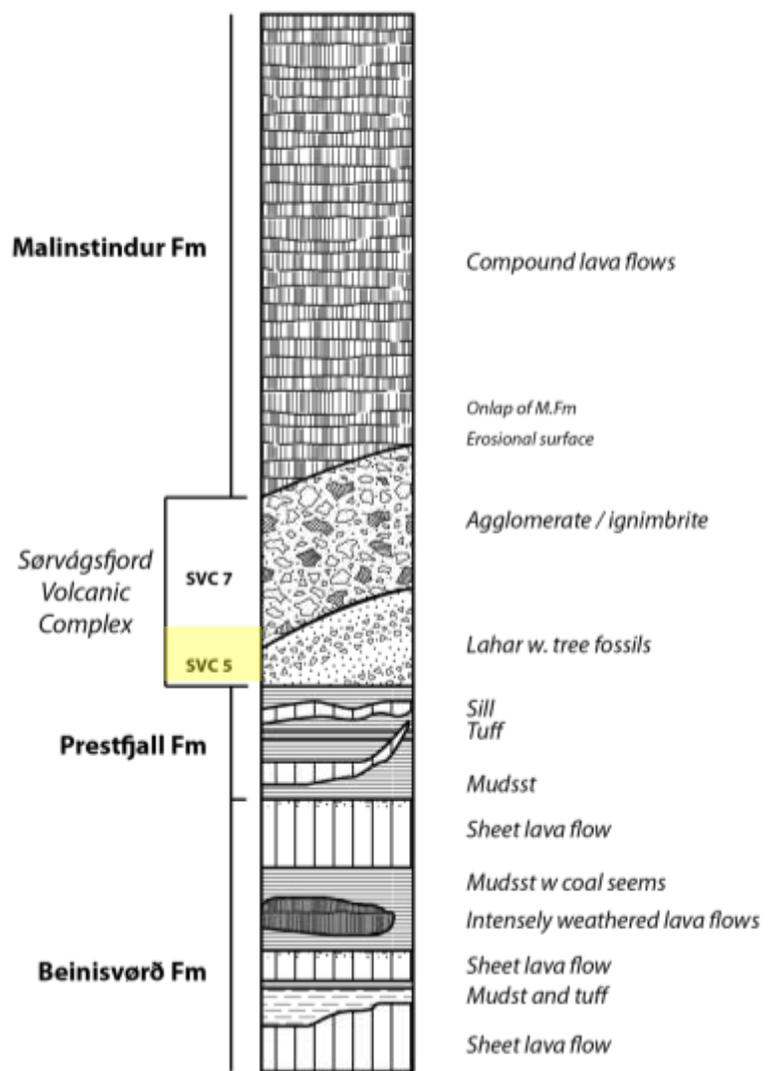

# Grótsløg og fláabygnaður : SVC 4) – Niðurtærd fløta (Bíggjarskor)

Main Bíggjarskor Profile

# Grótsløg og fláabygnaður : SVC 5) – Lahar við steinrunnum viði

Bíggjarskor West Flank

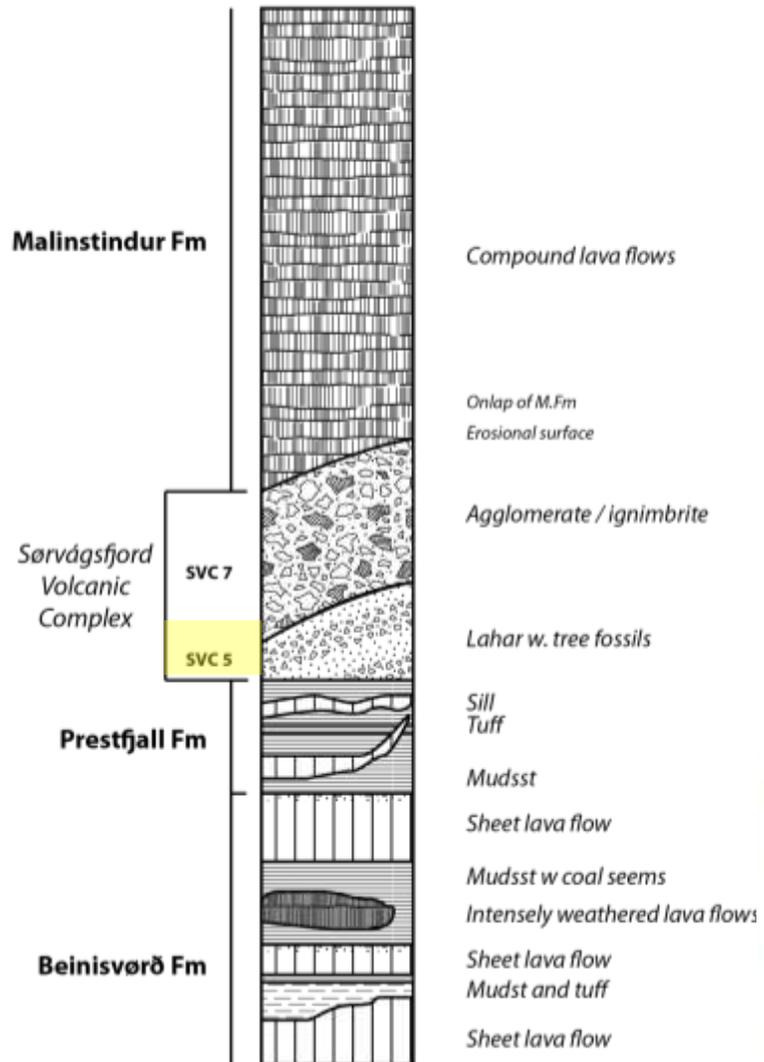

Bíggjarskor W

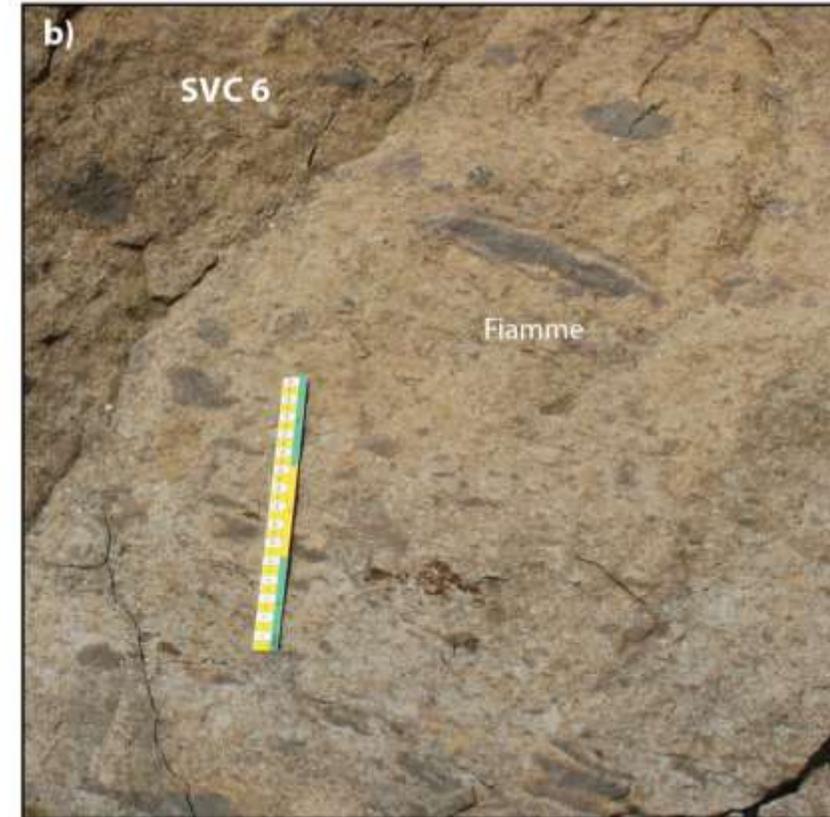

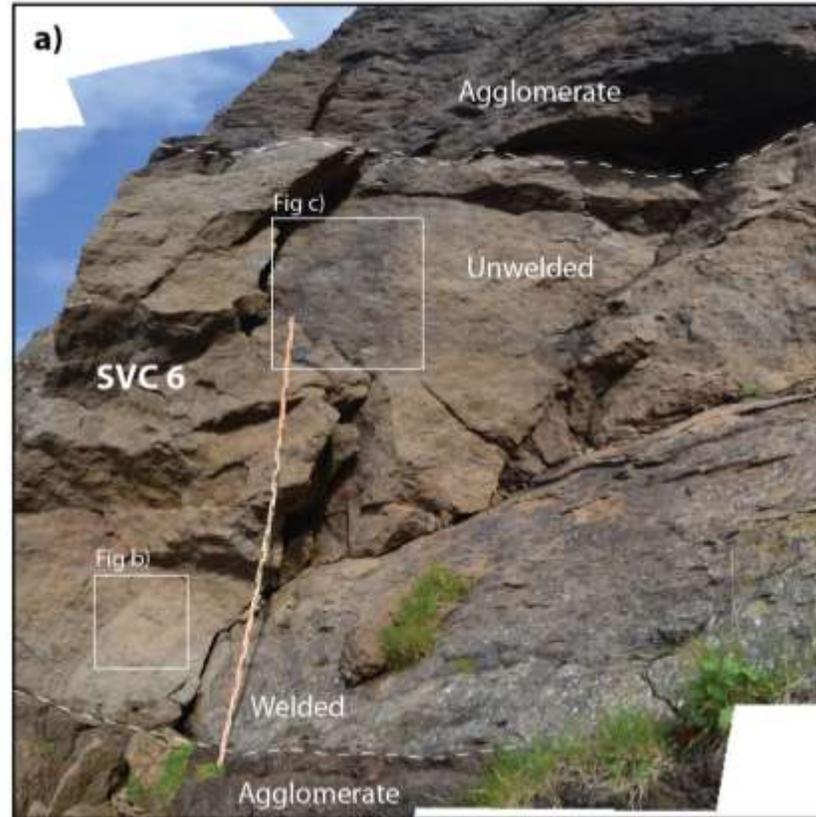

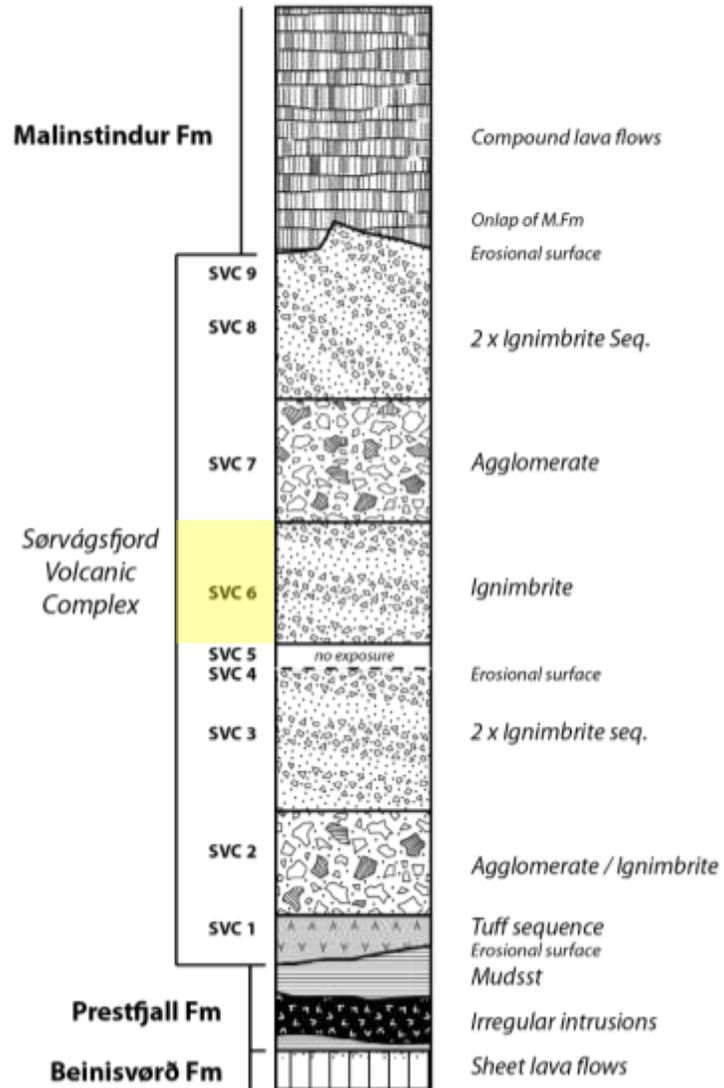

# Grótsløg og fláabygnaður : SVC 5) – Lahar við steinrunnum viði og grótmorl (Debris flow)

Bíggjarskor West Flank

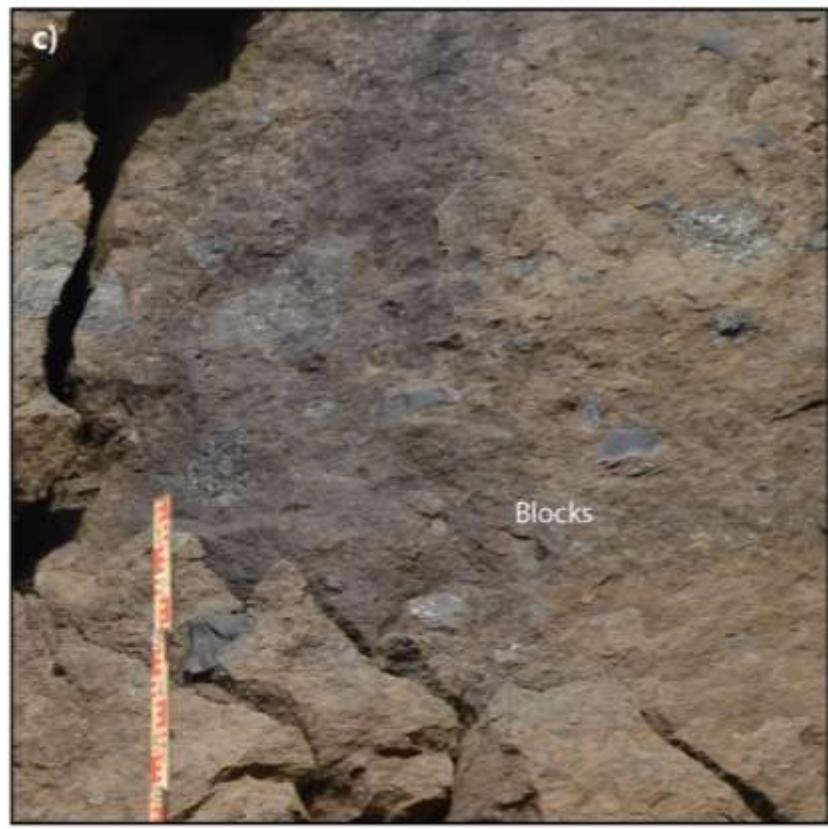

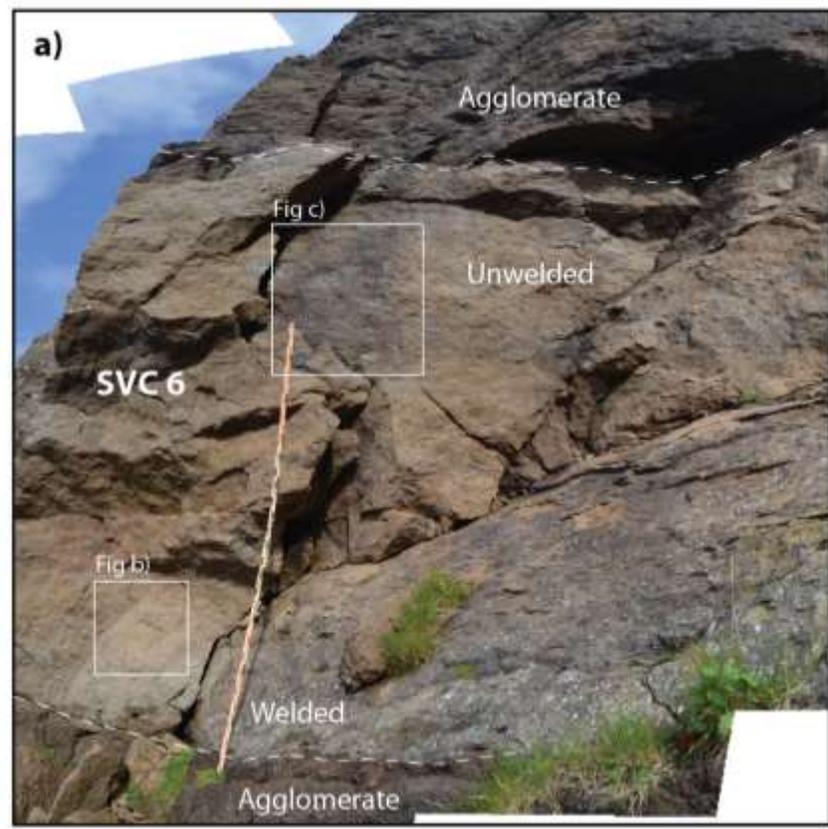

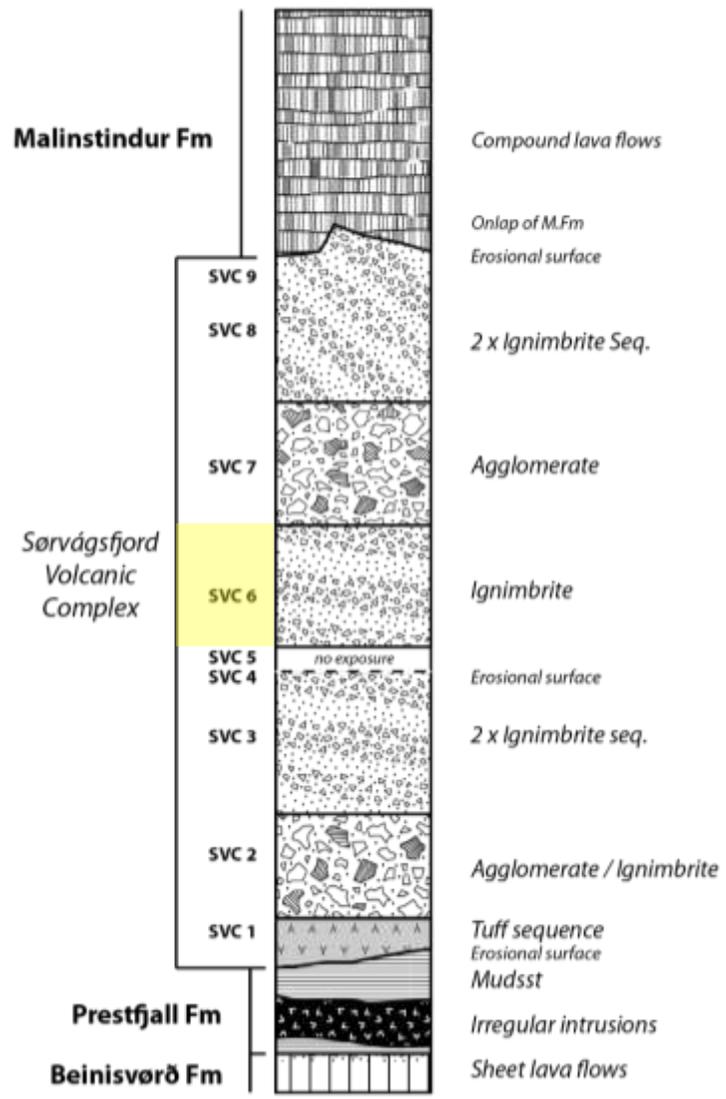

# Grótsløg og fláabygnaður : SVC 6) – Ignimbritt eindir og gosmyrjur (agglomerate)

Main Biggjarskor Profile

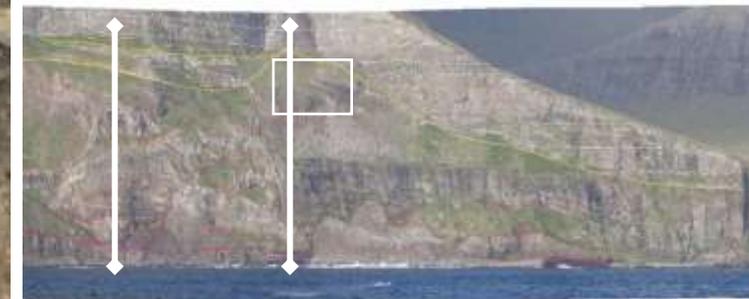

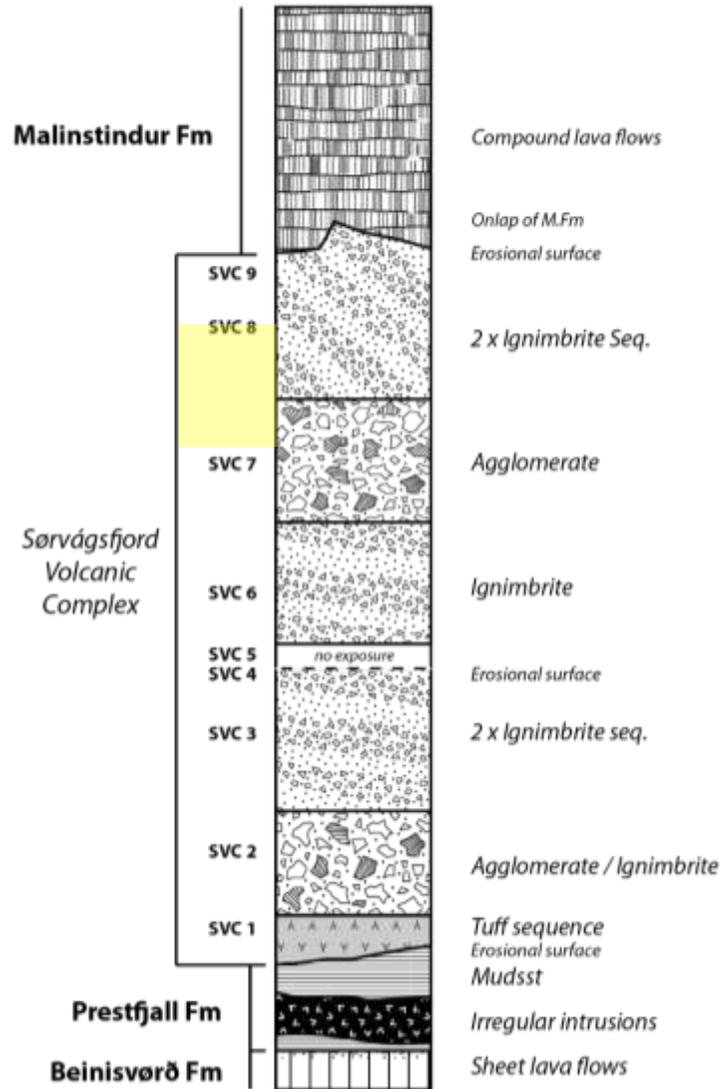

# Grótsløg og fláabygnaður : SVC 6) – Ignimbritt eindir og gosmyrjur (agglomerate)

Main Biggjarskor Profile

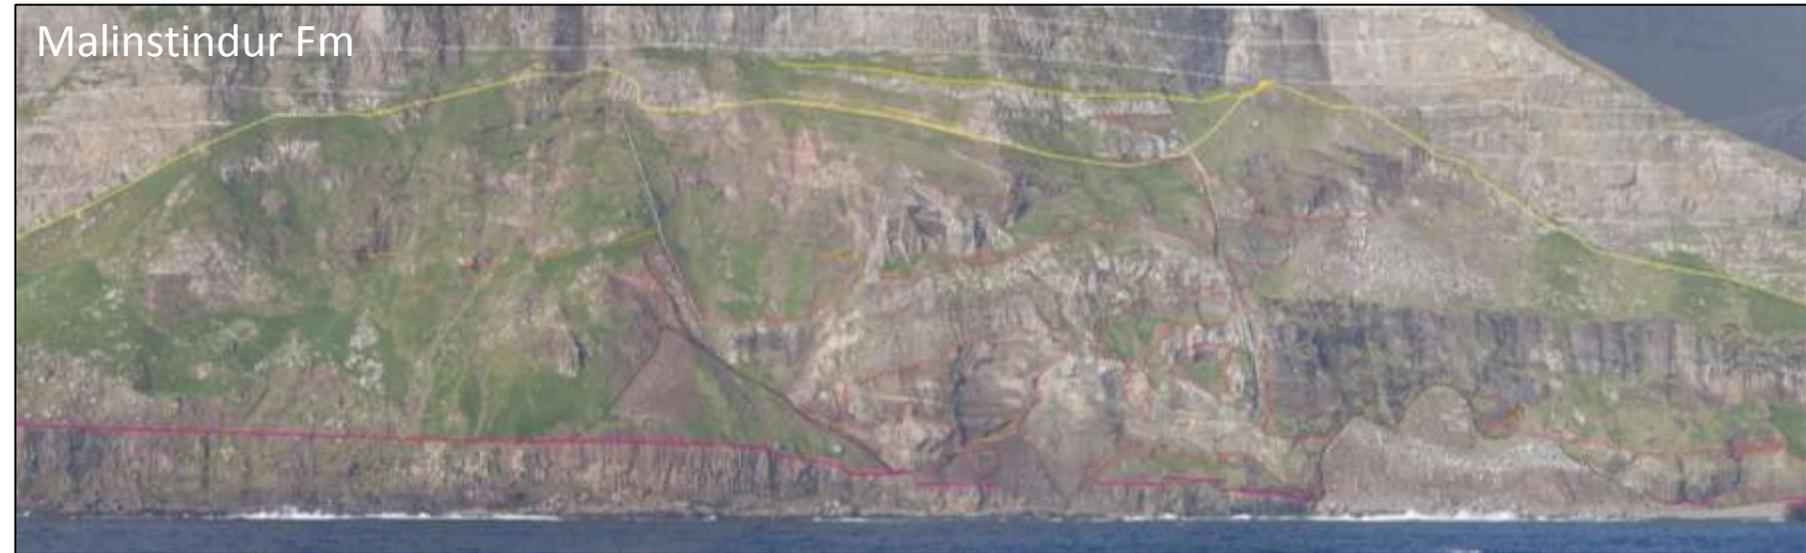

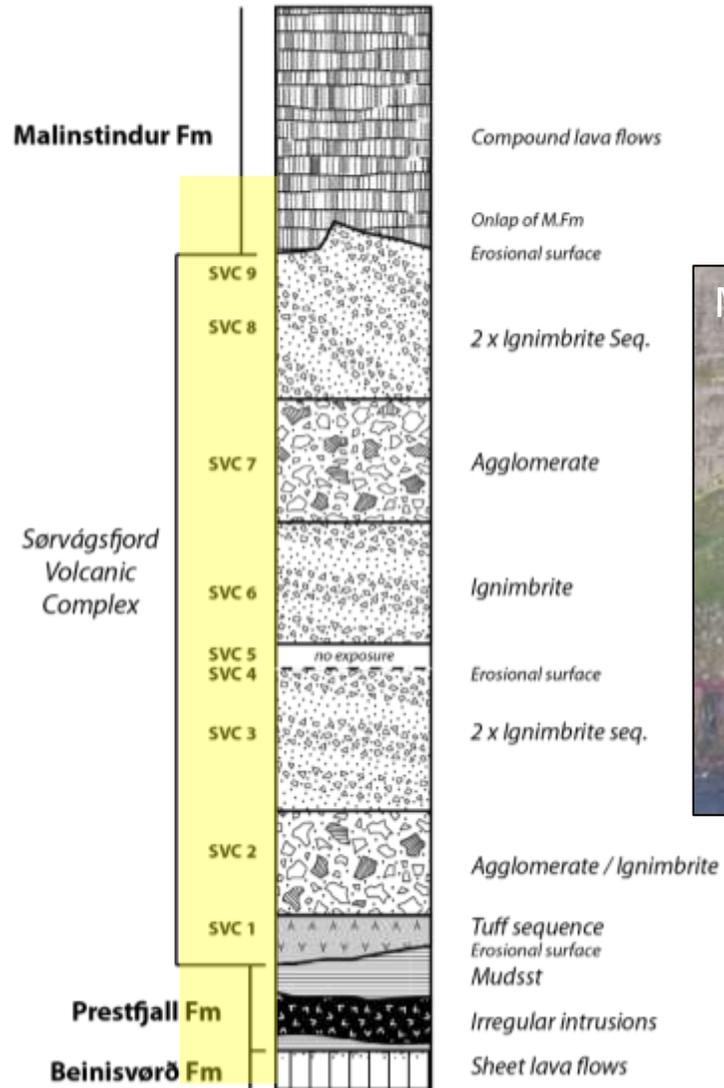

# Grótsløg og fláabygnaður : SVC 7) – Gosmyrja og grótmorl (debris flows)

Main Biggjarskor Profile

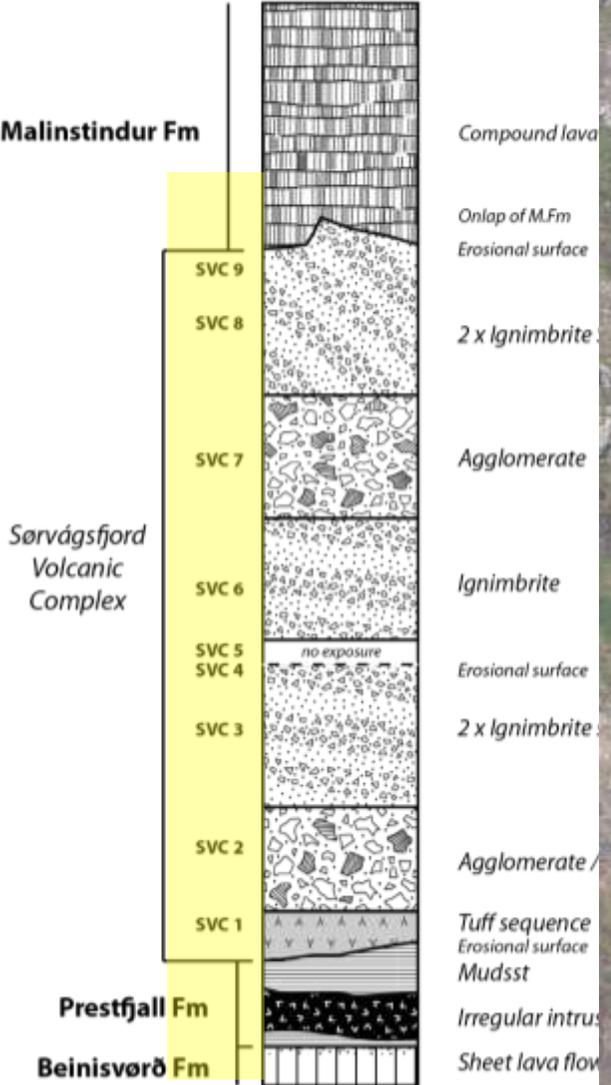

# Grótsløg og fláabygnaður : SVC 9) – Niðurbróting, máan / Malinstindur lavafláir leggjast omaná gosfjallið

Main Biggjarskor Profile

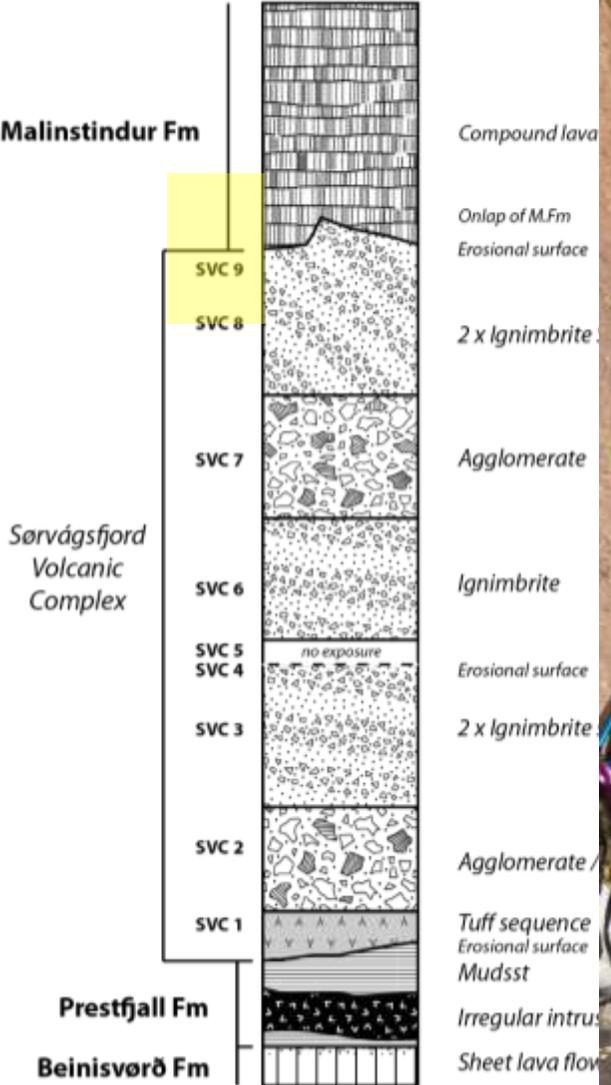

# Grótslög og fláabygnaður :

Main Biggjarskor Profile

# Grótslög og fláabygnaður :

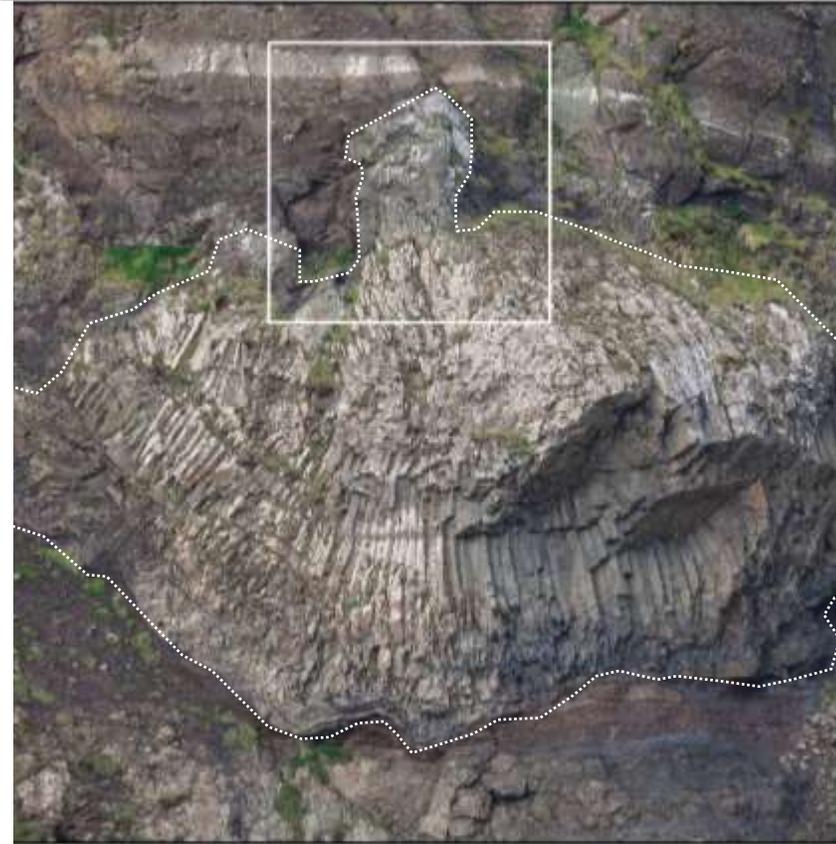

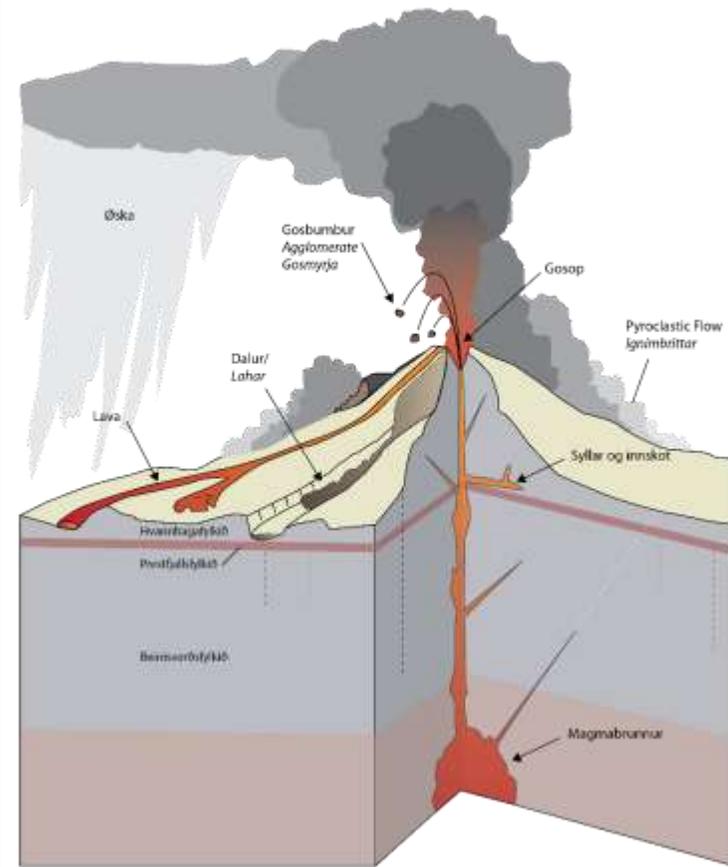

Main Biggjarskor Profile

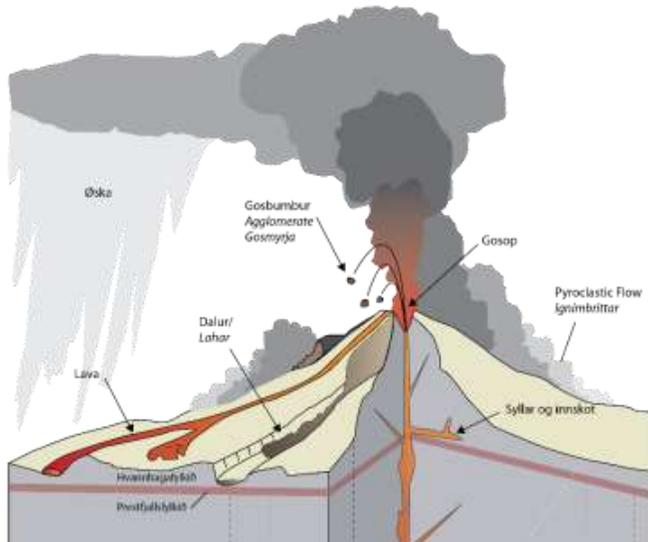

Gosfjallið

Lavafláir

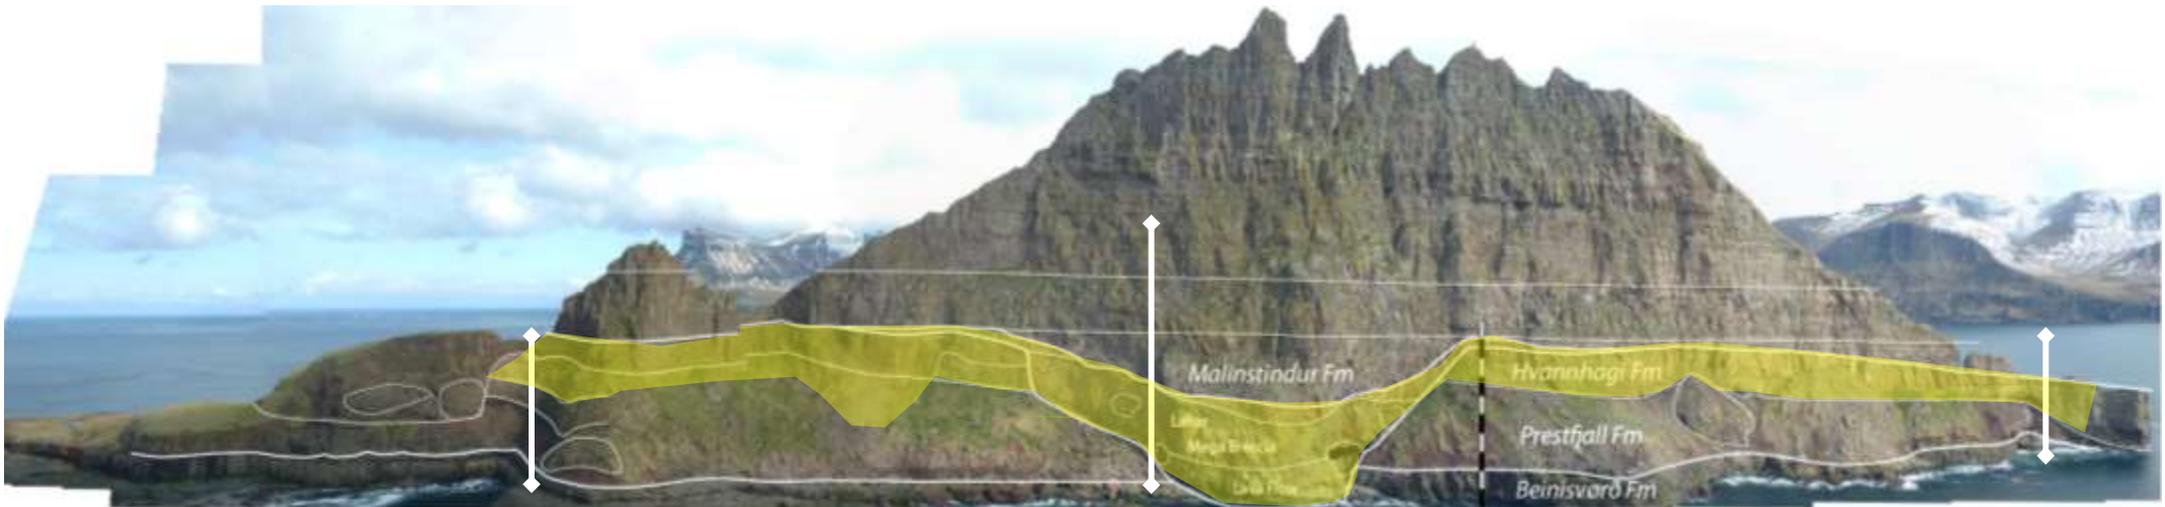

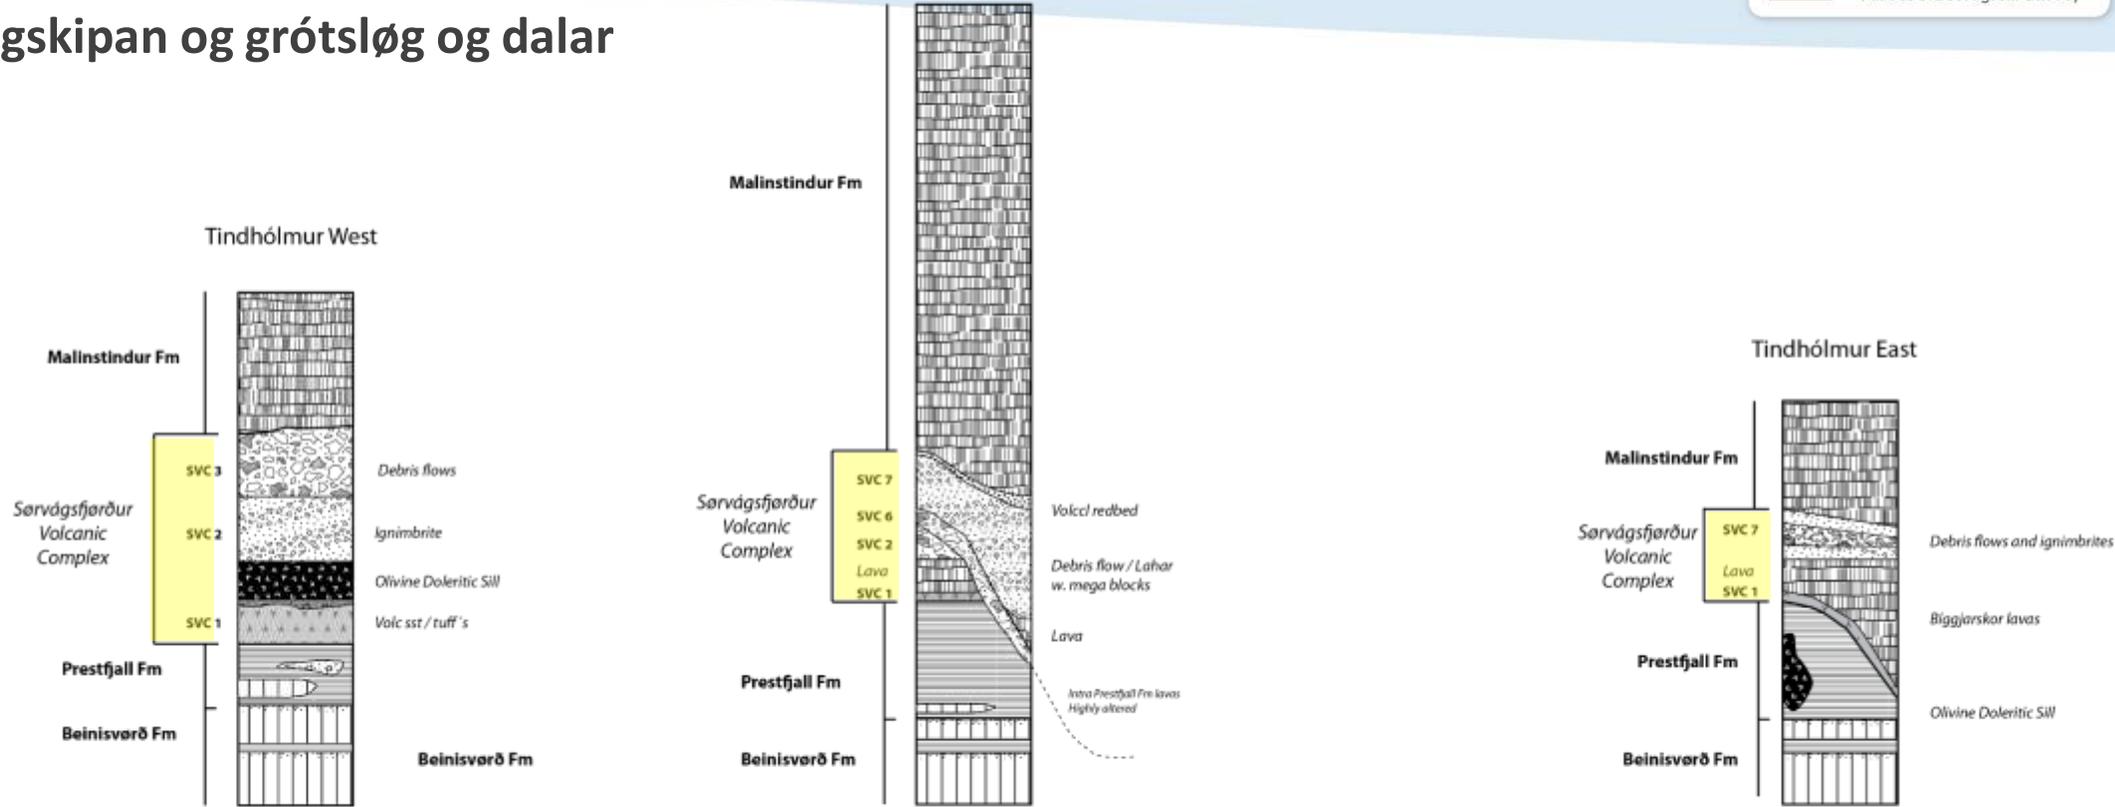

# – Óreglulig innskot, syllar, Olivin-ítinnut grót

# Grótsløg og fláabygnaður : SVC ) – Óreglulig innskot, syllar, goshálsar, Olivin-ítinnut grót

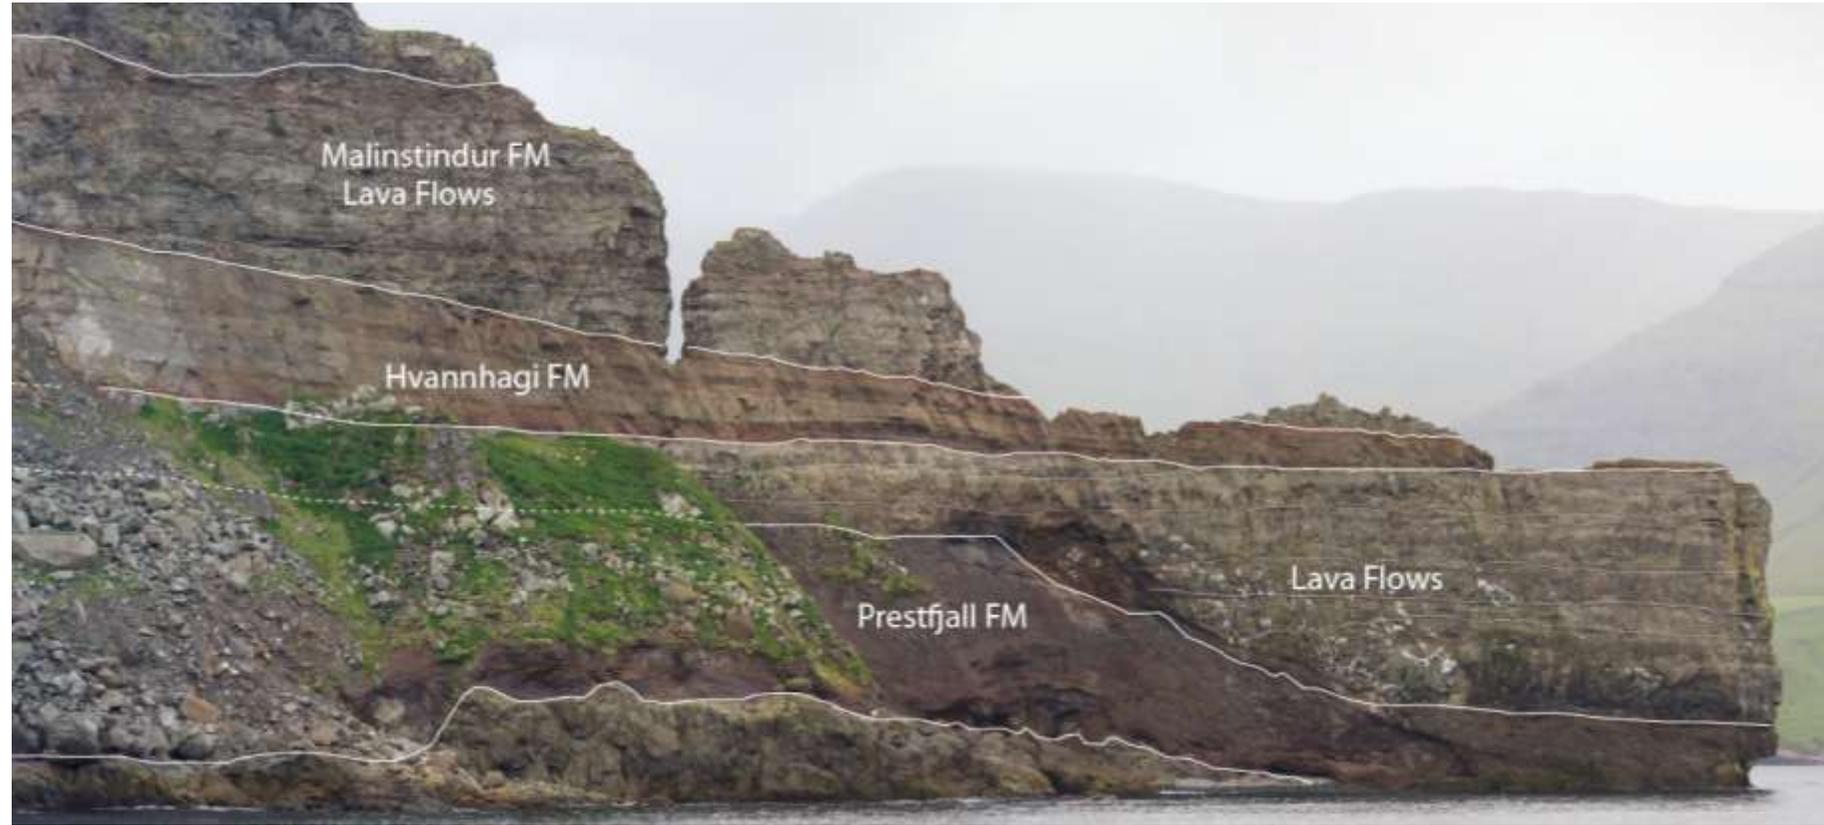

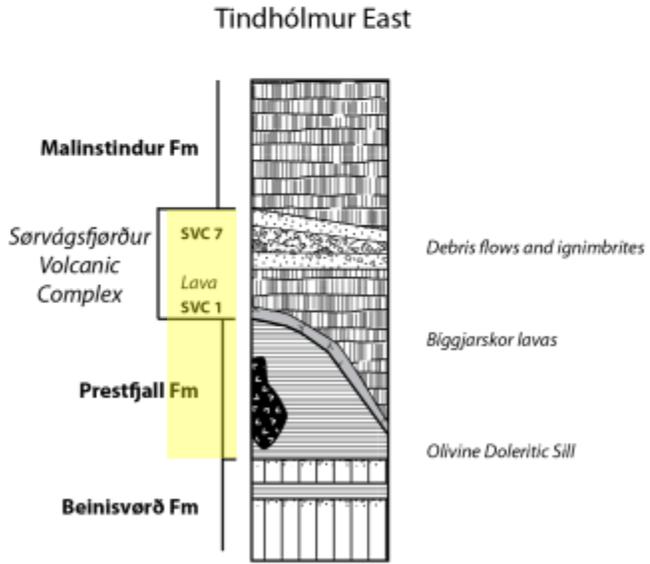

# Tindhólmur – lagskipan og grótsløg og dalar

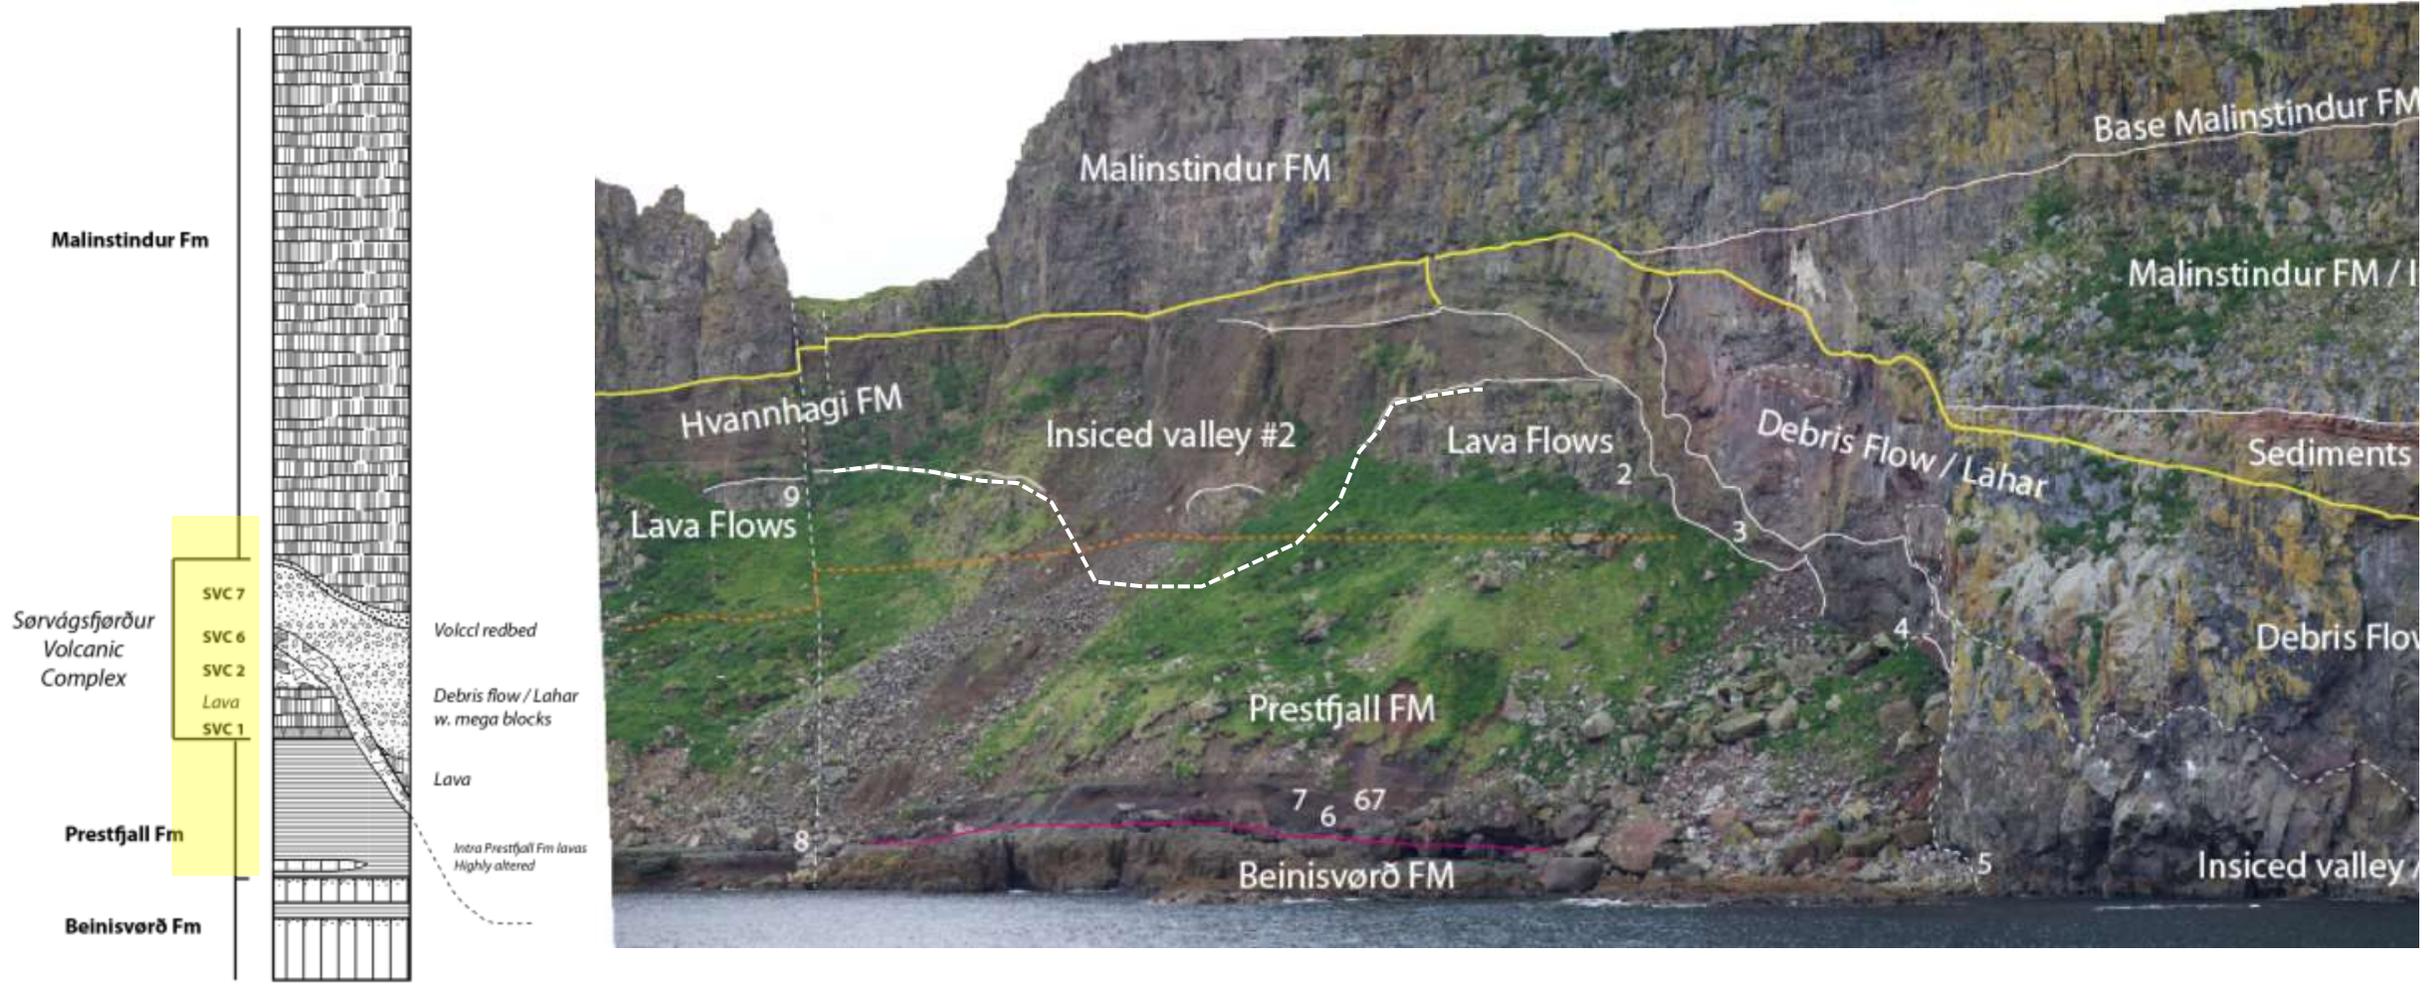

# Grótsløg og fláabygnaður : SVC 1 og lavafláir

## Dalur #1 – máar niður í Prestfjallsfylkið, fylltur við lavafláum, líka sum Malinstindsfylkið

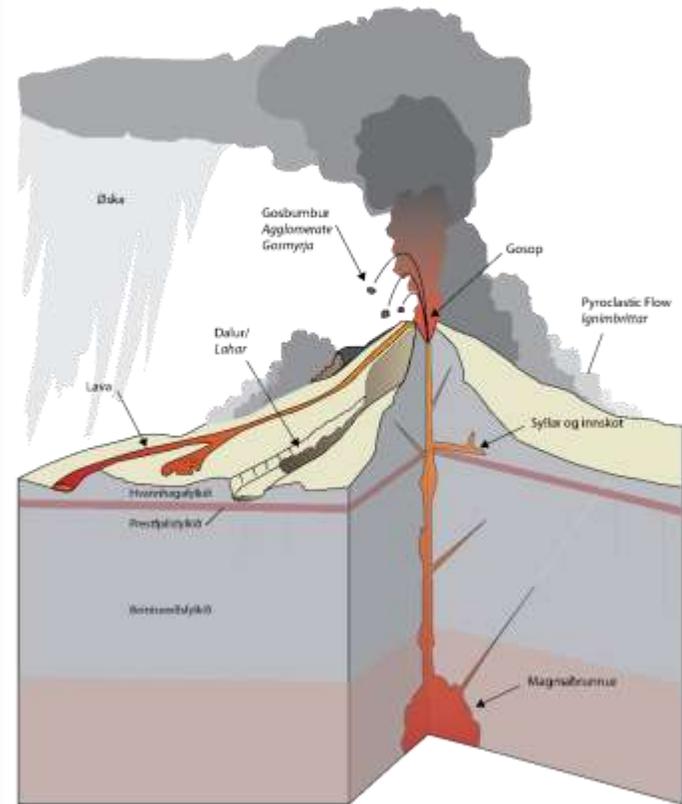

# Dalur #2 – máar niður í Prestfjallsfylkið, fylltur við “debris flows”

Tindhólmur Central

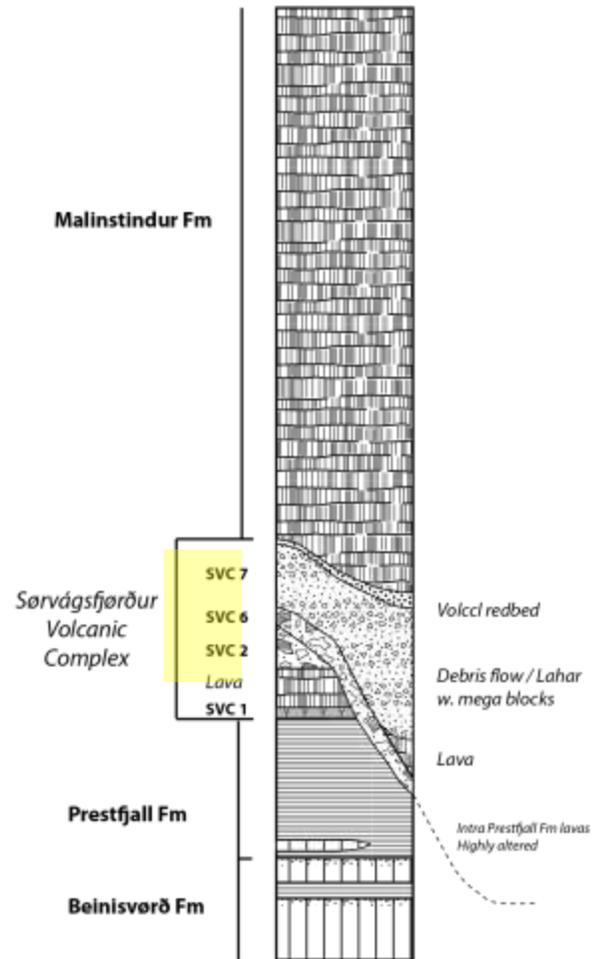

### Dalur #3 – Týðiligt fláamark, basalt lavafláir fylla botnin av hesum risastóra dali

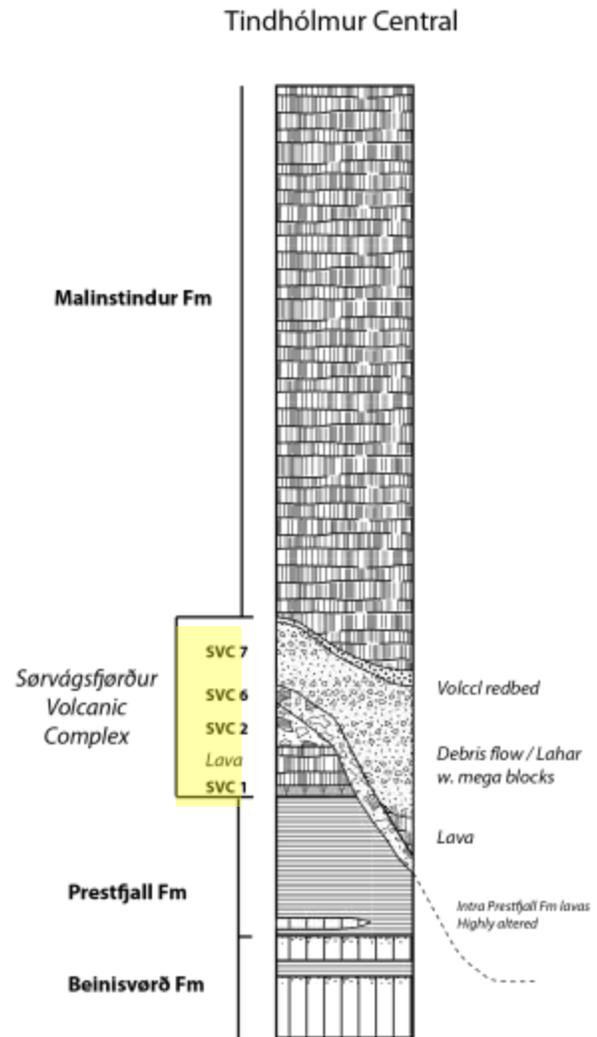

# Dalur #3 – Týðiligt fláamark, stórt og blandað grót fyllir dalin (mega blocks)

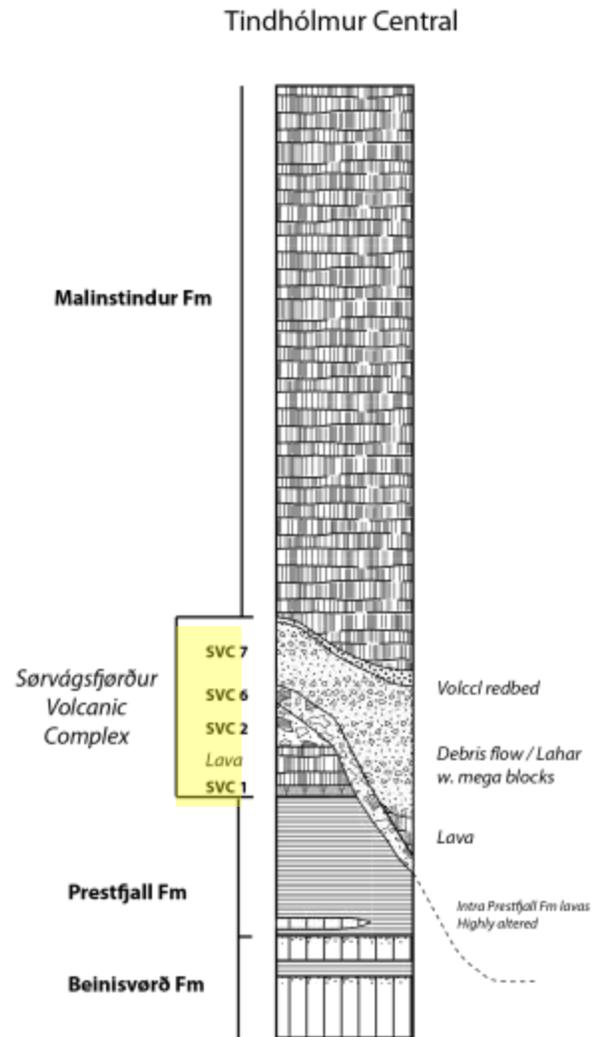

Tindhólmur Central

## Dalur #3 – Týðiligt fláamark, stórt og blandað grót fyllir dalin (mega blocks)

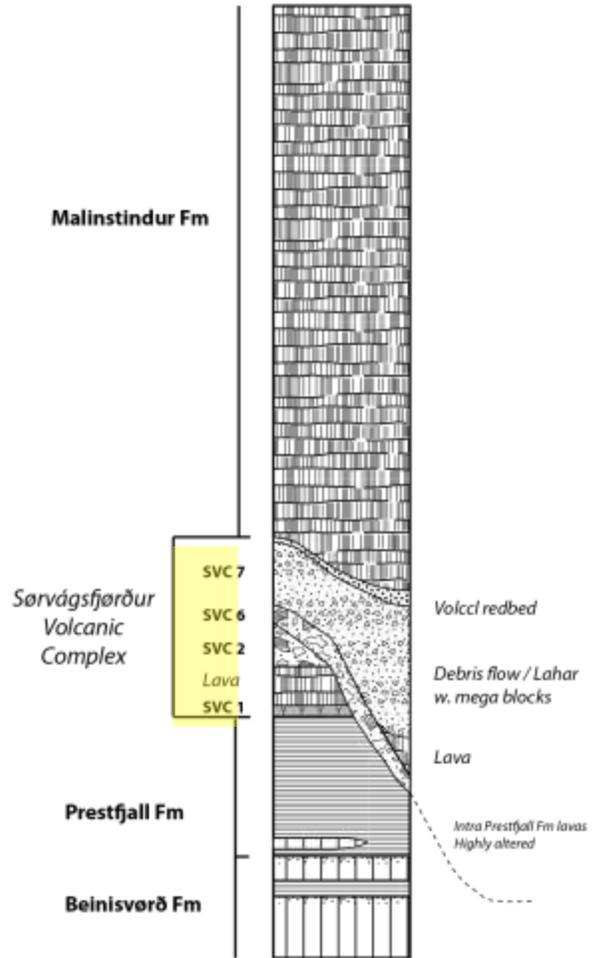

## Dalur #3 – Týðiligt fláamark, stórt og blandað grót fyllir dalin (mega blocks)

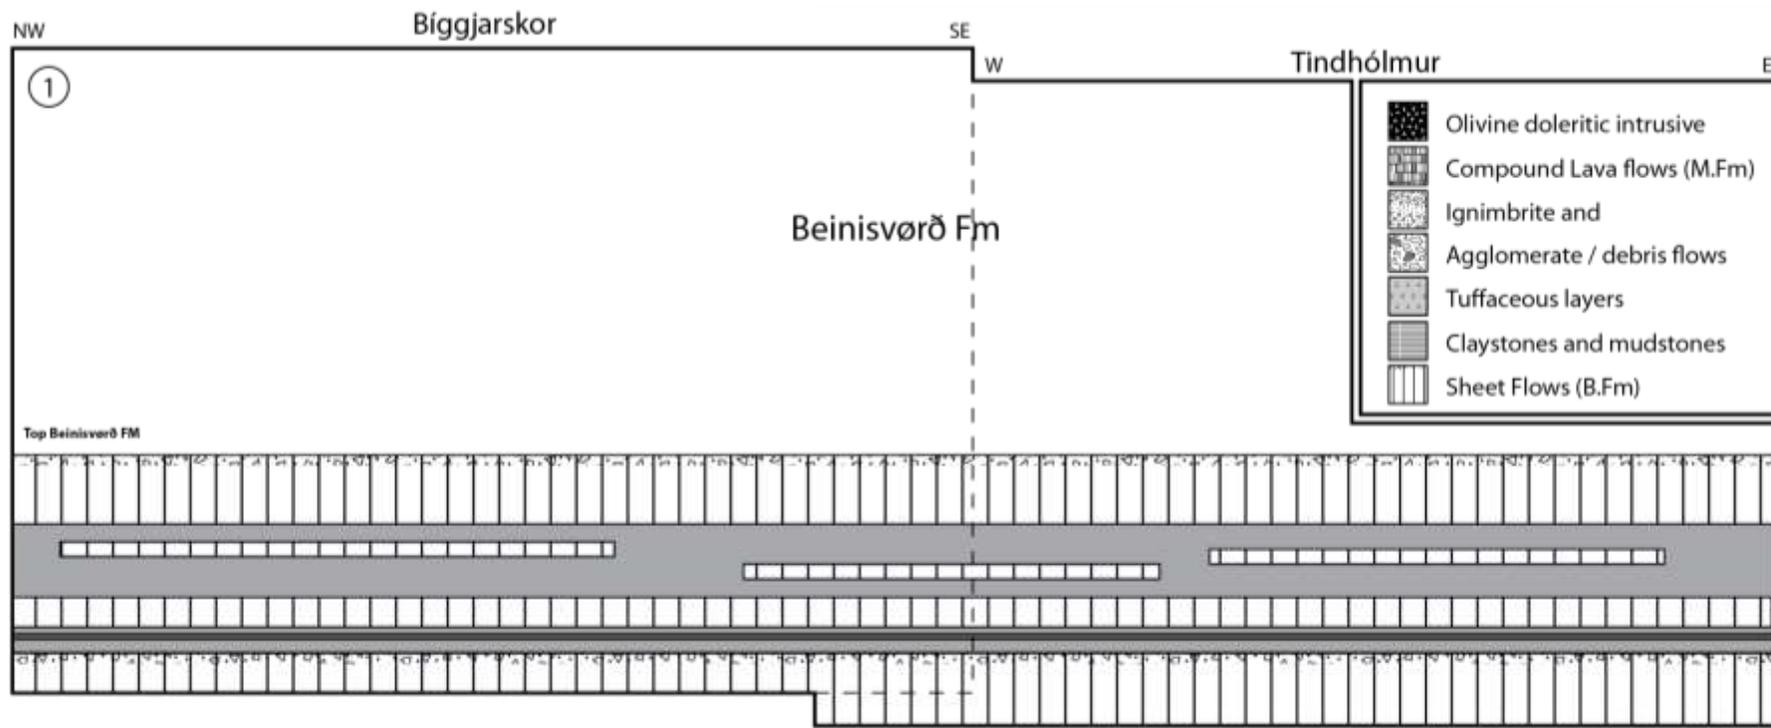

# Dalur #3 – Taka royndir av ignimbritt-eindini í dalinum

Tindhólmur Central

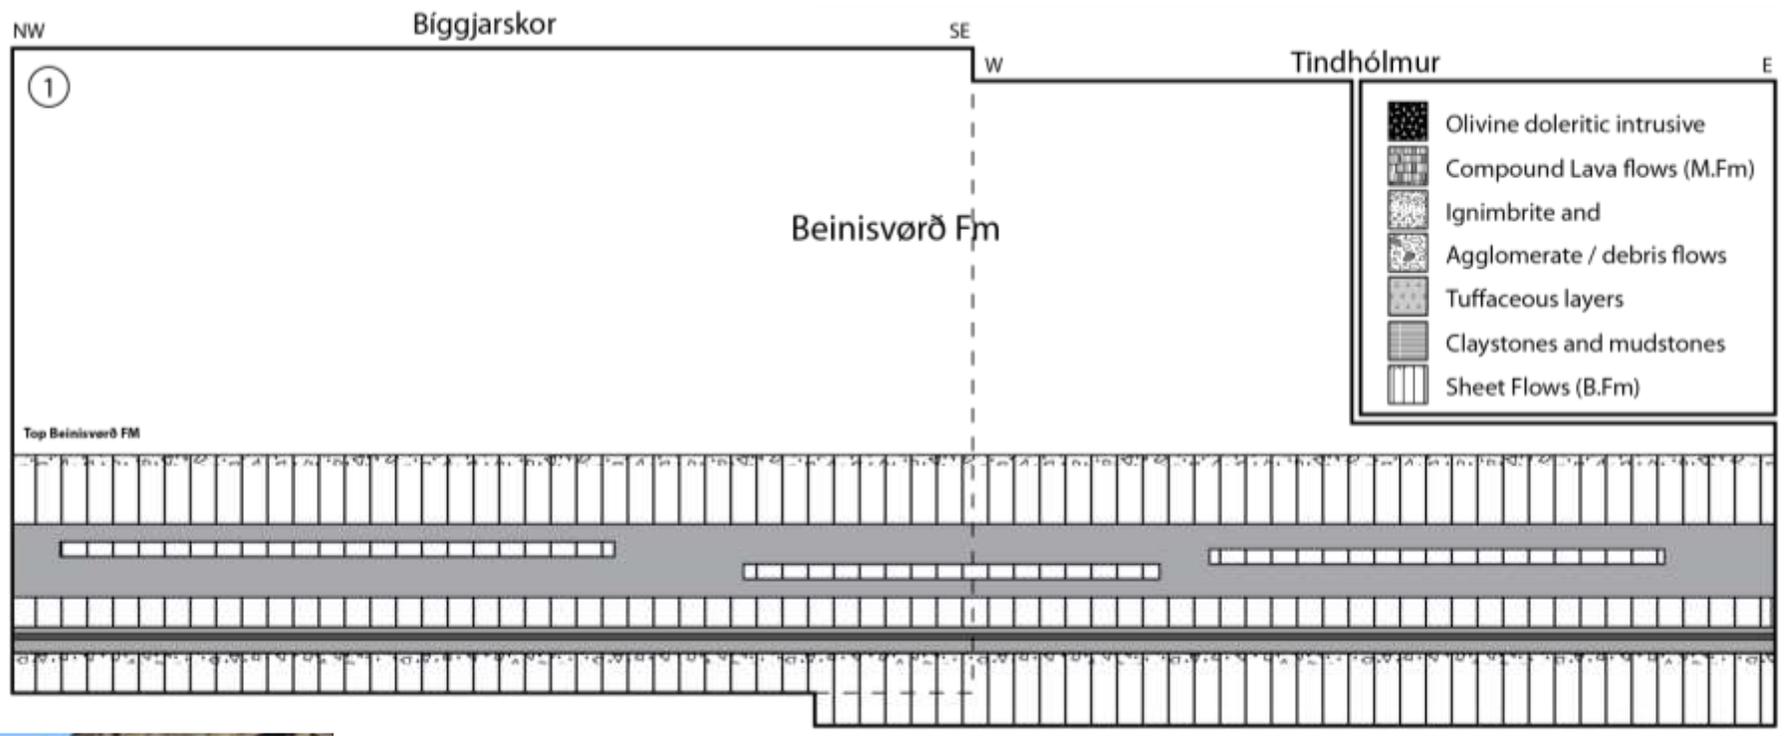

# Jarðfrøðiligt modell: Bíggjarskor og Tindhólmur

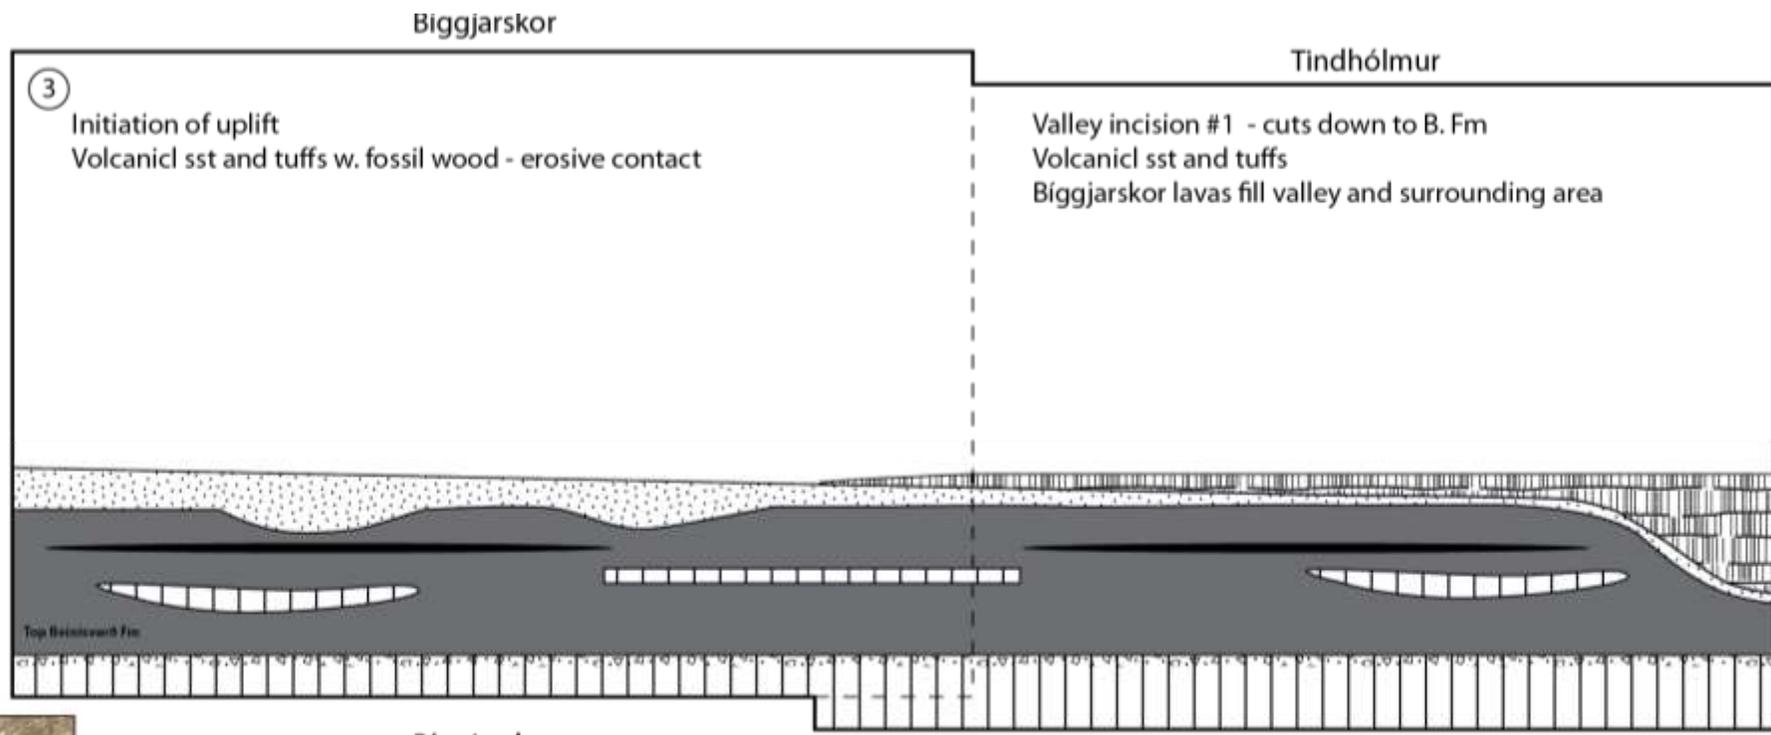

# Jarðfrøðiligt modell: Partur 1 – Seinasti parturin av Beinivørðsfylkinum

- Olivine doleritic intrusive
- Compound Lava flows (M.Fm)
- Ignimbrite and
- Agglomerate / debris flows
- Tuffaceous layers
- Claystones and mudstones
- Sheet Flows (B.Fm)

- Olivine doleritic intrusive
- Compound Lava flows (M.Fm)
- Ignimbrite and
- Agglomerate / debris flows
- Tuffaceous layers
- Claystones and mudstones
- Sheet Flows (B.Fm)

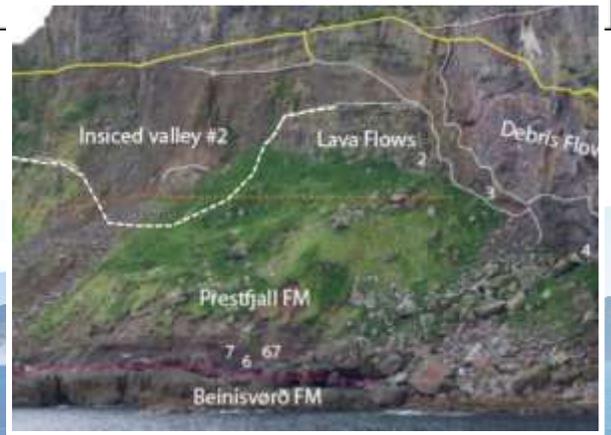

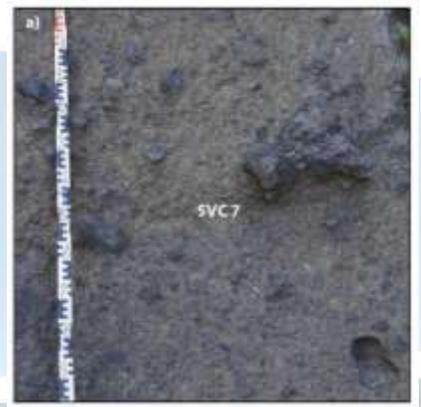

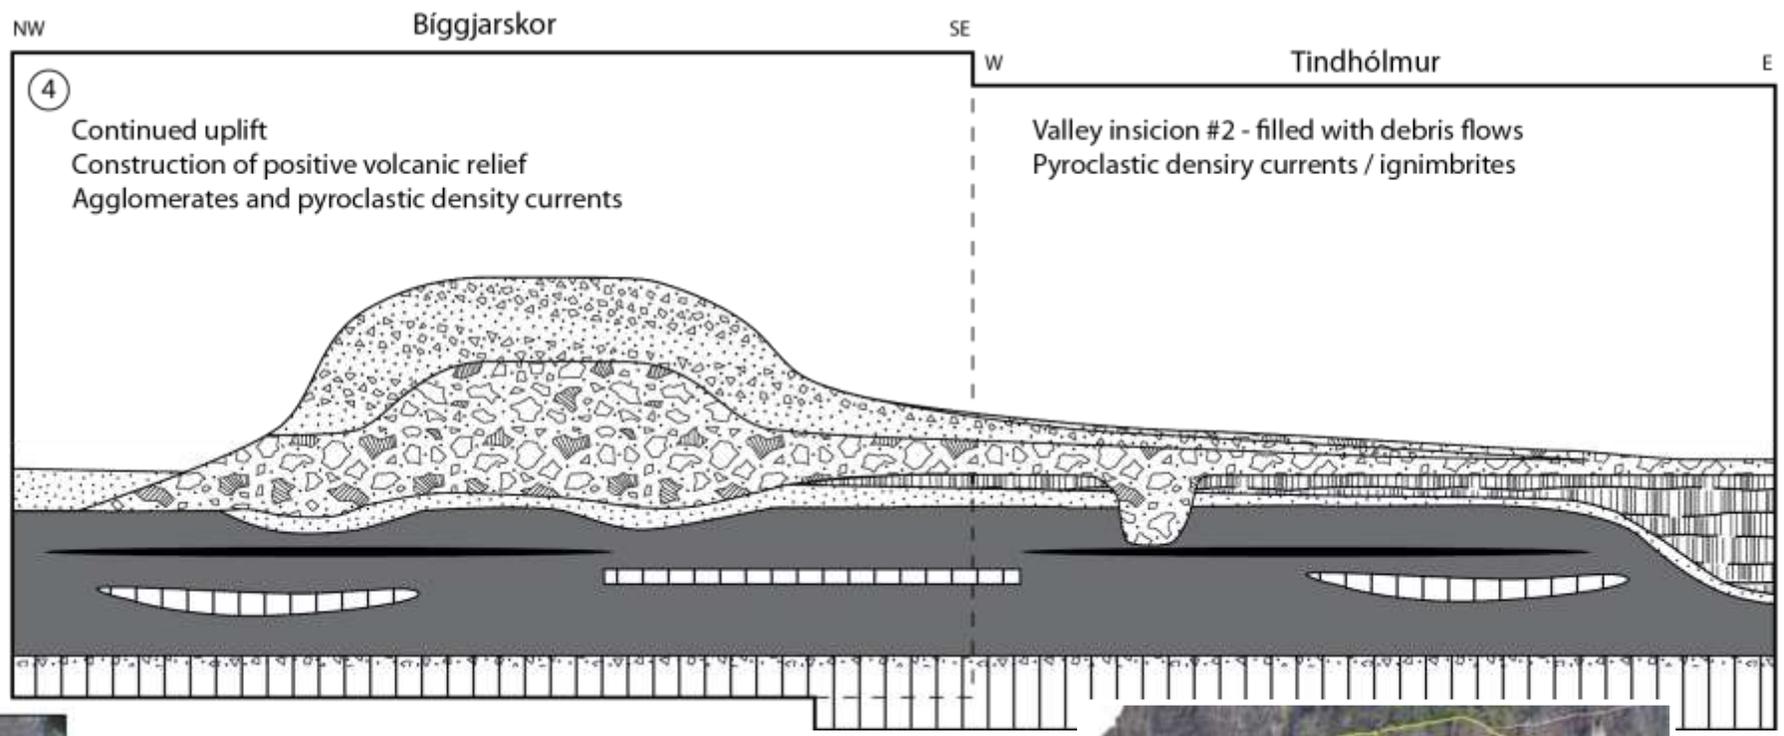

# Jarðfrøðiligt modell: Partur 2 – Gosmolagrót og øskuløg, dalur #1

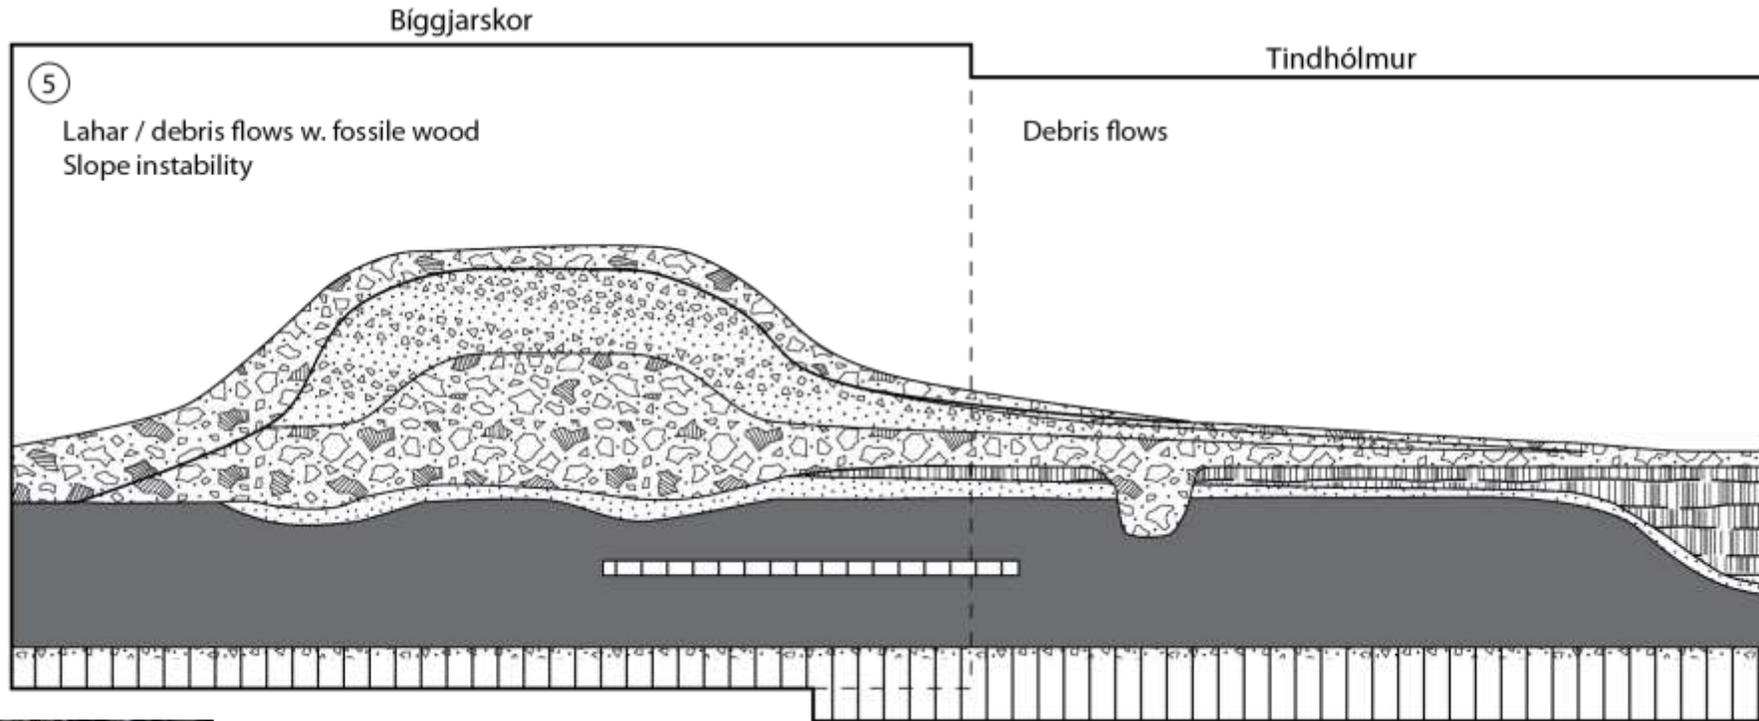

-  Olivine doleritic intrusive
-  Compound Lava flows (M.Fm)
-  Ignimbrite and Agglomerate / debris flows
-  Tuffaceous layers
-  Claystones and mudstones
-  Sheet Flows (B.Fm)

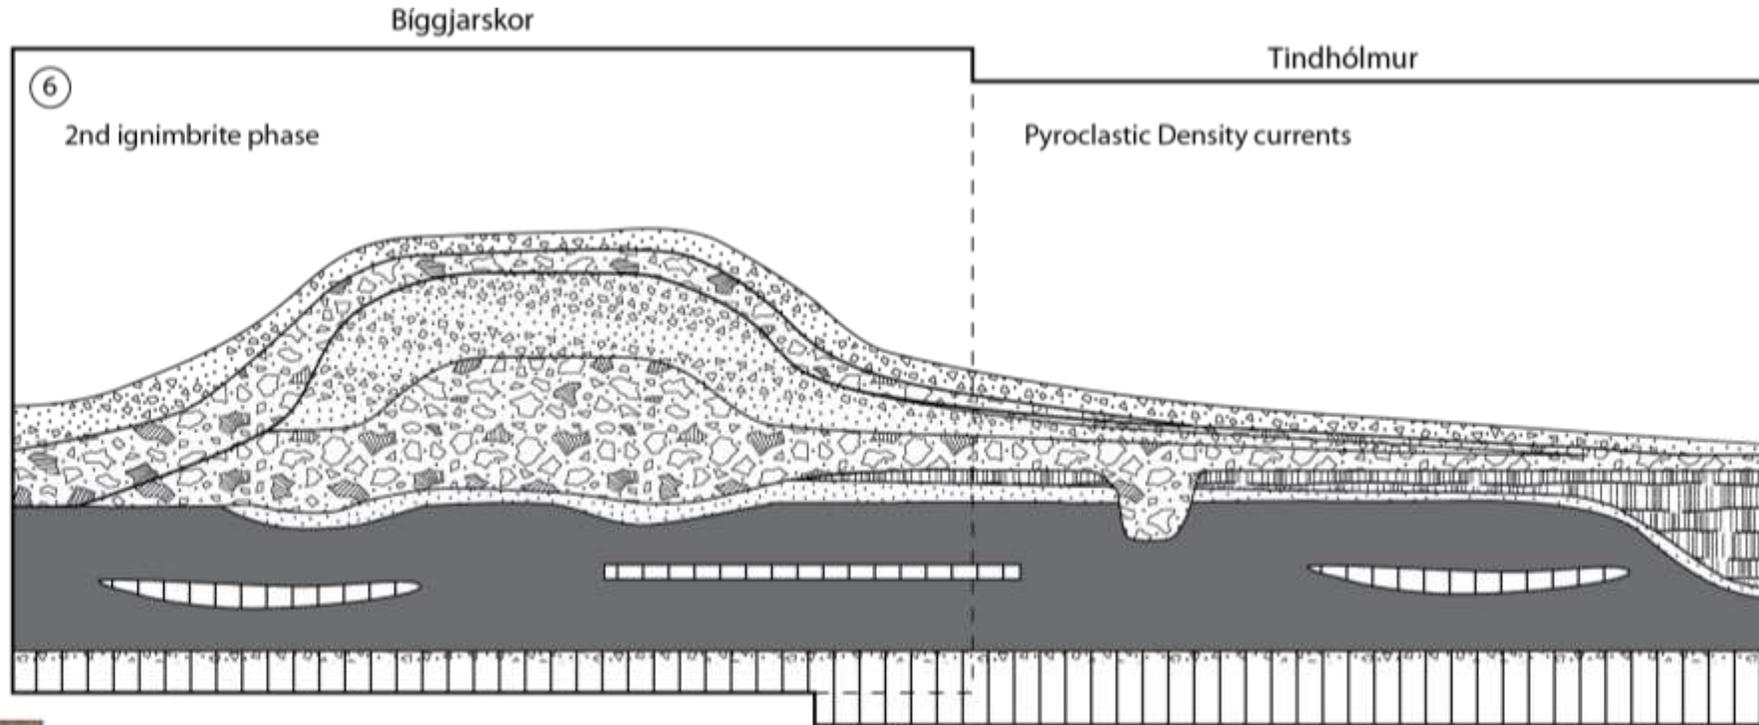

# Jarðfrøðiligt modell: Partur 3 – Gosmyrja, gosfjallið tekur skap Dalur #2

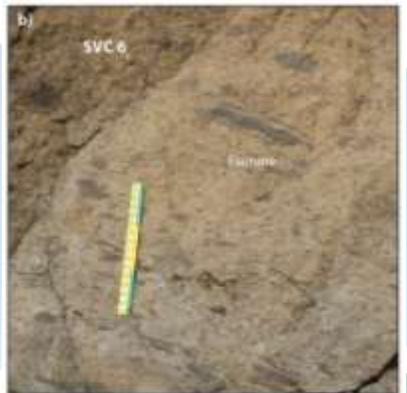

# Jarðfrøðiligt modell: Partur 4 – Lahar og debris flows, og niðurtærd fløta

# Jarðfrøðiligt modell: Partur 5 – Onnur ignimbritt fasan

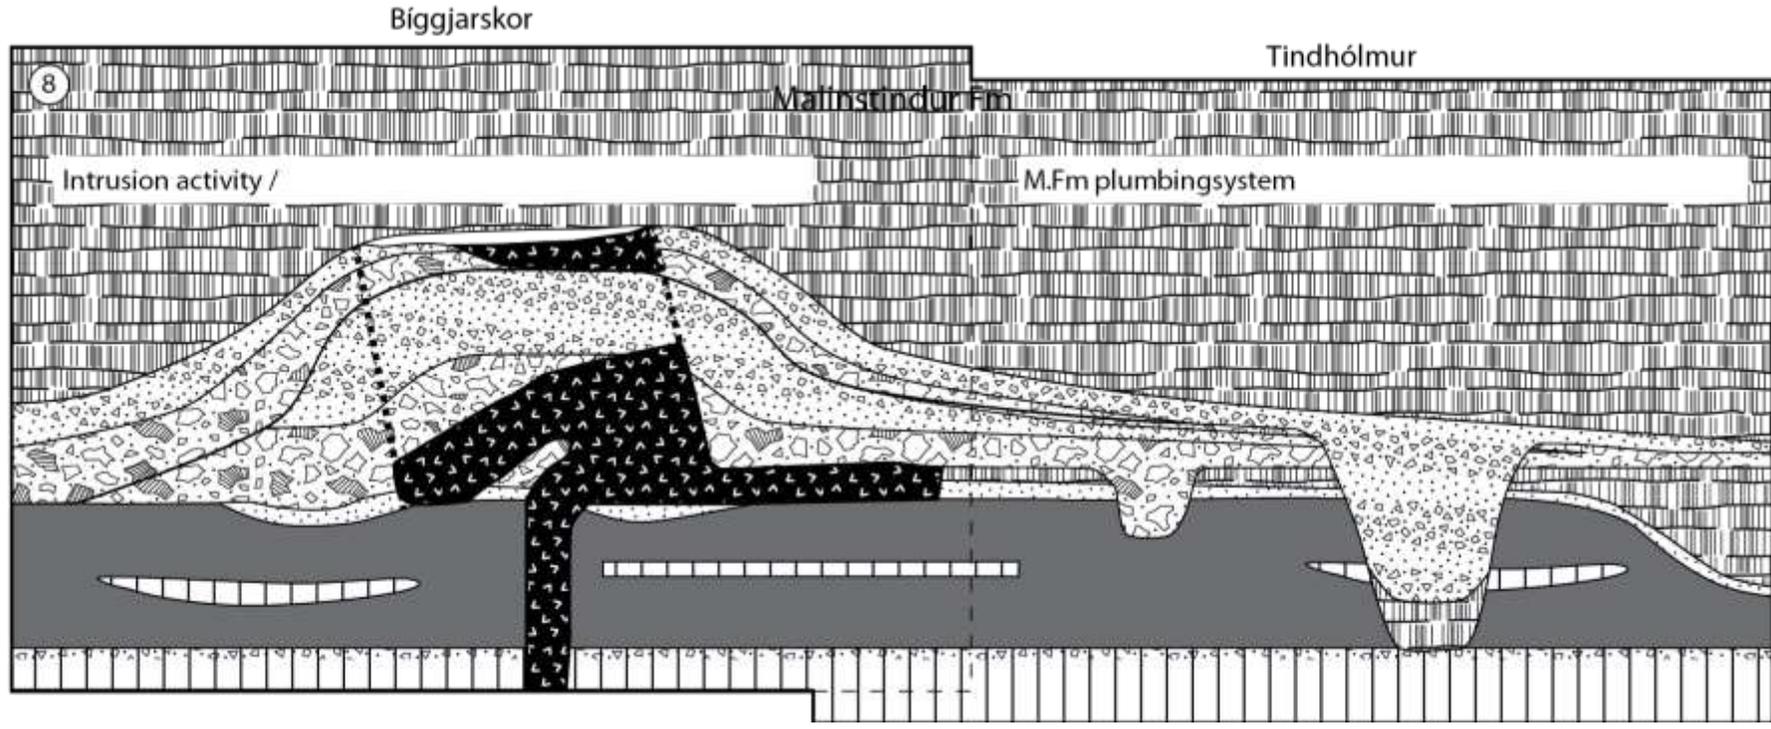

-  Olivine doleritic intrusive
-  Compound Lava flows (M.Fm)
-  Ignimbrite and
-  Agglomerate / debris flows
-  Tuffaceous layers
-  Claystones and mudstones
-  Sheet Flows (B.Fm)

# Jarðfrøðiligt modell: Partur 7 – Innskot og Malinstindsfylkið leggur gosfjallið undir í lavafláum

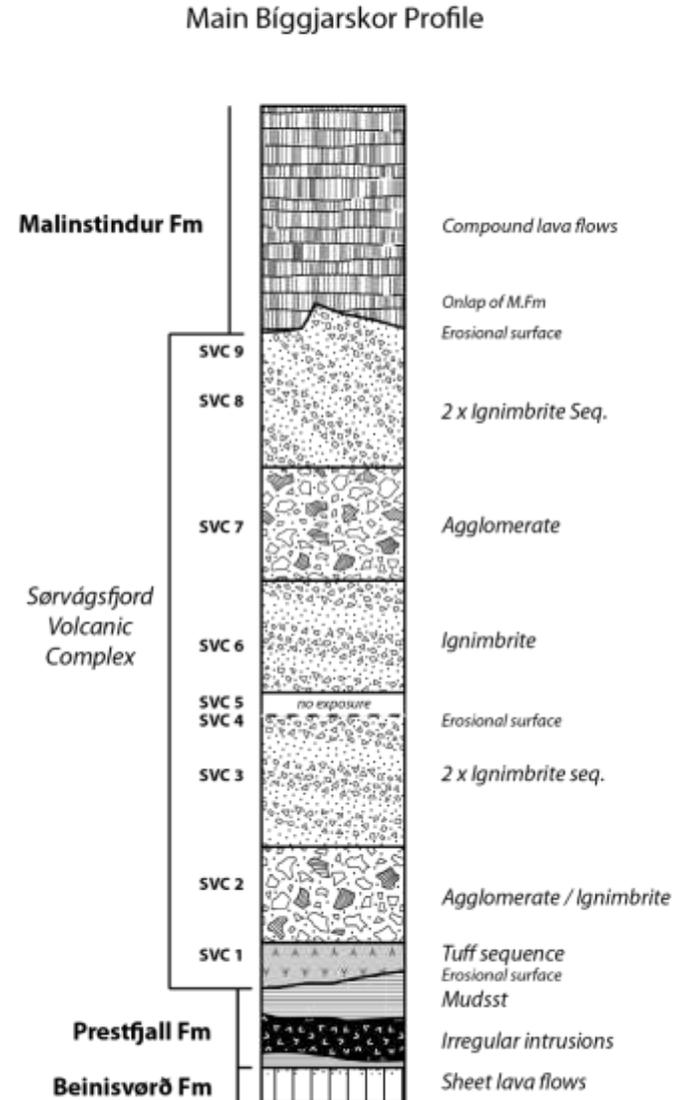

- Olivine doleritic intrusive
- Compound Lava flows (M.Fm)
- Ignimbrite and Agglomerate / debris flows
- Tuffaceous layers
- Claystones and mudstones
- Sheet Flows (B.Fm)

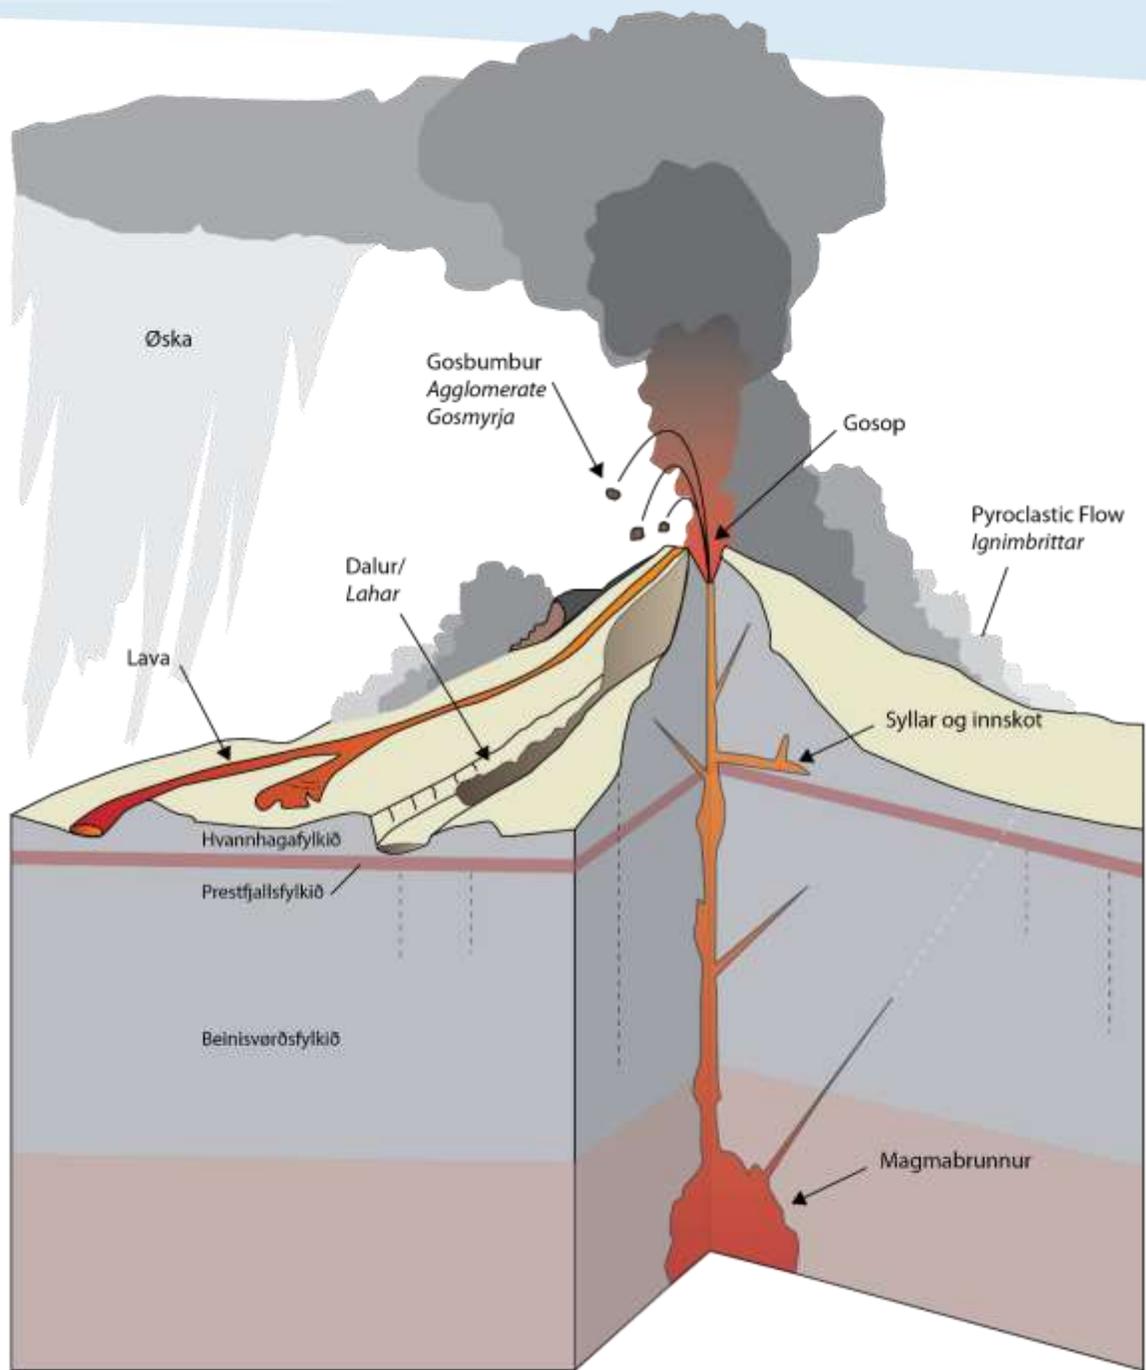

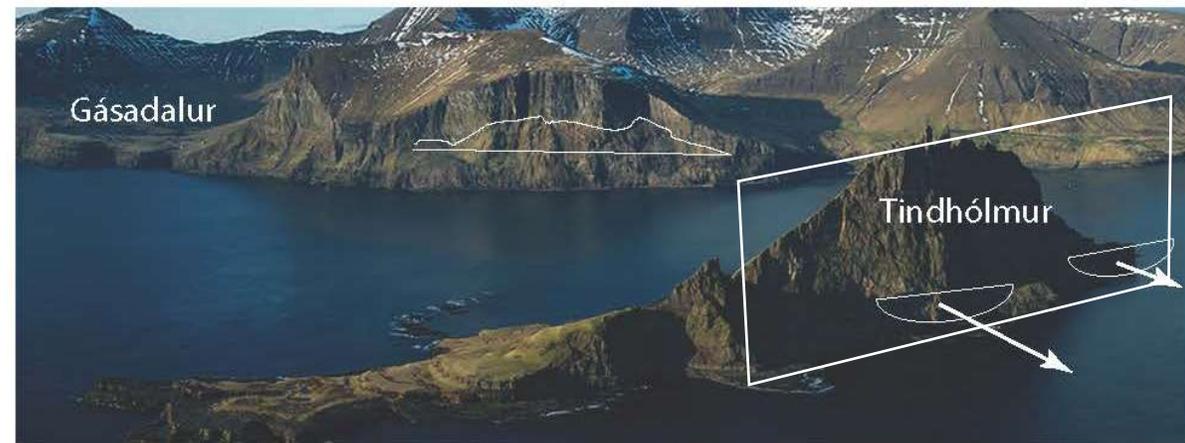

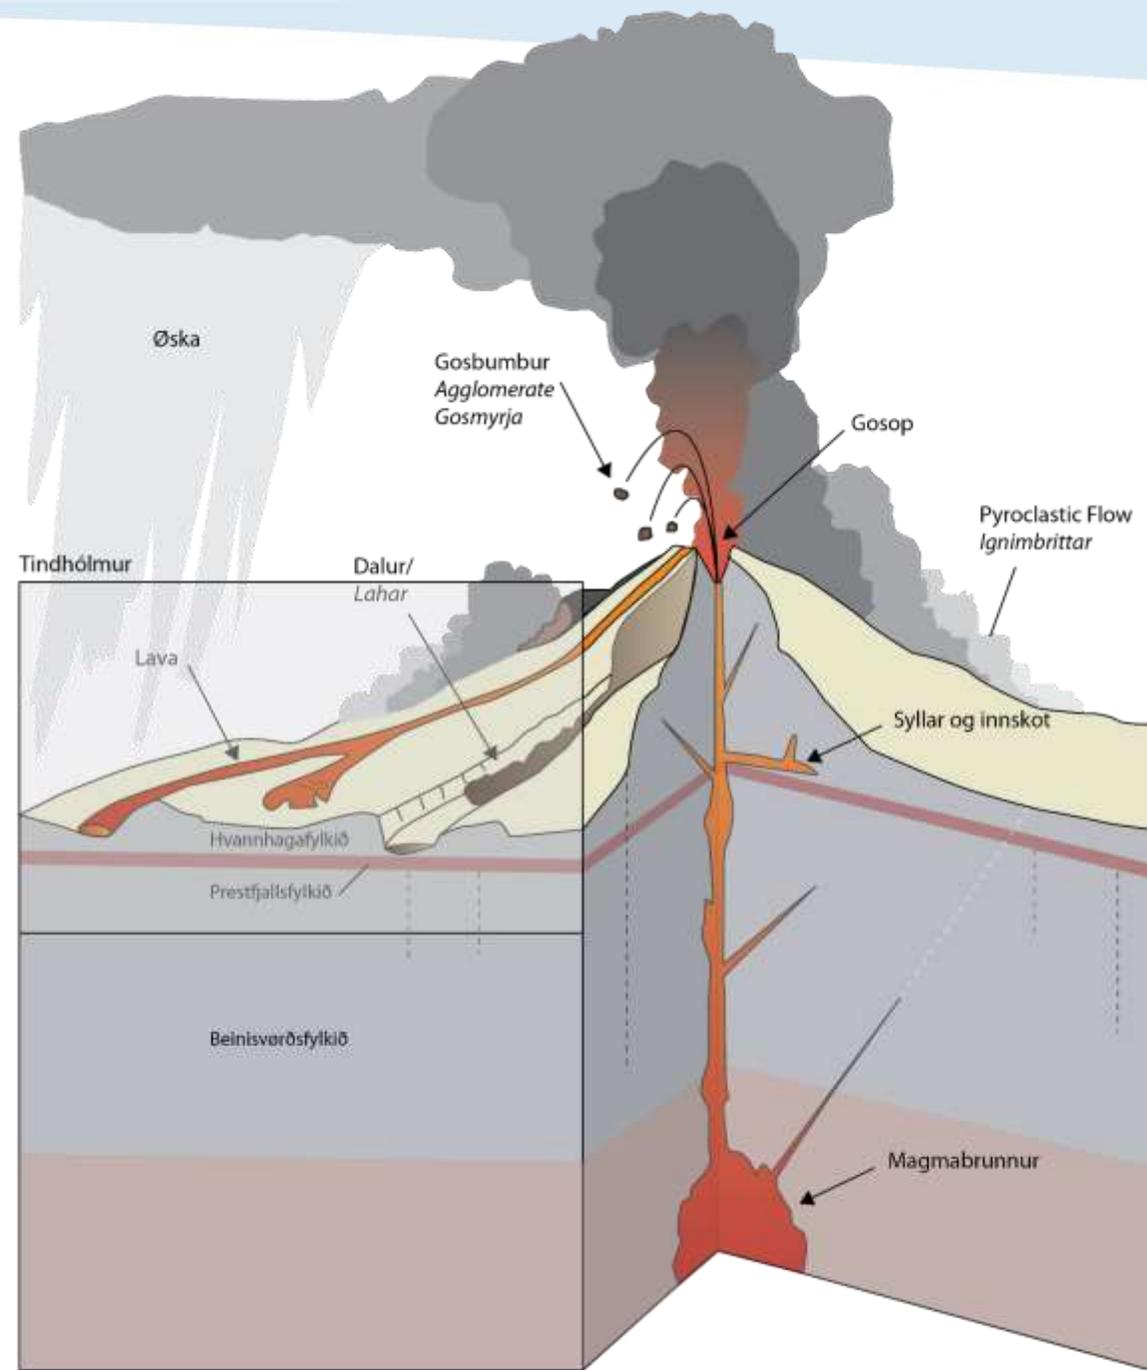

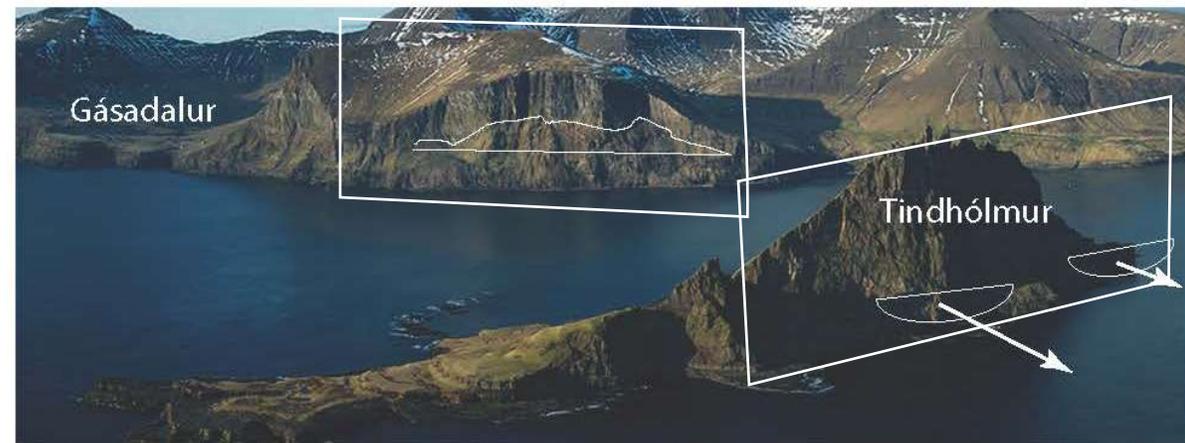

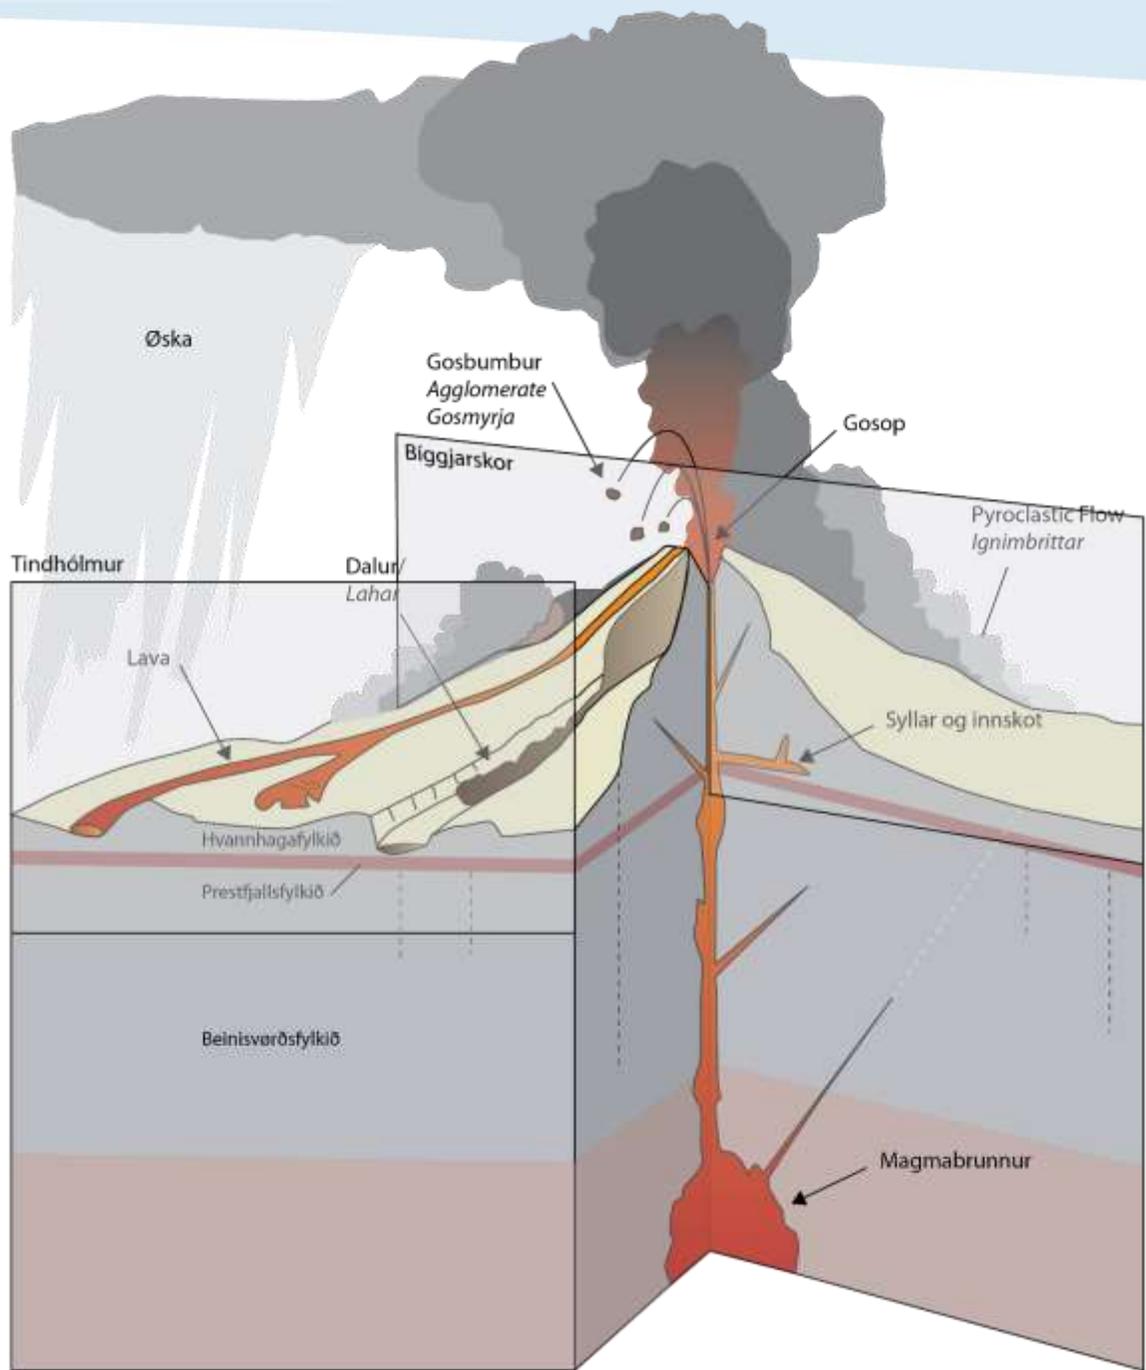

# Niðurstøður frá arbeiðinum

- The Sørvágsfjørður Volcanic Complex
  - Leivdir av 1,5km x 150m stórum gosfjalli (í minsta lagi)
  - Øll eyðkend grótsløf frá einum gosfjalli eru til staðar
  - Vit hava navngivið hetta **Sørvágsfjørður Volcanic Complex**
  - Gosvirksemi á sama stað við fleiri ymsum tíðarbilum, fleiri “fasir”
  - Fleiri ymisk sløg av basaltiskari lava

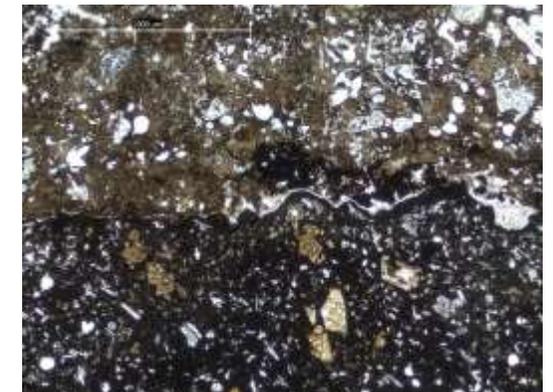

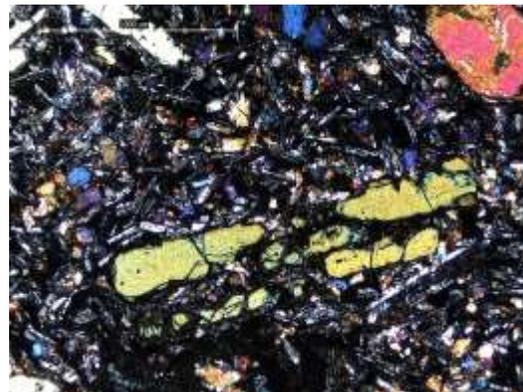

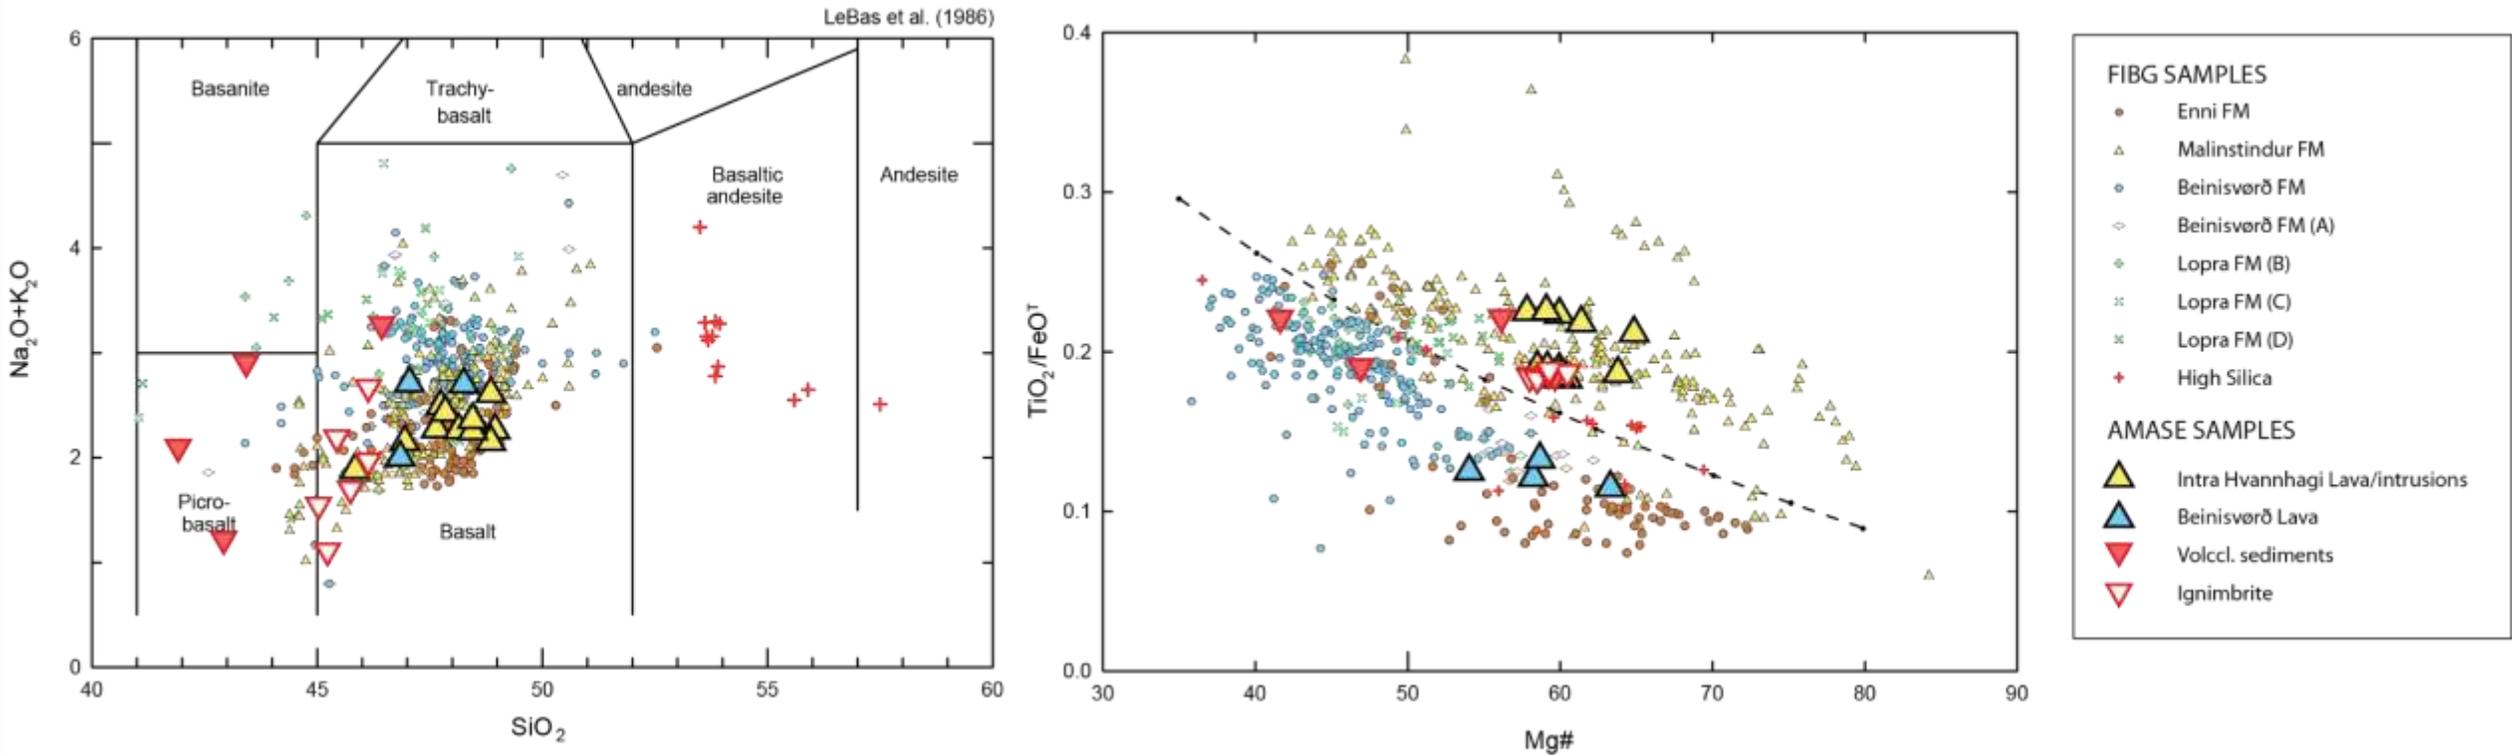

# Víðari gransking av gosfjallinum, jarðevnafrøði og annað

A scenic view of a black wooden cabin with a grass roof on a cliff overlooking the ocean. In the foreground, three people are sitting on a wooden deck, looking at a laptop. The cabin has a white chimney. The background features a large body of water and a massive, flat-topped mountain range under a blue sky with light clouds.

Takk fyri áhugan!
